Reflections Of Eden My Years With The Orangutans Of Borneo:

Reflections of Eden Biruté Marija Filomena Galdikas,1996 Since 1971 Birute Galdikas has lived and worked in the forests of Borneo documenting the lives of the orangutans This text describes her groundbreaking scientific and conservation work that has been recorded in more than a dozen television documentaries

Reflections of Eden Birute M. F. Galdikas,2000-05 The riveting story of Birute Galdikas who has spent much of her life studying orangutans In 1971 at age 25 she began living in the remote jungles of Indonesian Borneo where she encountered menacing poachers blood sucking leeches swarms of insects Galdikas embarked on a quest of more than 25 years to become the foremost chronicler of orangutan life Her first task was to forge a bond of trust but her initial forays into their world were thwarted by territorial orangutans Eventually Galdikas became a surrogate member of their community An exotic adventure a history of vital scientific research the memoir of a remarkable woman

The Mentalities of Gorillas and Orangutans Sue Taylor Parker,Robert W. Mitchell,H. Lyn Miles,1999-08-26 Research on the mental abilities of chimpanzees and bonobos has been widely celebrated and used in reconstructions of human evolution In contrast less attention has been paid to the abilities of gorillas and orangutans This 1999 volume aims to help complete the picture of hominoid cognition by bringing together the work on gorillas and orangutans and setting it in comparative perspective The introductory chapters set the evolutionary context for comparing cognition in gorillas and orangutans to that of chimpanzees bonobos and humans The remaining chapters focus primarily on the kinds and levels of intelligence displayed by orangutans and gorillas compared to other great apes including performances in the classic domains of tool use and tool making imitation self awareness social communication and symbol use All those wanting more information on the mental abilities of these sometimes neglected but important primates will find this book a treasure trove

The Madame Curie Complex Julie Des Jardins,2010-10-06 Why are the fields of science and technology still considered to be predominantly male professions The Madame Curie Complex moves beyond the most common explanations limited access to professional training lack of resources exclusion from social networks of men to give historical context and unexpected revelations about women s contributions to the sciences Exploring the lives of Jane Goodall Rosalind Franklin Rosalyn Yalow Barbara McClintock Rachel Carson and the women of the Manhattan Project Julie Des Jardins considers their personal and professional stories in relation to their male counterparts Albert Einstein Robert Oppenheimer Enrico Fermi to demonstrate how the gendered culture of science molds the methods structure and experience of the work With lively anecdotes and vivid detail The Madame Curie Complex reveals how women scientists have often asked different questions used different methods come up with different explanations for phenomena in the natural world and how they have forever transformed a scientist s role

Storytelling Apes Mary Sanders Pollock,2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the

chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

Encyclopedia of Anthropology H. James Birx, 2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories

Just Another Ape? Helene Guldborg, 2013-11-12 Today the belief that human beings are special is distinctly out of fashion Almost every day we are presented with new revelations about how animals are so much more like us than we ever imagined The argument is at its most powerful when it comes to our closest living relatives the great apes This book argues that whatever first impressions might tell us apes are really not just like us Science has provided strong evidence that the boundaries between us and other species are vast Unless we hold on to the belief in our exceptional abilities we will never be able to envision or build a better future in which case we might as well be monkeys

Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well

telling this story Iain McCalman illuminates much about human animal relations and the tyranny of gender inequality He
reinstates a twentieth century story of a dedicated amateur primatologist and her adopted Vervet monkey On an East African
hunting expedition in 1909 Delia Akeley a forty year old American woman captured a baby female monkey Delia's loneliness
in an isolating patriarchal world and her long frustrated desire to adopt a child had motivated her to nurture the animal She
named the monkey JT Jr and decided to study her interactions with humans The unique relationship between Delia and JT
unlocked Delia's latent talents of research and observation anticipating both Jane Goodall's chimpanzee writings and
Margaret Mead's Samoan ethnographies However Delia's love for JT clashed with her husband Carl's obsession to create a
temple of African wildlife dioramas at the Museum of Natural History in New York Nursing Carl's broken body and realising
their diverging interests pushed Delia into a breakdown in Uganda which led to a savage divorce in Manhattan and the
heartbreaking caging of JT in a Washington zoo Carl's death triggered a long battle between Delia and Carl's widow who
succeeded in obliterating most of Delia's achievements In *Delia Akeley and the Monkey* Iain McCalman uses official records
and personal documents to build a story of passionate love and hate among women men animals and museums that predates
our times but speaks to our present It illuminates much about human animal relations and the tyranny of gender inequality
through reinstating an obscured story of a dedicated amateur primatologist Marriage and Civilization William
Tucker, 2014-02-03 In his stunning new book *Marriage and Civilization* author William Tucker looks at the evidence from
biology evolution anthropology history and culture to come to a remarkable conclusion it was the monogamous pairing of
male and female unusual among mammals that led to human evolution Moreover it is monogamous marriage that has shaped
Western Civilization giving us our sense of justice undergirded Western democracy and is the greatest institution we have for
perpetuating human freedom and happiness Yet marriage is now under threat and perhaps not in ways that people suspect
We could actually see the de facto abolition of marriage with the state taking many of the responsibilities formerly assumed
by the nuclear family Among Tucker's many eye opening observations How primitive polygamy was a retrogression from the
original monogamous structure of the human family Why monogamy was essential to the development of ancient Greek
democracy Why it was the Catholic Church not the Bible or Christianity in general that was the great defender of
monogamous marriage in Western Civilization Why polygamous societies from primitive farming communities to the Mongols
to the Muslim world to the early Mormons are internally violent and have bloody borders Why same sex marriage utterly
irrelevant in evolutionary terms is a distraction from the real marriage debate we should be having The prospects for
monogamous marriage and the dangers if it collapses *Marriage and Civilization* might be the most important provocative and

