Roses And The Windows:

The Medieval Rose Windows Armando Rossi, 2025-10-08 The term rose window commonly refers to a circular window on the facades of Romanesque and Gothic churches Originally called oculus it dates back to the 4th 5th century and is found in both religious and secular buildings Thanks to the Cosmati marble masters rose windows became essential in the construction of medieval churches especially in Rome In addition to their decorative function rose windows symbolize beauty and the perfection of Creation recalling the heavens and the mystery of God light uniting both Christian and secular values Light symbol of the Divine Revelation and life penetrates sacred places through small openings urging contemplation Rose windows represent the esoteric nature of things their hidden meaning and their uniqueness that goes beyond a superficial understanding With reference to the Indian mandala which is a symbol of meditation and a circle that encloses the lotus rose windows share its nature as a labyrinth complex paths in continuous evolution between the periphery and the center in harmony with the eternal cycles of the cosmos In an age dominated by technology and speed rose windows represent an anchor of stability and enduring beauty They enchant with their architectural mastery and their ability to stimulate profound insights into spirituality and cosmic harmony As symbols of unity and perfection rose windows invite us to contemplate our relationship with the divine and the universe around us **The Roses & The Windows** Rainer Maria Rilke, 1979

number and geometry The investigation opens with the recurrent symbolism of the dome and the cube as heaven and earth in the Byzantine world and moves to the duality of the temple and the body in the East and West as reflections of Plato's universal macrocosm and human microcosm The study then examines each of the figures of Platonic geometry in the architecture of the West against the background of their mathematics and metaphysics before proceeding to their synthesis with the circle as seen in circular and polygonal structures the divisions of circles in Christian art and their display in window tracery culminating in the rose window In view of the multivalency of the symbolism the investigation establishes systematic occurrences of it which strongly suggest patterns of thought underlying systems of design The book concludes with a series of test cases which show the after life of the same symbolism as it overlapped with the Renaissance
