**Making Sex** Thomas Walter Laqueur, 2018 This is a book about the making and unmaking of sex over the centuries It tells the astonishing story of sex in the West from the ancients to the moderns in a precise account of developments in reproductive anatomy and physiology We cannot fail to recognize the players in Thomas Laqueur's story the human sexual organs and pleasures food blood semen egg sperm but we will be amazed at the plots into which they have been woven by scientists political activists literary figures and theorists of every stripe Laqueur begins with the question of why in the late eighteenth century woman's orgasm came to be regarded as irrelevant to conception and he then proceeds to retrace the dramatic changes in Western views of sexual characteristics over two millennia Along the way two master plots emerge In the one sex story woman is an imperfect version of man and her anatomy and physiology are construed accordingly the vagina is seen as an interior penis the womb as a scrotum the ovaries as testicles The body is thus a representation not the foundation of social gender The second plot tends to dominate post Enlightenment thinking while the one sex model is firmly rooted in classical learning The two sex story says that the body determines gender differences that woman is the opposite of man with incommensurably different organs functions and feelings

Nina Lykke, Linköping University, Gender and women's studies is one of the most challenging fields within the social sciences; the dynamics of gender relations and the social and cultural implications of gender constructions offer a lively forum of debate. The Handbook of Gender and Women's Studies presents a comprehensive and engaging review of the most recent developments within the field, including the study of masculinity, the feminist implications of postmodernism, the cultural turn, and globalization. The authors review current research and offer critical analyses of women's and gender studies in work, the welfare state, family, education, religion, violence, and war, and feminist global politics. Edited by three leading academics from Europe and the United States and with 25 chapters written by scholars based throughout the world, the Handbook situates the most important debates in the field within a uniquely international and interdisciplinary context. The Handbook is a useful introduction to gender theory and an exciting starting point for fresh debates.

*Seeing Nature Through Gender* Virginia Scharff, 2003. Environmental history has traditionally told the story of Man and Nature. Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender. *Seeing Nature through Gender* here reintroduces gender as a meaningful category of analysis for environmental history, showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well. In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world, Virginia Scharff and her coauthors explore interactions between gender and environment in history. Ranging from colonial borderlands to transnational boundaries, from mountaintop to marketplace, they focus on historical representations of humans and nature, on questions about consumption, on environmental politics, and on the complex reciprocal relations among human bodies and changing landscapes. They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies. Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly, often with dire consequences for other people and organisms. Here are considerations of the ways we study sexuality among birds, of William Byrd's masking sexual encounters in his account of an eighteenth-century expedition, of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities. Some are playful, as in a piece on the evolution of snow bunnies to shred bunnies. Others are dead serious, as in a chilling portrait of how endocrine disruptors are reinventing humans, animals, and water systems from the cellular level out. Aiding and adding significantly to the enterprise of environmental history, *Seeing Nature through Gender* bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns.

we've engraved on ourselves and on the planet      *Sex among the Rabble* Clare A. Lyons, 2012-12-01 Placing sexual culture at the center of power relations in Revolutionary era Philadelphia Clare A Lyons uncovers a world where runaway wives challenged their husbands patriarchal rights and where serial and casual sexual relationships were commonplace By reading popular representations of sex against actual behavior Lyons reveals the clash of meanings given to sex and illuminates struggles to recast sexuality in order to eliminate its subversive potential Sexuality became the vehicle for exploring currents of liberty freedom and individualism in the politics of everyday life among groups of early Americans typically excluded from formal systems of governance women African Americans and poor classes of whites Lyons shows that men and women created a vibrant urban pleasure culture including the eroticization of print culture as eighteenth century readers became fascinated with stories of bastardy prostitution seduction and adultery In the post Revolutionary reaction white middle class men asserted their authority Lyons argues by creating a gender system that simultaneously allowed them the liberty of their passions constrained middle class women with virtue and projected licentiousness onto lower class whites and African Americans Lyons's analysis shows how class and racial divisions fostered new constructions of sexuality that served as a foundation for gender This gendering of sexuality in the new nation was integral to reconstituting social hierarchies and subordinating women and African Americans in the wake of the Revolution      **Bodies, Sex and Desire from the**

**Renaissance to the Present** Kate Fisher, Sarah Toulalan, 2015-12-11 An examination of how bodies and sexualities have been constructed categorised represented diagnosed experienced and subverted from the fifteenth to the early twenty first century It draws attention to continuities in thinking about bodies and sex concept may have changed but they nevertheless draw on older ideas and language      **Measuring Manhood** Melissa N. brain and African American students insufficient hereditary background for higher education arguments about a biological basis for human difference have reemerged in the twenty first century Measuring Manhood shows where they got their start Melissa N Stein analyzes how race became the purview of science in nineteenth and early twentieth century America and how it was constructed as a biological phenomenon with far reaching social cultural and political resonances She tells of scientific experts who advised the nation on its most pressing issues and exposes their use of gender and sex differences to conceptualize or buttress their claims about racial difference Stein examines the works of scientists and scholars from medicine biology ethnology and other fields to trace how their conclusions about human difference did no less than to legitimize sociopolitical hierarchy in the United States Covering a wide range of historical actors from Samuel Morton the infamous collector and measurer of skulls in the 1830s to NAACP leader and antilynching activist Walter White in the 1930s this book reveals the role of gender sex and sexuality in the scientific making and unmaking of race      **Body, Gender,**

**Senses** Carin Franzén, Johanna Vernqvist, 2024-03-04 The body touch and its sensations are present sometimes viewed in contradictory ways both expressed visualized and rejected in early modern art and literature In seven essays moving from

the 16th to the mid 18th century and from Italy and Spain to France and Sweden this volume explores strategies used by early modern women poets philosophers and artists in order to create subversive expressions of the body gender and the senses Showing how body and soul the carnal and the divine the senses and the mind could be represented as intertwined and dependent on each other in various ways it gives due attention to European women writers and artists that in unconventional ways responded to the period s two main intellectual and philosophical attitudes Epicurean and Stoic towards the body and its senses These attitudes not only intersect in the period s discussions of virtue and other moral phenomena but are central to critical assessment of the relations between emotions perception and reason By following this topic from a gender perspective the book highlights other forms of subjectivity than the ones usually related to the early modern period s dominating subjectivation of female bodies thinking and desires *Beyond the Reproductive Body* Marjorie Levine-Clark, 2004 Investigates the politics of women s health and work in early Victorian England where government officials and reformers surveying the laboring population became convinced that the female body would be ruined by employment
