Stimulating Human Services Reform Harold W. Demone, 1978 *Journal of Human Services Abstracts*, 1983 *An Essay on Economic Reforms and Social Change in China* Assar Lindbeck, 2006 Abstract The author applies a systems oriented holistic approach to China's radical economic reforms during the past quarter of a century He characterizes China's economic reforms in terms of a multidimensional classification of economic systems When looking at the economic consequences of China's change of economic system he deals with both the impressive growth performance and its economic costs The author also studies the consequences of the economic reforms for the previous social arrangements in the country which were tied to individual

work units agriculture communes collective firms and state owned enterprises He continues with the social development during the reform period reflecting a complex mix of social advances mainly in terms of poverty reduction and regresses for large population groups in terms of income security and human services such as education and in particular health care Next the author discusses China s future policy options in the social field whereby he draws heavily on relevant experiences in industrial countries over the years The future options are classified into three broad categories policies influencing the level and distribution of factor income income transfers including social insurance and the provision of human services

Douglas Grant,1982-11 In this book the authors try hard not to downgrade the continuum of work related problems The authors stress this continuum by surveying the highlights of recent organizational reform including as reviews must the classics that have inspired reformers This book is in part a primer or a summary recapitulation of today s trends in organizational change theory and experimentation It is also a blueprint and as such contains a prescription or model of planned change The prescription is eclectic It combines elements of what are now the mainline work reform strategies job enrichment quality of work life and action research into a package that we hope is coherent and deployable In this book the authors contend that workers work best and most contentedly that they are most apt to exercise ingenuity and decency and helpfulness when they have a voice in shaping organizational goals and defining their own jobs This ideal condition which the authors call grass roots management is neither utopian nor revolutionary nor hard to create The authors shall outline how organizational democracy can be achieved and how it has to varying degrees been attained The authors shall suggest why the strategy works why in fact it must work In this connection the authors assume that strategies vested in classic management have been tried and found wanting Reasons for the shortfall are many some have to do with changing needs or expectations some with needs we have known but ignored The reason whichever it may be is academic because manifest needs of workers whether they are new or discovered are intense and irreversible If we ignore workers needs we violate human nature And nature as the commercial points out has a way of avenging itself when it is violated Preface
