depth fieldwork data and four detailed case studies illuminate the microeconomic foundations of the crisis showing how Indonesian capitalists sought to liquidate their Indonesian assets without losing control of their corporate empires by taking advantage of increased access to foreign loans and complex financial re engineering actions which ultimately precipitated instability and crisis throughout the entire financial system Finally it reflects upon the policy implications of this episode putting forward the case for comprehensive capital controls for open and developing economies until they establish appropriate financial institutions to monitor and manage the level of indebtedness and the volatility of capitalists behaviour
