Disaster Risk Reduction for Economic Growth and Livelihood Ian Davis, Kae Yanagisawa, Kristalina Georgieva, 2015-05-22 The prevalence of natural disasters in recent years has highlighted the importance of preparing adequately for disasters and dealing efficiently with their consequences This book addresses how countries can enhance their resilience against natural disasters and move towards economic growth and sustainable development Covering a wide range of issues it shows how well thought out measures can be applied to minimize the impacts of disasters in a variety of situations Starting with the need for coping with a rapidly changing global environment the book goes on to demonstrate

ways to strengthen awareness of the effectiveness of preventive measures including in the reconstruction phase The book also covers the roles played by different actors as well as tools and technologies for improved disaster risk reduction It focuses on a variety of case studies from across Asia Africa and Latin America drawing out lessons that can be applied internationally This book will be of great interest to professionals in disaster management including national governments donors communities citizens NGOs and private sector It will also be a highly valuable resource for students and researchers in disaster management and policy development studies and economics

Applications of Space Techniques on the Natural Hazards in the MENA Region Mashael M. Al Saud, 2022-04-29 This book introduces a comprehensive understanding in the use of space techniques in natural hazards and risk management in the MENA Region The book is based on different case studies from 25 MENA countries and will be useful in highlighting the issues from all aspects In recent years the number of natural hazard events has increased in the MENA Region This is exacerbated by the changing climate and extreme climate events as well as a large increase in the population in this area Disastrous events occur on a yearly basis characterized by a vulnerability of physical processes Floods earthquakes and mass movement result in severe damage to property and livelihoods and have devastating effects upon the environment These events cause severe financial losses which on an annual basis can exceed millions of dollars The predication assessment and monitoring approaches remain inadequate in managing these hazards and in mitigating their impacts but with the development of space techniques and geo information systems these situations can now be better managed The miscellany of satellite images with different spatial and temporal resolutions enable the detection of terrain features and provide indications of potential natural risks This book will of interest to stakeholders including field experts academics researchers and decision makers
