The Writers Directory, 2013

The Highest Reality | A Treatise On Religion, Truth, Morality and The Purpose of Life Paritosh M. Chakrabarti, 2024-04-23 How does one s upbringing determine one s ethical and religious views Are humans unique in this universe Is God dead as Nietzsche declared Is there any truth beyond scientific facts How different religions relate to one another What are the truth and falsehoods in various religions Are communism and nihilism more in sync with reality than religion How should we prioritise between self interest and sacrifice What should be our individual role to seek global peace Is there a higher purpose in life than just living The author a scientist scholar innovator entrepreneur and philanthropist discusses these questions in a well argued treatise sprinkled with memorable episodes and anecdotes

Geneticamente analfabeti Massimo Piccirilli, 2020-01-09 L Autore con lo stile di chi narra una fiaba davanti al caminetto illustra il mondo sommerso e sorprendente da cui scaturiscono le scelte comportamentali e senza pretendere dal lettore conoscenze specifiche precostituite sull argomento mostra che cambiare la mente cambia il cervello

Religion and Innovation Donald A. Yerxa, 2015-12-17 It is often assumed that religion is the backward looking servant of tradition and the status quo utterly opposed to the new This refrain in so much of recent polemical writing has permeated the public mind and can even be found in academic publications But recent scholarship increasingly shows that this view is a gross simplification that in fact religious beliefs and practices have contributed to significant changes in human affairs political and legal social and artistic scientific and commercial This is certainly not to say that religion is always innovative But the relationship between religion and innovation is much more complex and instructive than is generally assumed Religion and Innovation includes contributions from leading historians archaeologists and social scientists who offer findings about the relationship between religion and innovation The essays collected in this volume range from discussions of the transformative power of religion in early societies to re examinations of our notions of naturalism secularization and progress to explorations of cutting edge contemporary issues Combining scholarly rigor with clear accessible writing Religion and Innovation Antagonists or Partners is essential reading for anyone interested in the history of religion and the ongoing debates about its role in the modern world and into the future

Amoral Thoughts About Morality Howard H. Kendler, 2008 In recent years the social responsibilities of psychology and psychologists have become a source of considerable controversy Amoral Thoughts About Morality seeks to clarify the issues in dispute by

analyzing the relationships between scientific facts and moral principles and the implications of these interactions for psychologists in a democratic society The analysis brings to the surface underlying ethical legal and scientific problems that are too easily ignored While the purpose of this book has not changed with this second edition there are two important additions One is the update Literary Digest: a Repository of Contemporaneous Thought and Research as Presented in the Periodical Literature of the World Edward Jewitt Wheeler, Isaac Kaufman Funk, William Seaver Woods, 1904 Reflections on Space United States Air Force Academy, 1964 Contents The challenge of space exploration Space and its impact on the United States The United States space effort The cost and wisdom of the space race The space effort of the U S S R The military application of space International law and cooperation in outer space Author **The Ethical Dimensions of the Biological and Health Sciences** Ruth Ellen Bulger, Elizabeth Heitman, Stanley Joel Reiser, 2002-06-24 This is the second edition of a highly successful and well received textbook on the responsible conduct of biomedical and health science research It is aimed at faculty and graduate students in health science and biomedical science programs In addition those on National Institute of Health research grants administrators at universities academic health centers and medical and graduate schools will find the book a useful resource The structure of the book remains the same as the first edition Each chapter offers an overview together with important primary documents and case studies concerned with core ethical issues underlying responsible research The major changes from the first edition include new chapters providing overviews of each topic several new published articles added to the readings revised case studies along with an essay on how they can be used as well as further readings and web addresses that will serve as invaluable sources of reference **Beliefs And Values In Science Education** Michael Poole, 1995-06-16 This book examines ways in which beliefs and values interact with science and science teaching It looks at some of the spiritual moral social and cultural contexts within which science has developed and considers how these factors can affect the choice of scientific theory Various historical sections provide resource material for showing pupils the role of the history of science in the study of science Interactions between science and religious belief are also analysed to clarify the nature strengths and limitations of science as well as its place in the total curriculum Publication of this book is particularly timely as contributions to pupils spiritual moral social and cultural development are currently receiving emphasis across the whole curriculum *Tough-Minded Christianity* William A. Dembski, Thomas Schirrmacher, 2009-03-01 Tough Minded Christianity is a collection of essays about the great work of John Warwick Montgomery 1931 a living legend in the field of Christian apologetics who has earned eleven degrees in philosophy theology law and librarianship debated historic atheists including Madalyn Murray O Hair and influenced the work of bestselling authors such as Josh McDowell Contributors to this volume include J I Packer Ravi Zacharias John Ankerberg Erwin Lutzer Vernon Grounds Gary Habermas and among others Paige Patterson who writes in the foreword that John Warwick Montgomery did the intellectual heavy lifting that undergirded the conservative renewal of the Southern Baptist

Convention *Asian Religions, Technology and Science* István Keul, 2015-03-27 Over the past five decades the field of religion and science scholarship has experienced a considerable expansion This volume explores the historical and contemporary perspectives of the relationship between religion technology and science with a focus on South and East Asia These three areas are not seen as monolithic entities but as discursive fields embedded in dynamic processes of cultural exchange and transformation Bridging these arenas of knowledge and practice traditionally seen as distinct and disconnected the book reflects on the ways of exploring the various dimensions of their interconnection Through its various chapters the collection provides an examination of the use of modern scientific concepts in the theologies of new religious organizations and challenges the traditional notions of space by Western scientific conceptions in the 19th century It looks at the synthesis of ritual elements and medical treatment in China and India and at new funeral practices in Japan It discusses the intersections between contemporary Western Buddhism modern technology and global culture and goes on to look at women's rights in contemporary Pakistani media Using case studies grounded in carefully delineated temporal and regional frameworks chapters are grouped in two sections one on religion and science and another on religion and technology Illustrating the manifold perspectives and the potential for further research and discussion this book is an important contribution to the studies of Asian Religion Science and Technology and Religion and Philosophy *The Conservator*, 1890
