The Weakness of Civil Society in Post-Communist Europe Marc Morjé

Howard, 2003-03-27 Over a decade has passed since the collapse of communism yet post communist citizens are still far less likely to join voluntary organizations than people from other countries Why do post communist citizens mistrust public organizations What explains this pattern of weak civil society And what does this mean for democracy in the region This engaging study addresses these questions with a provocative argument about the enduring impact of the communist experience on its countries and citizens Howard argues that the experience of mandatory participation in state controlled organizations and vibrant private networks during the communist period combined with the disappointment with post communist developments have left most citizens with a lasting aversion to public activities Howard analyzes the findings from over 30 democratic countries on the World Values Survey and also presents extensive and original evidence from his own research focused on Eastern Germany and Russia

Poland's Return to Capitalism Gavin Rae,2007-11-28 PLEASE NOTE THIS IS AN NJR AND BLURB SHOULD NOT BE USED IN ITS RAW FORM This book considers the social economic and political consequences of Poland s transition from socialism to capitalism The immense changes that have occurred in the country over the past decade and a half are analysed in their historical and geo political framework Poland was the first Eastern European country to return to capitalism with its shock therapy economic reforms replicated throughout the region These sought to dismantle the socialist elements of the economy as rapidly as possible and open up the post socialist countries to the world capitalist market The former socialist countries were absorbed into the international division of labour and their economies quickly became a part of and dependent upon the global capitalist system The revolutions of 1989 91 not only transformed Eastern Europe but instigated fundamental changes to the international capitalist system itself By opening up the ex socialist economies to international capital a new era of globalisation was opened as the principles and practices of neo liberalism gained ascendancy While a section of society prospered from this opening other social groups saw their living standards decline creating large social inequalities One consequence of these social divisions has been the destabilising of the newly created democratic political systems The growth of more authoritarian conservative political currents in Poland is an example of this As the largest and most strategically important country in Central Eastern Europe Poland has increasingly become a focus of international relations between the major powers Events in Poland especially after European expansion influence relations between the USA the European Union and Russia This book therefore looks both at how the absorption of Poland into the international capitalist system has transformed the country and at how this process is contributing to developments globally It finishes by considering developments since EU Accession and at the expected results of this expansion both within Poland and an enlarged EU

Civil Society Before Democracy Nancy Bermeo,Philip Nord,2000-11-15 Bringing together historians and political scientists this unique collaboration compares nineteenth century civil societies that failed to develop lasting democracies with civil societies that succeeded Much of the current literature on the connection between civil society and

consolidating democracy focuses exclusively on single contemporary polities that are ever changing and uncertain By studying historical cases the authors are able to demonstrate which civil societies developed in tandem with lasting democracies and which did not Contrasting these two sets of cases the book both enlightens readers about individual countries and extracts lessons about the connections between civil society and democracy in contemporary times Above all the authors ask the vital but under researched question OHow and why does democratic civil society develop O Out of and Into Authoritarian Law András Sajó,2002-12-01 The essays in this collection reflect on the promises hopes and fears dominant in the narratives on and realities of doing away with authoritarian regimes The experiences of post communist transition are matched with accounts on authoritarian traits present in established constitutional democracies and on authoritarian inclusions preserved in the new regimes in the post transition phase The essays combine first hand insider accounts with interdisciplinary scholarly analysis The first part of the collection focuses on considerations marking the way out of authoritarian not restricted to socialist regimes The second part centers around experiences and problems which surface following the days of totalitarianism both in newly emerged democracies and in well established constitutional systems Issues covered range from police practices to the role of the people in post authoritarian regimes The dilemma transparent in all essays is whether coming out of authoritarianism is possible at all **Associations and the Chinese State: Contested Spaces** Jonathan Unger,2014-12-18 What role do Chinese popular associations play in the expansion of civil society and democratization Under Mao few associations were permitted to exist while today over 200 000 associations are officially recognized Are they important foundations of civil society or vehicles for state corporatism and control In this book leading China specialists examine an interesting range of associations from business associations to trade unions to urban homeowners associations women s groups against domestic violence and rural NGOs that develop anti poverty programs The contributors find different important trends underway in different parts of China s economy and society Their findings are nuanced insightful and often not what might be expected **The East European Economy in Context** David Turnock,2003-09-02 Since 1989 the former communist countries of Eastern Europe have witnessed a profound and dramatic upheaval The economic coherence of this region formerly maintained through the adoption of the Soviet system of government has fractured In *The East European Economy in Context* Communism and Transition David Turnock examines the transition from communist to free market economies both within and between the states of Eastern Europe As well as containing an informative survey of the impact of communism *The East European Economy in Context* provides Political profiles of individual countries A clear study of the contrasts between northern and balkan groups Summaries of regional variations in the transition process An exploration of the new state structures and resources Discussion of political stability inter ethnic tensions and progress in economic change *An Idiosyncratic Ethics* George David Miller,1994 This book is an original synthesis of four elements 1 the phenomenology of value 2 caring 3 the moral imagination and 4 Kant s formula of

humanity The striking result is an ethics of caring that develops our shared humanity The probing analysis and pungent argument are assisted by imaginative forms of dialogue narration and parable This lively contribution to our ethical fulfillment concludes with a case for student centered education that is democratic creative and caring German Reflections Joseph Theodoor Leerssen,1994
