Redesigning The World:

Redesigning The World Sam Pitroda, 2021-04-26 The world was last designed seventy five years ago about the same time that Sam Pitroda was born This design has outlived its utility Hyperconnectivity and the COVID 19 pandemic offer a unique opportunity to redesign the world to take humanity to the next level Redesigning the world is not about looking at it from the point of view of liberal or conservative left or right capitalism or socialism public or private democracy dictatorship or monarchy open or closed systems rich or poor urban or rural east or west white brown black or yellow This proposed redesign of the world has the planet and its people at the centre it is built on the foundations of sustainability inclusion equality equity and justice so that everyone on earth can enjoy peace and prosperity It is not an idealist or utopian vision but one with humanity at its core This book is about reshaping the world to meet the future challenges of our planet and our people

Redesign the World - A Global Call to Action Sam Pitroda, 2021-05-04 The world was last designed seventy five years ago about the same time that Sam Pitroda was born This design has outlived its utility Hyperconnectivity and the COVID 19 pandemic offer a unique opportunity to redesign the world to take humanity to the next level Redesigning the world is not about looking at it from the point of view of liberal or conservative left or right capitalism or socialism public or private democracy dictatorship or monarchy open or closed systems rich or poor urban or rural east or west white brown black or yellow This proposed redesign of the world has the planet and its people at the centre it is built on the foundations of sustainability inclusion equality equity and justice so that everyone on earth can enjoy peace and prosperity It is not an idealist or utopian vision but one with humanity at its core This book is about reshaping the world to meet the future challenges of our planet and our people The three dimensions In the third vision he calls for nations networking ideas interests resources and talent all designed to save our planet and uplift all our people This vision will be based on a novel organizational architecture focussed on global consultations collaboration co operation and enhanced communication He lays out what he sees as the three dimensions of the information age connectivity content and context There is also reference to three unique dimensions of information technology democratisation decentralisation and demonetisation Then there are five new pillars for the world s redesign inclusion human needs new economy sustainability conservation and non violence There are multiple valid points such as the need to discard the use of over simplistic and inadequate tools such as GDP to measure economic growth and well being The book stresses on the need to keep environmental concerns central to any new policy making pointing out that the planet can survive without people but people cannot survive without a healthy planet Our priority during the world s redesign has to be to improve our planet s health and make it more clean diverse prosperous and sustainable a place where each plant and form

of life can flourish and live to its fullest potential Perhaps the most heartfelt section of the book is one at the end entitled Who Am I to Write This Book in which he delves into his motives for penning this book The book offers a much needed manifesto that can guide the world to better healthier sustainable human life However in a bitterly divided world with governments turning towards populism nationalism and brutality to crush change political will at the highest level one the crucial elements that would make the manifesto possible seems to be unachievable at the moment He urges us to recognise how Covid has underscored how interconnected we are but few seem to be able to recognise this not the least India currently facing unprecedented challenges to save lives As a manifesto a wish list for the next 75 years this is a wonderful even inspiring read The challenge is to make the powers that be accept this vision

abroad The volume also addresses the extent to which national environmental policy and or global environmental agreements clash with the emerging rules of the World Trade Organization and whether such environmental policies hinder export competitiveness Finally numerous political economy analyses of the complex political coalitions that arise to adapt to and mitigate changes in trade and environmental policy are provided In addition to broader overviews of the field in depth case studies of nations and regions are offered including the United States the European Union China India and Mexico as well East Asia Latin America and Africa The volume will serve as a guide for scholars new to the field as well as students and policy makers needing a quick reference to the research on the interface between trade and the environment
