Unobtrusive Evaluation of Reference Service and Individual Responsibility Juris Dilevko, 2000-09-30 Many reference librarians have been highly critical about unobtrusive evaluation studies But can their opposition be justified Or is it just a way to detract attention from serious shortcomings in reference service How can government documents reference service and reference service in general be improved Do librarians have enough general and subject specific knowledge to provide informed and intelligent answers to reference questions Would any business or non profit organization be satisfied with the traditional 55 percent efficacy rate in reference service revealed by unobtrusive evaluation studies Long a controversial topic in the specialized world of reference librarianship unobtrusive evaluation is nevertheless a useful tool in gauging the degree to which reference librarians are effectively performing their jobs Based on a nationwide study of government documents reference service in Canada this book examines the broad philosophical implications of negative attitudes to unobtrusive evaluation studies within libraries It also discusses what really happens when librarians make referrals to external sources Drawing on the insights of such library educators as Margaret Hutchins S R Ranganathan and James Wyer it also suggests overlooked ways that may help reference librarians deliver better reference service Finally it argues that such proposals as certification and recertification of reference librarians need to be seriously considered if librarians do not willingly take personal responsibility for improving their own knowledge levels

The Elements of Inquiry Peter J. Burke, Sara Jimenez Soffa, 2018-03-23 The Elements of Inquiry covers the basic guidelines for graduate students doing an investigation or inquiry project It distils the rubrics necessary for teaching research methods and completing research projects and gives the student researcher a list of steps to follow to complete any type of inquiry project including formal research projects such as doctoral dissertations It was written to support the work of students in an educational leadership doctoral program but it will also assist the research efforts of college students at any level in any discipline The book begins by establishing the underlying philosophical concepts upon which all good research is based preparing students to get down to the nuts and bolts of conducting their own research and evaluating the research of others Fundamental concepts and rules of research are explained both for producers and consumers of social science and educational research Numerous practical examples illustrate the steps in the research process presented in the text There are end of chapter exercises for students to apply the concepts discussed in the chapter Templates for organizing and presenting research provide students with a game plan for success with their research The book ends with an up to date annotated bibliography of beginning and advanced research texts allowing students easy access to books that detail the more

specialized research topics While most research books detail one or more method in depth this text provides a broad introduction to many techniques and models used in doctoral dissertations and will be of particular value to those who are consumers of inquiry studies and research reports Key to the overview provided is the annotated bibliography that leads the reader to the next stage of understanding or doing research **Elements of Inquiry** Peter J Burke,2016-09-15
