Math Strategies in Action Did you know that meteorologists use weather balloons to collect data? They use the temperature, limidity, and other data in mathematical models to bring you the daily weather forecast. As more data become available—from weather bullooms and satellites, for examplethe models, and therefore the weather reports, become more accurate.

Similarly, in math problems, you can make an initial conjecture. You can test your conjecture. If it is not the right answer, you can use what you learn from your first conjecture to make a better, second conjecture.

flicket Sales. The theater club at school put on a play. For one performance, the club sold 133 tickets and raised \$471. Tickets cost. \$4 for adults and \$3 for students. How many student tickets and how many adult tickets did the club sell?

Read and Understand

Look at the given information to make an informed conjecture.

- How much does each type of ticket cost? adult \$4, student \$9.
- 2. How many tickets did the club sell for the performance?.
- 3. How much money did the club raise from ticket sales for this performance? \$471.
