hundred years after Confucius his ideas reasserted themselves in the formulation of a sophisticated program of personal self cultivation Neo Confucians argued that humans are endowed with empathy and goodness at birth an assumption now confirmed by evolutionary biologists By following the Great Learning eight steps in the process of personal development Neo Confucians showed how this innate endowment could provide the foundation for living morally Neo Confucian students did not follow a single manual elaborating each step of the Great Learning instead they were exposed to age appropriate texts commentaries and anthologies of Neo Confucian thinkers which gradually made clear the sequential process of personal development and its connection to social order Neo Confucian Self Cultivation opens up in accessible prose the content of the eight step process for today s reader as it examines the source of mainstream Neo Confucian self cultivation and its major crosscurrents from 1000 to 1900      *Emerson and Neo-Confucianism* Y. **Sainthood** Richard Kieckhefer,George D. Bond,1990-08-09 Every major religion exalts certain individuals who occupy a dual role On the one hand they serve as exemplars of virtue to be imitated and on the other

hand they stand removed from other mortals privileged and unique Christianity knows them as saints and in the study of religion the term has been taken over and applied to similar figures in other traditions The essays in this volume analyze the role of the saint in Judaism Christianity Islam Hinduism Buddhism and Confucianism providing both a comparative and an interpretive view of sainthood The notion of sainthood is problematic in two ways First can the category be usefully applied to individuals in religious traditions other than Christianity How has it manifested itself and what differences are there in the various manifestations of sainthood Second where individuals are considered to have risen above the norms in these different traditions how is it possible to resolve the tension between the saint's imitability and his or her otherness between imitating and venerating the saint The authors consider these questions in relation to a wide range of individuals in all the major traditions

**Sacred Nature** Karen Armstrong, 2023-09-05 From one of the most original thinkers on the role of religion in the modern world a profound exploration of the spiritual power of nature and an urgent call to reclaim that power in everyday life Much has been written on the scientific and technological aspects of climate change But Armstrong's book is both more personal and more profound Its urgent message is that hearts and minds need to change if we are to once more learn to revere our beautiful and fragile planet The Guardian Since the beginning of time humankind has looked upon nature and seen the divine In the writings of the great thinkers across religions the natural world inspires everything from fear to awe to tranquil contemplation God or however one defined the sublime was present in everything Yet today even as we admire a tree or take in a striking landscape we rarely see nature as sacred In this short but deeply powerful book the best selling historian of religion Karen Armstrong re-sacralizes nature for modern times Drawing on her vast knowledge of the world's religious traditions she

vividly describes nature's central place in spirituality across the centuries. In bringing this age-old wisdom to life, Armstrong shows modern readers how to rediscover nature's potency and form a connection to something greater than ourselves.

**18th Century Japan** C. Andrew Gerstle, 2012-10-02 The period of Japanese history before the advent of industrialisation and modernism is of tremendous interest. Interrelatedness in Chinese Religious Traditions Diana Arghirescu, 2022-11-17 The study of religions is essential for understanding other cultures, building a sense of belonging in a multicultural world, and fostering a global intercultural dialogue. Exploring Chinese religions as one interlocutor in this dialogue, Diana Arghirescu engages with Song dynasty Confucian and Buddhist theoretical developments through a detailed study of the original texts of the Chan scholar monk Qisong (1007-1072) and the Neo-Confucian master Zhu Xi (1130-1200). Starting with these figures, she builds an interpretive theory focusing on ethical interrelatedness and proposes it as a theoretical tool for the study of the Chinese religious traditions. By actively engaging with other contemporary theories of religion and refusing to approach Chinese religions with Western frameworks, Arghirescu's comparative perspective makes it possible to uncover differences between the various Western and Chinese cultural presuppositions upon which these theories are built. As such, this book breaks new ground in the methodology of religious studies, comparative philosophy, and furthers our understanding of the Confucian-Buddhist interaction.