Rousseau's Rejuvenation of Political Philosophy Nelson Lund, 2016-09-17 This book reads Jean Jacques Rousseau with a view toward deepening our understanding of many political issues alive today including the place of women in society the viability of traditional family structures the role of religion and religious freedom in nations that are becoming ever more secular and the proper conduct of American constitutional government Rousseau has been among the most influential modern philosophers and among the most misunderstood The first great philosophic critic of the Enlightenment he sought to revive political philosophy as it was practiced by Plato and to make it useful in the modern world His understanding of politics rests on deep and often prescient reflections about the nature of the human soul and the relationship between our animal origins and the achievements of civilization This book demonstrates that the implications Rousseau drew from those reflections continue to deserve serious attention

Through the Lens of Anthropology Robert J. Muckle, Laura Tubelle de González, 2018-11-23 Through the Lens of Anthropology is a concise introduction to anthropology that uses the twin themes of food and sustainability to illustrate the connected nature of the discipline's many subfields Beautifully illustrated throughout with over 150 full color images figures feature boxes and maps this is an anthropology book with a fresh perspective a lively narrative and plenty of popular topics The new edition enhances the food and sustainability focus and builds a stronger narrative voice with extended examples and case studies An entirely new section on decolonization more Indigenous content and updated material on biological anthropology make the second edition even more relevant for those interested in learning more about the discipline of anthropology

Primate Behavioral Ecology Karen B.

Strier, 2021-07-29 This comprehensive introductory text integrates evolutionary ecological and demographic perspectives with new results from field studies and contemporary noninvasive molecular and hormonal techniques to understand how different primates behave and the significance of these insights for primate conservation Each chapter is organized around the major research themes in the field with Strier emphasizing the interplay between theory observations and conservation issues Examples are drawn from the classic primate field studies as well as more recent studies including many previously neglected species to illustrate the vast behavioral variation that exists across the primate order Primate Behavioral Ecology 6th Edition integrates the impacts of anthropogenic activities on primate populations including zoonotic disease and climate change and considers the importance of behavioral flexibility for primate conservation This fully updated new edition brings exciting new methods theoretical perspectives and discoveries together to provide an incomparable overview of the field of primate behavioral ecology and its applications to primate conservation It is considered to be a must read for all students interested in primates

Eating Apes Dale Peterson, 2003-05 Eating Apes is an eloquent book about a disturbing secret the looming extinction of the African great apes In bringing the facts of this crisis into a single accessible book Peterson takes

readers one step closer to averting one of the most disturbing threats to our closest relatives 16 photos Maps The Moral Arc Michael Shermer, 2015-01-20 Bestselling author Michael Shermer's exploration of science and morality that demonstrates how the scientific way of thinking has made people and society as a whole more moral From Galileo and Newton to Thomas Hobbes and Martin Luther King Jr thinkers throughout history have consciously employed scientific techniques to better understand the non physical world The Age of Reason and the Enlightenment led theorists to apply scientific reasoning to the non scientific disciplines of politics economics and moral philosophy Instead of relying on the woodcuts of dissected bodies in old medical texts physicians opened bodies themselves to see what was there instead of divining truth through the authority of an ancient holy book or philosophical treatise people began to explore the book of nature for themselves through travel and exploration instead of the supernatural belief in the divine right of kings people employed a natural belief in the right of democracy In The Moral Arc Shermer will explain how abstract reasoning rationality empiricism skepticism scientific ways of thinking have profoundly changed the way we perceive morality and indeed move us ever closer to a more just world
