One Man's Opinion Neighl Groh, 2008-08 The three most pervading questions asked by a majority of rational people are How did I get here Why am I here What is my destiny The author in his quest for answers to these questions has been induced to offer his discoveries in the writing of this book It is my most sincere wish that perhaps many seeking souls might gain some insight into their search for answers to these all encompassing questions found in their lives especially during these times of much uncertainty that our world seems to have gone mad The author is persuaded that he has found answers for profound questions and solace in his daily search of the Holy Scriptures in addition to the opinions found in the writing of scholars theologians philosophers and scientists Neighl L Groh During the first forty years of my life I lived as a nominal Christian despite the fact that I was impressively taught the importance of Christian living by my parents starting at a very early age My mother commenced teaching my five sisters my brother and me very early in our lives that we must follow love and receive the Lord Jesus and accept Him as our personal Savior In the early 1960 s I met a group of Christ loving men that changed my attitude and I developed an unquenchable thirst for a much broader knowledge of God s plan and purpose for my life Starting at the age of forty and continuing until my present age of eighty five years I have made it a practice to read the Old Testament once and the New Testament twice each year

Jim Keck, 2022-07-18 Don't send your kids off to college without this book especially if they will be engaged in the sciences or philosophy. The Design of Science: Evolution, the Environment, and Redemption will clarify the differences, scientific basis, and logical foundation for the two most dominating and competing worldviews we have adopted in western society nowadays: namely science and religion. After reading this book, you will be able to better understand, articulate, and defend what you believe and why. As a society in general, we need to understand the basis of our morality and culture and how science and religion each have a role to play. Just a few of the types of questions answered are: Is there really competition and conflict between science and religion? What is the technological and philosophical scope of science? How does our worldview affect the development of morality and virtue both individually and collectively? Do we really need to be concerned about global environmental changes? Which type of worldview does the best job of providing answers to the tough questions on origin, purpose, environmental issues, morality, government, and eternity? Is a belief in God and the Bible part of the evolutionary process? Written by a mechanical engineer with more than thirty years of design and R & D experience, *The Design of Science: Evolution, the Environment, and Redemption* lays out in a clear, concise, easy-to-read, and entertaining manner much of the science, logic, and data used by academia and the media to answer life's toughest questions, as compared to the biblical/Judeo-Christian tradition. This book explores how we can measure the truthfulness, accuracy, and scope of these worldviews and how they can affect us personally, spiritually, and culturally. The answers are logically, spiritually, and technically robust, as well as just plain surprising in many ways.

One Man's Beliefs Doctor John, 2014. Doctor John was born in Citronelle, Alabama, in 1931 during the Great Depression. Raised in a Methodist minister's family, his early years instilled a lifelong passion for Christian Methodism. Doctor John initially enrolled at Huntingdon College in Montgomery, Alabama, to become a minister himself, following in the footsteps of his father, but later changed course in education, switching to a major in Paediatrics. After retirement, Doctor John reminisced on his early years and wrote the book *Our Proving Ground: Memories of The Good Old Days*. Shortly after, he began to meditate on God's good earth and the people who gave themselves for others, eventually penning *Fifty Two Weeks with God: God's Creation and Men and Women Who Followed Christ*. Doctor John spent many years reading into religious scriptures and varied histories of other faiths through which he found a balance for his latest work *One Man's Belief: The Theology of Doctor John*.
