Nielsen,Nevin L. Zhang,2004-04-07 The refereed proceedings of the 7th European Conference on Symbolic and Quantitative Approaches to Reasoning with Uncertainty ECSQARU 2003 held in Aalborg Denmark in July 2003 The 47 revised full papers presented together with 2 invited survey articles were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections on foundations of uncertainty concepts Bayesian networks algorithms for uncertainty inference learning decision graphs belief functions fuzzy sets possibility theory default reasoning belief revision and inconsistency handling logics and tools      Belief Revision Peter Gärdenfors,2003-12-04 Belief revision is a topic of much interest in theoretical computer science and logic and it forms a central problem in research into artificial intelligence This book contains a collection of research articles on belief revision that are right up to date and an introductory chapter that presents a survey of current research in the area and the fundamentals of the theory      Logic, Action, and Information André Fuhrmann,Hans Rott,1996      KI 2015: Advances in Artificial Intelligence Steffen Hölldobler,Markus Krötzsch,Rafael Peñaloza,Sebastian Rudolph,2015-09-29 This book constitutes the refereed proceedings of the 38th Annual German Conference on Artificial Intelligence KI 2015 held in Dresden Germany in September 2015 The 15 revised full technical papers presented together with 14 technical communications 4 doctoral consortium contributions and 3 keynotes were carefully reviewed and selected from 58 submissions The conference provides the opportunity to present a wider range of results and ideas that are of interest to the KI audience including reports about recent own publications position papers and previews of ongoing work      **The Logic of Theory Change** Andre Fuhrmann,Michael Morreau,1991-01-30 The book presents the results of the joint annual conference of the four Operations Research Societies DGOR GM OR GOR and SVOR held in Vienna in 1990 The main goal was to present practical experiences as well as theoretical results Both aspects are covered in a balanced way Papers cover topics from the fields Optimization Stochastic Models Decision Theory and Multicriteria Decision Making Control Theory Mathematical Economics Game Theory Macroeconomics Econometrics and Statistics Supercomputing and Simulation Non linear Systems Artificial Intelligence and Expert Systems Fuzzy Sets and Systems Production Logistics Inventory and Marketing among others      Revision and Updating in Knowledge Bases ,1994      Advances in Artificial Intelligence - IBERAMIA 2010 Angel Kuri-Morales,Guillermo R.

Simari,2010-10-29 This book constitutes the refereed proceedings of the 12th Ibero American Conference on Artificial Intelligence IBERAMIA 2010 held in Bah a Blanca Argentina in November 2010 The 61 papers presented were carefully reviewed and selected from 148 submissions The papers are organized in topical sections on artificial intelligence in education cognitive modeling and human reasoning constraint satisfaction evolutionary computation information integration and extraction knowledge acquisition and ontologies knowledge representation and reasoning machine learning and data mining multiagent systems natural language processing neural networks planning and scheduling probabilistic reasoning search and semantic web      Machine Learning Ryszard S. Michalski,George Tecuci,1994-02-09 Multistrategy learning is one of the newest and most promising research directions in the development of machine learning systems The objectives of research in this area are to study trade offs between different learning strategies and to develop learning systems that employ multiple types of inference or computational paradigms in a learning process Multistrategy systems offer significant advantages over monostrategy systems They are more flexible in the type of input they can learn from and the type of knowledge they can acquire As a consequence multistrategy systems have the potential to be applicable to a wide range of practical problems This volume is the first book in this fast growing field It contains a selection of contributions by leading researchers specializing in this area See below for earlier volumes in the series      **Logic Programming and**

**Nonmonotonic Reasoning** Michael Gelfond,Nicole Leone,Gerald Pfeifer,2003-06-26 This book constitutes the refereed proceedings of the 5th International Conference on Logic Programming and Nonmonotonic Reasoning LPNMR 99 held in El Paso Texas USA in December 1999 The volume presents 26 contributed papers and four invited talks three appearing as extended abstracts and one as a full paper Topics covered include logic programming non monotonic reasoning knowledge representation semantics complexity expressive power and implementation and applicatons      *Symbolic and Quantitative*

