Ed. by R. Price** R. Price, 1975 *The Revolutions of 1848* Roger Price, 1988-11-11 1848 saw an unprecedented wave of revolutions The social order appeared shaken to its foundations Even those countries like Britain which did not experience revolutions endured severe political crises Yet within months established elites were able to re assert themselves and to take advantage of their entrenched position within bureaucracies and armies This book seeks to analyse the causes of both revolution and reaction It aims to set political events with the context of a Continent undergoing complex processes of transition from essentially pre industrial economic and social structures towards more modern urban industrial systems It considers why after 1848 except in the exceptional circumstances of war governments were better able to prevent the development of revolutionary movements

Intellectual Founders of the Republic Sudhir Hazareesingh, 2001-11-01 This innovative study of French political culture re-examines the origins of modern republicanism through the lives and political thought of five nineteenth century intellectuals Jules Barni Charles Dupont White Emile Littr Eugène Pelletan and Étienne Vacherot By their writings and their political practices at the local national international levels these thinkers made major contributions to the founding of the new republican order in France Drawing on a range of archival and published sources the book sheds new light on classical republican thinking on such key issues as the interpretation of the 1789 Revolution the definition of citizenship the meaning of patriotism the relationship between central government and local democracy the value of individual liberty and the place of education and religion in public and private life These five studies also break new ground in the conceptualization of nineteenth century French intellectual history The writings of these thinkers demonstrate the ideological pluralism and diversity of moderate French republican thought during this period Positivism appears as an important and influential doctrine but its hegemonic aspirations were successfully resisted by the abiding influences of Saint Simonism socialism doctrinaire liberalism and neo-Kantianism It emerges that the ideological potency of republican doctrine lay in its complexity and sophistication as reflected in its capacity to effect a synthesis among these different approaches Through its analysis of the writings and political practices of these five thinkers Intellectual Founders of the Republic offers critical insights into the history of political thought as well as modern French republicanism It underlines both the significance of contextuality in the interpretation of political discourse and the continuing relevance of classical republicanism in making sense of contemporary

moral and political dilemmas *Less than Nations* Giuseppe Motta, 2014-03-25 *Less than Nations* Central Eastern European Minorities after WWI represents the result of research that the author has carried over recent years and was facilitated by the 2008 PRIN project Programmi di Ricerca di Rilevante Interesse Nazionale and the 2010 Sapienza Research funds The book analyses the conditions of national minorities after World War I when the geo political map of Central Eastern Europe was redefined by international diplomacy The new settlements were based on the principle of national self determination and were conditioned by the geographic reality of Central Eastern Europe where states and nations rarely coincided As a consequence the minority question emerged as one of the most troublesome issues during the interwar period and affected international relations and the internal conditions of many states The minority question was discussed by historiography and by international observers and became an integral part of the system which was centred around the League of Nations This work begins with the study of the relationships between the states and their minorities and of the international dimension of this question which animated the fight between revisionist and anti revisionist states The documents of the Italian Army's General Staff and of the League of Nations represent the main historical sources of this book which carries out a complete study of the difficult situation of 1918 1920 when the new states annexed many contested regions within their frontiers and of the numerous controversies concerning the application of international treaties and national regulations in relation to the protection of minorities The second volume of the book analyses some special aspects of this question and focuses on the interpretation of some particular cases which had an outstanding role in the definition of the international framework The massacres of the Armenians in the Ottoman Empire and of the Jews in Eastern Europe for example alarmed the international community and contributed to the 1919 emergency of minority rights The role of Kin States such as Germany and Hungary instead characterized the entire interwar period and conditioned the stability of Europe and the League of Nations Finally special cases like those of Slovakia and Bosnia are also helpful in understanding the ideas of nation and minority and how conceptualisations of the latter have changed throughout the last century **Barricades and Borders** Robert

Gildea, 2003-03-06 This is a comprehensive survey of European history from the coup d'etat of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo which led to the First World War It concentrates on the twin themes of revolution and nationalism which often combined in the early part of the century but which increasingly became rival creeds Going beyond traditional political and diplomatic history the book incorporates the results of recent research on population movements the expansion of markets the accumulation of capital social mobility education changing patterns of leisure religious practices and intellectual and artistic developments The work falls into three chronological sections The first starting in 1800 rather than the more usual 1815 follows the build up of the revolutionary currents which were eventually going to erupt in the Year of Revolutions 1848 The second from 1850 to 1880 deals with the golden age of capitalism the successful culmination of struggles for national unification and the threat of anarchism The concluding chapters look at the

social and political stresses caused by socialism and national minorities at new attempts by government to order society imperial rivalry and the descent into a war which was to mark the end of nineteenth century Europe For this third edition Dr Gildea has substantially revised the text and maps and completely updated the bibliography Newly added introductory sections guide the reader through the wealth of material in each chapter The new edition also includes for the first time a full Chronology of the period a list of leading state ministers and family trees for all the major dynasties *Routledge Library Editions: Political Protest* Various,2022-07-30 This 26 volume set is a wide ranging time and subject spanning examination of the phenomenon of political protest What drives people to take to the streets and how do their governments respond These questions and many more are analysed in areas as varied as sixteenth century German peasant uprisings revolutionary Russians at the Paris Commune women protesting nuclear weapons at Greenham Common and the role Christianity played in protests across the ages An impressive reference resource this set also looks at the policing of protests and official responses to them **Revolutionary Europe** Gavin Murray-Miller,2020-02-06 CHOICE Outstanding Academic Title 2021

