Teaching Against Global Capitalism and the New Imperialism Peter McLaren, Ramin Farahmandpur, 2005 This book will address a number of urgent themes in education today that include multiculturalism the politics of whiteness the globalization of capital neoliberalism postmodernism imperialism and current debates in Marxist social theory The above themes will be linked to critical educational praxis particularly to teaching activities within urban schools Finally the book will develop the basis for a wider political project directed at resisting and transforming economic exploitation cultural homogenization political repression and gender inequality Recent and widespread scholarly attention has been given to the unabated mercilessness of global capitalism Little opposition exists as capital runs amok unhampered and undisturbed by the tectonic upheaval that is occurring in the geopolitical landscape that has recently witnessed the collapse of the Soviet Union and the regimes of the Eastern Bloc As we examine education policies within the context of economic globalization we attempt to address the extent to which the pedagogy and politics of everyday life has fallen under the sway of what we

identify as cultural and economic imperialism Finally the book raises a number of urgent questions What are the current limitations to educational reform efforts among the educational left What are some of the problems associated with certain developments within postmodern education How can a return to Marxist theory and revolutionary politics revitalize the educational left at a time when capitalism appears to be unstoppable What actions need to be taken in both local and global arenas to overcome the exploitation that the globalization of capital has wreaked upon the world **Worlds of Difference**

Peter Pericles Trifonas,2015-12-22 The varying interests of competing minority groups often part company with regard to how to achieve an equitable community Worlds of Difference rethinks the traditional interpretation of the principle of educational equity in light of this difficulty Theorists and educational practitioners influenced by many disparate schools of thought reflect upon the possibilities of a curriculum of difference in relation to questions of language culture and media at the forefront of global education issues today Collectively the authors argue that education in theory and practice must reawaken an ethical consciousness that affirms the negative values of difference but still recognizes the uniqueness and particularity of each group **Against Global Apartheid**

Patrick Bond,2003 In Against Global Apartheid Patrick Bond reveals the extent of the economic and human damage caused by policies implemented by World Bank and the IMF in developing countries particularly South Africa and argues that there is another way to more socially just economic development **Capitalists and Conquerors**

Peter McLaren,2005-04-07 Capitalists and Conquerors is a series of path breaking essays in the political sociology of education on topics hotly debated within the educational community In this volume Peter McLaren addresses some of the most daunting political challenges of the current times including the globalization of capitalism the United States drive towards world domination strategies tactics and models of resistance to neoliberalism and the ravages of empire building the role of the educator as a social agent and public citizen the purposes and possibilities of public schooling and the struggle for socialism As a Marxist humanist philosopher and social theorist McLaren is able to offer new philosophical premises and socialist principles for building an alternative to capitalism The passion poetry and fierce political conviction for which McLaren is known is very much present in this volume **Unions in**

Crisis? Michael Schiavone,2007-12-30 Unionism in the United States was quite successful during and after World War II especially during the golden years of American capitalism 1947-73 as workers wages increased quite dramatically in a number of industries For example average hourly earnings for workers in meatpacking rose 114% between 1950 and 1965 those in steel 102% in rubber tires by 96% and in manufacturing 81% At the same time as union members wages were increasing union membership was declining Yet the American Federation of Labor Congress of Industrial Organizations AFL CIO argued that organizing new members was not a priority By concentrating on the existing membership and bread and butter issues and not organizing new members unionism could not deal with the attack on the social contract by employers and the government beginning in the United States in the late 1970s However while many people are claiming that organized