*Approaches to Reasoning with Uncertainty* Salem Benferhat,Philippe Besnard,2003-06-30 This book constitutes the refereed proceedings of the 6th European Conference on Symbolic and Quantitative Approaches to Reasoning with Uncertainty ECSQARU 2001 held in Toulouse France in September 2001 The 68 revised full papers presented together with three invited papers were carefully reviewed and selected from over a hundred submissions The book offers topical sections on decision theory partially observable Markov decision processes decision making coherent probabilities Bayesian networks learning causal networks graphical representation of uncertainty imprecise probabilities belief functions fuzzy sets and rough sets possibility theory merging belief revision and preferences inconsistency handling default logic logic programming etc

**Perspectives of System Informatics** Dines Bjørner,Manfred Broy,Igor V. Pottosin,1996-12-04 This book constitutes the refereed post conference proceedings of the Second International Andrei Ershov Memorial Conference on System Informatics held in Akademgorodok Novosibirsk Russia in June 1996 The 27 revised full papers presented together with 9 invited contributions were thoroughly refereed for inclusion in this volume The book is divided in topical sections on

programming methodology artificial intelligence natural language processing machine learning dataflow and concurrency models parallel programming supercompilation partial evaluation object oriented programming semantics and abstract interpretation programming and graphical interfaces and logic programming     Logics for Emerging Applications of Databases Jan Chomicki,Ron van der Meyden,Gunter Saake,2011-06-28 In this era of heterogeneous and distributed data sources ranging from semistructured documents to knowledge about coordination processes or workflows logic provides a rich set of tools and techniques with which to address the questions of how to represent query and reason about complex data This book provides a state of the art overview of research on the application of logic based methods to information systems covering highly topical and emerging fields XML programming and querying intelligent agents workflow modeling and verification data integration temporal and dynamic information data mining authorization and security It provides both scientists and graduate students with a wealth of material and references for their own research and education     **ECAI 2006** Gerhard Brewka,2006 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there s a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 2006 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS     *Ai '93 - Proceedings Of The 6th Australian Joint Conference On Artificial Intelligence* C Rowles,N Foo,H Liu,1993-09-23 This volume reflects the state of the art in artificial intelligence in the Australasian region It covers machine learning knowledge acquisition cognitive modelling robots and vision natural language automated reasoning knowledge based systems neural networks and genetic algorithms distributed AI etc     *Computational Logic in Multi-Agent Systems* Jürgen Dix,João Leite,2004-12-03 This book constitutes the strictly refereed post proceedings of the 4th International Workshop on Computational Logic for Multi Agent Systems CLIMA IV held in Fort Lauderdale Fl USA in January 2004 The 11 revised full papers presented together with 2 invited papers were carefully selected during two rounds of reviewing and improvement The papers are devoted to techniques from computational logic for representing programming and reasoning about multi agent systems The papers are organized in topical sections on negotiation in MAS planning in MAS knowledge revision and update in MAS and learning in BDI MAS

**Proceedings of the Twelfth National Conference on Artificial Intelligence** American Association for Artificial Intelligence,1994     **Belief Change** Dov M. Gabbay,Philippe Smets,2012-12-06 Belief change is an emerging field of artificial intelligence and information science dedicated to the dynamics of information and the present book provides a state

of the art picture of its formal foundations It deals with the addition deletion and combination of pieces of information and more generally with the revision updating and fusion of knowledge bases The book offers an extensive coverage of and seeks to reconcile two traditions in the kinematics of belief that often ignore each other the symbolic and the numerical often probabilistic approaches Moreover the work encompasses both revision and fusion problems even though these two are also commonly investigated by different communities Finally the book presents the numerical view of belief change beyond the probabilistic framework covering such approaches as possibility theory belief functions and convex gambles The work thus presents a unified view of belief change operators drawing from a widely scattered literature embracing philosophical logic artificial intelligence uncertainty modelling and database systems The material is a clearly organised guide to the literature on the dynamics of epistemic states knowledge bases and uncertain information suitable for scholars and graduate students familiar with applied logic knowledge representation and uncertain reasoning *IJCAI-97 International Joint Conferences on Artificial Intelligence, 1997*
