**Retracking America** John Friedmann,1973 Burlesque has been a powerful and enduring weapon in the critique of legitimate Shakespearean culture by a seemingly illegitimate popular culture This was true most of all in the nineteenth century From Hamlet Travestie 1810 to Rosencrantz and Guildenstern 1891 Shakespeare burlesques were a vibrant yet controversial form of popular performance vibrant because of their exuberant humour controversial because they imperilled Shakespeare s iconic status Richard Schoch in the first study of nineteenth century Shakespeare burlesques explores the paradox that plays which are manifestly not Shakespeare purport to be the most genuinely Shakespearean of all Bringing together archival research rare photographs and illustrations close readings of burlesque scripts and an awareness of theatrical literary and cultural contexts Schoch changes the way we think about Shakespeare s theatrical legacy and nineteenth century popular culture His lively and wide ranging book will appeal to scholars and students of Shakespeare in performance theatre history and Victorian studies Publisher description [Retracking America](#) John Friedmann,1973

*Protected Areas and the Regional Planning Imperative in North America* James Gordon Nelson,Lucy M. Sportza,2003 Based on a workshop on Regional Approaches to Parks and Protected Areas in North America held at Tijuana Mexico March 1999 p xv **Contemporary Movements in Planning Theory** Patsy Healey,2017-03-02 Planning Theory has a history of common debates about ideas and practices and is rooted in a critical concern for the improvement of human and environmental well being particularly as pursued through interventions which seek to shape environmental conditions and place qualities The third and final volume in this series covers Contemporary Movements in Planning Theory and topics include communicative practices and the negotiation of meaning networks institutions and relations and the complexity turn The articles selected represent the most influential and controversial recent work in planning theory and are supplemented by detailed introductions by the editors [The Routledge Handbook of Planning Theory](#) Michael Gunder,Ali Madanipour,Vanessa Watson,2017-08-23 The Routledge Handbook of Planning Theory presents key contemporary themes in planning theory through the views of some of the most innovative thinkers in planning They introduce and explore their own specialized areas of planning theory to conceptualize their contemporary positions and to speculate how these positions are likely to evolve and change as new challenges emerge In a changing and often unpredictable globalized world planning theory is core to understanding how planning and its practices both function and evolve As illustrated in this book planning

and its many roles have changed profoundly over the recent decades so have the theories both critical and explanatory about its practices values and knowledges In the context of these changes and to contribute to the development of planning research this handbook identifies and introduces the cutting edge and the new emerging trajectories of contemporary planning theory The aim is to provide the reader with key insights into not just contemporary planning thought but potential future directions of both planning theory and planning as a whole This book is written for an international readership and includes planning theories that address or have emerged from both the global North and parts of the world beyond

**Ethics in Planning** Martin Wachs, 2017-07-28 Some planners limit discussions of ethics to simple though important questions about the propriety of their daily activities This approach to ethics restricts discussion of professional ethics to the propriety of everyday social and professional relationships It ignores the broader ethical content of planning practice methods and policies While narrow definitions of ethical behavior can easily preoccupy public officials and professional associations they divert attention from more profound moral issues Martin Wachs argues that ethical issues are implicit in nearly all planning decisions For illustrative and educational reasons it is useful to divide ethics in planning into four distinct categories The first category includes the moral implications of bureaucratic practices and rules of behavior regarding clients and supervisors The second category includes ethical judgments which planners make in exercising their administrative discretion More complex and represented by a third category are the moral implications of methods and the ethical content of criteria built into planning techniques and models The final type represents the basic choices which society makes those inherent in the consideration of major policy alternatives Ethics in Planning contains a variety of representative papers to capture the current state of thinking This book will be important as a text for survey classes in professional ethics given by university planning programs It should also supplement short courses in planning ethics for practicing professionals and provide source materials for discussions of planning ethics sponsored by local chapters of the American Planning Association and similar organizations It gathers together exemplary and critical works thus it will also interest individual planners in a field that only continues to grow in recognition and importance *Planning for Human Systems* Jean-Marc

Choukroun, Roberta M. Snow, 2015-10-01 Russell Lincoln Ackoff is a recognized authority in the field of operations research and systems theory This volume is divided into four major sections The first deals with Ackoff's intellectual roots in the American pragmatic tradition The second section demonstrates how systems thinkers have incorporated Ackoff's ideas in their own work The third section shows the influence of Ackoff's thinking on decision making and problem solving while the final section offers a reassessment of current approaches to systems planning on the national level In addition the editors have provided a general introduction as well as introductions to each of the five sections Planning for Human Systems will be of interest to students and scholars of operations research and systems theory Contributors Michel Chevalier C West Churchman Thomas A Cowan Eric Trist Ian I Mitroff Stafford Beer and Ignacy Sachs Evaluating Theory-Practice and
