**Culture and Power** David Swartz, 1997 Pierre Bourdieu is one of the world's most important social theorists and is also one of the great empirical researchers in contemporary sociology However reading Bourdieu can be difficult for those not familiar with the French cultural context and until now a comprehensive introduction to Bourdieu's oeuvre has not been available David Swartz focuses on a central theme in Bourdieu's work the complex relationship between culture and power and explains that sociology for Bourdieu is a mode of political intervention Swartz clarifies Bourdieu's difficult concepts noting where they have been misinterpreted by critics and where they have fallen short in resolving important analytical issues The book also shows how Bourdieu has synthesized his theory of practices and symbolic power from Durkheim Marx and Weber and how his work was influenced by Sartre Levi Strauss and Althusser Culture and Power is the first book to offer both a sympathetic and critical examination of Bourdieu's work and it will be invaluable to social scientists as well as to a broader audience in the humanities

**The Sacred Is the Profane** William Arnal,Russell T. McCutcheon,2013 The Sacred Is the Profane collects nine essays written over several years by William Arnal and Russell T McCutcheon that share a convergent perspective not simply that both the category and concept religion is a construct something that we cannot assume to be natural or universal but also that the ability to think and act religiously is quite specifically a modern political category in its origins and effects the mere by product of the modern state These collected essays substantially rewritten for this volume advance current scholarly debates on secularism debates which the authors argue insufficiently theorize the sacred secular church state and private public binaries by presupposing religion often under the guise of such terms as religiosity faith or spirituality to historically precede the nation state The essays return again and again to the question of what religion word and concept accomplishes now for those who employ it whether at the popular political or scholarly level The focus here for two writers from seemingly different fields is on the efficacy costs and the tactical work carried out by dividing the world between religious and political church and state sacred and profane

historical consciousness **Modernity and Subjectivity** Harvie Ferguson,2000 Few concepts have come to dominate the human sciences as much as modernity yet there is very little agreement over what the term actually means Every aspect of contemporary human reality modern society modern life modern times modern art modern science modern music the modern world has been cited as a part of modernity s distinctive and all embracing presence But what is the exact nature of the reality to which the term modern refers Has not such a promiscuous ill defined concept come to obscure and confuse rather than clarify a genuine understanding of our experience Harvie Ferguson proposes a new view of modernity arguing that although it may variously be associated with the Renaissance the European discovery of the New World the Reformation the Industrial Revolution and many other significant ruptures with primitive or premodern society modernity fails as an idea if it only defines itself against what it replaced Instead he writes modernity finds its clearest definition through an exploration of subjectivity For the modern world there is no higher authority than experience No longer is the human world subordinate to a divine reality beyond the capacity of its own senses This idea finds its greatest expression in the philosophy of doubt originated by Descartes Doubt seemed the radical starting point from which to found a wholly modern philosophy that makes the distinction between subject and object but those who came after Descartes soon reached the limits of self discovery and became trapped in deepening levels of despair This despair in turn found expression in the concepts of self and other and eventually in a dialectic of ego and world which distinguishes and links together the most important social cultural and psychological aspects of modernity Moving beyond these dualities of subject and object mind and body ego and world and replacing them with the triad of body soul and spirit Ferguson redraws the map of contemporary experience finding links

with the premodern world that modernity's self-founding concealed      Louis Dumont and Hierarchical Opposition Robert Parkin, 2009-03 The work of Louis Dumont who died in 1998 on India and modern individualism represented certain theoretical advances on the earlier structuralism of Claude Lévi Strauss. One such advance is Dumont's idea of hierarchical opposition which he proposed as a truer representation of indigenous ideologies than Lévi Strauss's binary opposition. In this book the author argues that although structuralism is often thought to have gone out of fashion, Dumont's greater concern with praxis and agency makes his own version of structuralism more contemporary. The work of his followers and fellow travelers as well as his own indicates that hierarchical opposition is capable of taking structuralism in new and more realistic directions, reminding us that it has never been the preserve of Lévi Strauss alone      **The City at Its Limits** Daniella Gandolfo, 2009-08-01 In 1996, against the backdrop of Alberto Fujimori's increasingly corrupt national politics, an older woman in Lima, Peru, part of a group of women street sweepers protesting the privatization of the city's cleaning services, stripped to the waist in full view of the crowd that surrounded her. Lima had just launched a campaign to revitalize its historic districts, and this shockingly transgressive act was just one of a series of events that challenged the norms of order, cleanliness, and beauty that the renewal effort promoted. *The City at Its Limits* employs a novel and fluid interweaving of essays and field diary entries as Daniella Gandolfo analyzes the ramifications of this act within the city's conflicted history and across its class divisions. She builds on the work of Georges Bataille to explore the relation between taboo and transgression, while Peruvian novelist and anthropologist José María Arguedas's writings inspire her to reflect on her return to her native city in movingly intimate detail. With its multiple perspectives, personal, sociological, historical, and theoretical, *The City at Its Limits* is a pioneering work on the cutting edge of ethnography      **Teaching Durkheim** Terry F. Godlove, 2005 Emile Durkheim's work on religion occupies a central place in religious studies classrooms today. This volume is designed as a resource for teachers, offering practical advice about productive ways to approach central texts and difficult pedagogical issues      **On the Road to Being There**, 2006-08-01 This volume consists of a collection of twelve empirical studies that address theoretical and practical issues relating to pilgrimage and tourism activities in late modernity. As a contribution to the Religion and Social Order series sponsored by the Association for the Sociology of Religion, these studies are particularly directed to assessing both the role of religion in the pilgrimage/tourism nexus and the ways in which religious expressions have changed as a result of the technological and social changes of late modernity that affect human behavior in a more general sense. The chapters address neo-pagan pilgrimage, tours to ancient pagan temples, travels to spiritual healers, the development of historical sites by American religious movements of nineteenth-century origin, labyrinths, pilgrimages that emphasize walking a journey rather than visiting buildings, virtual pilgrimage, the Roman Jubilee of 2000, Kyōto's Gion Festival, and similar topics.
