Reform Of Bismarckian Pension Systems:

The Reform of Bismarckian Pension Systems Martin Schludi, 2005 Offers an analysis of the political process involved in the reform of the pension systems in European countries *Pension Reform in Europe* Camila Arza, Martin Kohli, 2007-08-07 This new book provides a cross country comparative analysis of the key issues shaping the latest pension reforms in Europe political games welfare models and pathways population reactions and observed and expected outcomes Pension reform has been a top policy priority for European governments in the last decade Ageing populations changing labour market patterns and the process of European integration are the irresistible forces pushing for reform throughout the region The Political Economy of Pension Reform evaluates the political forces that make pension reform viable in different national and institutional contexts and the nature of political bargains actors and cleavages surrounding policy change The volume also examines the nature and outcomes of pension reform experiences in Europe searching for a solution to the financial challenge posed by growing pension budgets By addressing the nature of change the pathways of reform and the outcomes of the new pension mix in the region the authors conclude with an analysis of people's perceptions and attitudes towards pension policy and their acceptance or otherwise of different reform options This book will be of interest to students and scholars of international political economy European politics and social policy **The Reform of Bismarckian Pension Systems**, 2003 **A Long Goodbye to Bismarck?** Bruno Palier, 2010 Bruno Palier is CNRS Researcher at Sciences Po Paris **A History of the German Public Pension System** Alfred C. Mierzejewski, 2016-03-04 A History of the German Public Pension System Continuity amid Change provides the first comprehensive institutional history of the German public pension system from its origins in the late nineteenth century to the major reform period in the early twenty first century Relying on a wide range sources including many used for the first time this study provides a balanced account of how the pension system has coped with major challenges such as Germany's defeat in two world wars inflation the Great Depression the demographic transition political risk reunification and changing gender roles It shows that while the pension system has changed to meet all of these challenges it has retained basic characteristics particularly the tie between work contributions and benefits that fundamentally define its character and have enabled it to survive economic and political turmoil for over a century This book also demonstrates that the most serious challenge faced by the pension system has consistently been political intervention by leaders hoping to use it for purposes unrelated to its mission of providing the insured with secure and adequate retirement income Ageing and Pension Reform Around the World Giuliano Bonoli, Toshimitsu Shinkawa, 2006-01-01 This is an admirable example of a multi authored comparative book The two editors set the scene very carefully in the opening chapter and the subsequent chapters follow the framework set out and use the concepts explored there In this never simple policy area national systems are explained as clearly as possible by each author Michael Hill Journal of Social Policy This is an enlightening introduction to the global dimensions and complexity of pension reform

Recommended J F O Connell Choice Population ageing and the resulting pressures on existing pension systems constitutes one of the most important challenges modern societies will have to face over the coming decades Although governments have responded to such pressures by adopting a plethora of pension reforms the adaptation process is far from over This book comprehensively documents developments in pension policy in eleven advanced industrial countries in Western Europe East Asia and North America In order to explore what population ageing means for the sustainability of pension systems the authors present a detailed review of pension policy making over the past two decades and provide up to date analysis of current pension legislation They examine the factors that can facilitate or impede the adaptation of pension systems and the features that shape and determine reforms They also highlight the fact that although the path of reform taken by each country is somewhat different the processes at work are often very similar Ageing populations throughout the world are extremely reluctant to see their pension systems dismantled and are therefore prepared to mobilise in their defence This process of mobilisation interacts with demographic pressures and institutional constraints to help determine the future direction of pension policy The breadth of geographic coverage provides an almost global picture of the impact of ageing on pension reform at least in terms of high income countries Academics and students with an interest in economics social policy sociology and political science will find this a worthwhile and rewarding volume It will also be of value to policymakers interested in how the problem of unsustainable pension systems can be resolved

Pension Reform and the Development of Pension Systems Emily S. Andrews, 2006 Formal pension systems are an important means of reducing poverty among the aged In recent years however pension reform has become a pressing matter as demographic aging poor administration early retirement and unaffordable benefits have strained pension balances and overall public finances Pension systems have become a source of macroeconomic instability a constraint to economic growth and an ineffective and or inequitable provider of retirement income

Competing for the Exits Takeshi Ito, 2009 This paper analyzes a new trend in recent reforms of Bismarckian pension systems in Europe and Japan It aims at revising the conventional argument that emphasizes the concertation between business and labor and at shedding a new light on the role of party politics in welfare states In advanced democracies the overhaul of pension system is one of the principle agendas of welfare and economic reforms However according to existing researches fundamental reform is rare if any in Bismarckian pension systems because the very characteristics of the system a pay as you go scheme highly occupational segmentation and a high replacement rate create costly financial barriers and generate strong veto players against reform Under such a condition in the era of welfare state retrenchment the only possibility is step by step reform based on the blame avoidance approach to gain consensus from many veto players The result is piecemeal amendments in pension finance and institutions conducted through concertation among key interest groups especially business and labor Recent reforms in several countries France Germany Italy Sweden and Japan however do not fit into this line of argument These countries have recently experienced large scale comprehensive

reforms by unifying fragmented schemes into integrated fully funded schemes Strikingly these reforms were mostly government led and carried out without the consensus among major societal actors The conventional argument on concertation cannot explain this change To explain this development of pension reforms this paper presents a new theoretical framework that focuses on a two dimensional consensus gaining strategies for policymakers Policymakers simultaneously try to obtain support from major interest groups corporatist arena on the one hand and from political parties electoral arena on the other The core of this argument is that policy makers in Bismarckian pension countries need not necessarily compromise with interest groups to fend off their vetoes They can also rely on the support from political parties to overcome their vetoes They count on either of these two types of support or sometimes mix them to implement pension reforms This analysis clearly depicts the changing nature of recent reforms of Bismarckian pension system The similarities and the differences found in case studies in terms of the mix of the two types of consensus building have implications on the literature on varieties of capitalism in these countries It also sheds a new light on the importance party politics plays in institutional reform in a political system with multiple vetoes