Revolutionary Europe is an original examination of radical political movements during Europe s long 19th century It employs both national and transnational contexts incorporating new debates in Atlantic history empire studies and cultural history to give a comprehensive narrative of the period from 1775 to 1922 Rather than assessing revolution as a purely theoretical socially driven force or a structural phenomenon the book presents revolution as a process of community building and cultural identification born from instances of acute social and political crisis Taking into account various moments of political upheaval during the 19th century including the French Russian and 1848 revolutions it explores the ways in which political actors attempted to construct new definitions of sovereignty and social unity in a period characterized by vast social economic and governmental change In a wide ranging text that covers Britain and much of continental Europe in detail as well as reaching out to the Americas and Atlantic and Mediterranean Worlds Gavin Murray Miller provides an authoritative transnational study of revolution in the 19th century age of high nationalism **Popular French Romanticism** James Smith Allen,1981-01-01 Focusing on the Paris book world of this period Allen reveals how the rise of a new popular literature jolly chansonniers the roman feuilletons or serial novels melodramas gothic and sentimental novels dramatic nationalistic histories by such authors as Dumas Sand Lamennais Ancelot Desnoyer and de Kock coincided with remarkable developments in the production distribution and consumption of books Allen s research ranges from a survey of the then popular romantic titles and authors and the trade catalogs of booksellers and lending libraries to the police records of their activities diaries and journals of working people and military conscript records and ministerial literacy statistics The result is a remarkable picture of the exchange between elite and popular culture the interaction between ideas and their material reality and the relationship between the literature and the history of France in the romantic period **Routledge Revivals: French Cities in the Nineteenth Century (1981)** John Merriman,2018-02-01 Originally published in 1981 French Cities in the Nineteenth

Goldstone,2016-12-19 What can the great crises of the past teach us about contemporary revolutions Jack Goldstone shows the important role of population changes youth bulges urbanization elite divisions and fiscal crises in creating major political crises Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns triggered when inflexible political economic and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state elite relations Examining the great revolutions of Europe the English and French Revolutions and the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia but led to different outcomes In this 25th anniversary edition Goldstone reflects on the history of revolutions in the last twenty five years from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State In a new introduction he re examines his pioneering look at the role of population changes such as rising youth cohorts urbanization shifting elite mobility as continuing causal factors of revolutions and rebellions The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East Asia and Africa **France 1814 - 1914** Robert

Tombs,2014-09-25 Here is an incomparably rich portrait of France in the years when the disparate elements that made up the fragmented kingdom of the ancien regime were forged into the modern nation The survey begins with an exploration of national obsessions and attitudes It considers the tendency to revolution and war the preoccupation with the idea of a New Order and the deep strain of national paranoia that was to be intensified by the dramatic debacle of the Franco Prussian War Robert Tombs then investigates the structures of power and in Part Three he turns his attention to social identities from the individual and family to the nation at large When every aspect of the period has been put under the microscope Robert Tombs draws them all into the broad political narrative that brings the book to its rousing conclusion Bursting with life as well as learning this is quite simply a tour de force **A Memoir of Creativity** Piri Halasz,2009 A Memoir of Creativity chronicles one woman s life journey as she derives a theory revealing meaning in abstract painting from varied personal and professional experiences and tells how she locates this theory within a broader social context In 1966 Piri Halasz became the first woman within living memory to write a cover story for Time and not just any cover story either the notorious one on Swinging London With wit and wisdom she provides a glimpse into her red diaper childhood as well as reporting on her climb at Time from research to the writing staff Vividly she describes her controversial career as a female journalist during the

The Red City John M. Merriman, 1985 This imaginative study recaptures 100 years in the life of Limoges France's first socialist city at a time when Limoges rode high on the crest of every wave of social political and industrial change The story of this single city is the story of urban transformation and political radicalism in 19th century France of the struggle between tradition and modernity in French society and politics that took place not only within cities but also between cities and the countryside Here Merriman offers vivid portraits of particular social groups neighborhoods and events in 19th century Limoges to describe and analyze the impact of large scale industrialization the social bases of political conflict and the eventual emergence of a powerful working class The central characters of Merriman's study are the very ordinary denizens of this extraordinary city its butchers porcelain workers laundresses priests through whom one sees the effects of urbanization and industrialization on their quarters work religion culture and political life The close of the 19th century marked the end of one of France's last truly revolutionary situations concludes Merriman as growing centralization dampened revolutionary zeal and the 20th century ushered in a combination of industrial capitalism and a powerful state that was seemingly invulnerable to revolutionary challenges from the working class
