Meeting,2016-09-15 Broad ranging essays on the social political and cultural significance of more than a century s worth of newspaper publishing practices across the African continent **Silence, Scapegoats, Self-reflection** Volker Roelcke,Sascha Topp,Etienne Lepicard,2015-01-28 Since the end of World War II Nazi medical

atrocities have been a topic of ambivalent reactions and debates both in Germany and internationally. An early period of silence was followed by attempts of victims and representatives of medical organisations to describe what happened. Varying narratives developed, some of which had a stabilizing function for the identity of the profession, whereas others had a critical and destabilizing function. In today's international debates in the field of medical ethics, there are frequent references to Nazi medical atrocities, in particular in the context of discussions about research on human subjects and on euthanasia. The volume analyses the narratives on Nazi medical atrocities, their historicity in different stages of post-war medicine, as well as in the international discourse on biomedical ethics.

The Function of Newspapers in Society Shannon E. Martin, David A. Copeland, 2003-06-30

The demise of the newspaper has long been predicted. Yet newspapers continue to survive globally despite competition from radio, television, and now the Internet, because they serve core social functions in successful cultures. Initial chapters of this book provide an overview of the development of modern newspapers. Subsequent chapters examine particular societies and geographic regions to see what common traits exist among the uses and forms of newspapers and those artifacts that carry the name newspaper but do not meet the commonly accepted definition. The conclusion suggests that newspapers are of such core value to a successful society that a timely and easily accessible news product will succeed despite or perhaps because of changes in reading habits and technology.

Zhou,2012-10-24 Minglang Zhou's highly erudite and well researched volume on the policies concerning writing reforms for China's minorities since 1949 provides an original and well reasoned summary of a complex process. It documents how different script reforms meet dramatically different fates according to local preferences, history, cross border ties and the vitality of previously used scripts. It convincingly shows that no single variable is decisive in the success of a script and that language planners' fixation with technical details is doomed to failure without careful coordination of extra code factors. It also documents the little known Sino Soviet cooperation in the area of writing reforms. In a style accessible to both undergraduate and graduate students, Zhou's book is of interest to language planners, sinologists, applied linguists, writing theorists and ethnologists.
