Refugees And Forced Displacement:

The Urbanization of Forced Displacement Neil James Wilson Crawford, 2022-01-31 Displacement in the twenty first century is urbanized The United Nations Refugee Agency UNHCR the world s largest humanitarian organization and the main body charged with assisting displaced people globally estimates that over 60 per cent of refugees now live in urban areas a proportion that only increases in the case of internally displaced people and asylum seekers Though cities and local authorities have become essential participants in the protection of refugees only three decades ago they were considered to sit firmly beyond UNHCR s remit with urban refugees typically characterized as aberrations In The Urbanization of Forced Displacement Neil James Wilson Crawford examines the organization s response to the growing number of refugees migrating to urban areas Introducing a broader study of policy making in international organizations Crawford addresses how and why UNHCR changed its policy and practice in response to shifting trends in displacement Citing over 400 primary UN documents Crawford provides an in depth study of the internal and external pressures faced by UNHCR pressures from above below and within that explain why it has radically transformed its position from the 1990s onward UNHCR and global refugee policies have come to play an increasingly important role in the governance of global displacement The Urbanization of Forced Displacement sheds new light on how the organization works and how it conceives its role in global politics today

Refugees and Forced Displacement Edward Newman, Joanne van Selm, 2003 The orthodox definition of international security put human displacement and refugees at the periphery In contrast this book demonstrates that human displacement can be both a cause and a consequence of conflict within and among societies As such the management of refugee movements and the protection of displaced people should be a part of security policy Demography of Refugee and Forced Migration Graeme Hugo, Mohammad Jalal Abbasi-Shavazi, Ellen Percy Kraly, 2017-12-19 This authoritative and comprehensive edited volume presents current research on how demography can contribute to generating scientific knowledge and evidence concerning refugees and forced migration developing evidence based policy recommendations on protection for forced migrants and reception of refugees and revealing the determinants and consequences of migration for origin and destination regions and communities Refugee and other forced migrations have increased substantially in scale complexity and diversity in recent decades These changes challenge traditional approaches in response to refugee and other forced migration situations and protection of refugees Demography has an important contribution to make in this analytic space While other disciplines especially anthropology law geography political science and international relations have made major contributions to refugee and forced migration studies demography has been less present with most research focusing on issues of refugee mortality and morbidity This book specifies the range of topics for which a demographic approach is highly appropriate and identifies findings of demographic research which can contribute to ever more effective policy making in this important arena of human welfare and international policy Forcibly Displaced World Bank, 2017-07-14 The Syrian refugee crisis has

galvanized attention to one of the world's foremost challenges forced displacement. The total number of refugees and internally displaced persons now at over 65 million continues to grow as violent conflict spikes. This report, *Forcibly Displaced Toward a Development Approach: Supporting Refugees, the Internally Displaced and Their Hosts*, produced in close partnership with the United Nations High Commissioner for Refugees (UNHCR), attempts to sort fact from fiction to better understand the scope of the challenge and encourage new thinking from a socioeconomic perspective. The report depicts the reality of forced displacement as a developing world crisis with implications for sustainable growth: 95 percent of the displaced live in developing countries and over half are in displacement for more than four years. To help the displaced, the report suggests ways to rebuild their lives with dignity through development support focusing on their vulnerabilities such as loss of assets and lack of legal rights and opportunities. It also examines how to help host communities that need to manage the sudden arrival of large numbers of displaced people and that are under pressure to expand services, create jobs and address long-standing development issues. Critical to this response is collective action. As work on a new Global Compact on Responsibility Sharing for Refugees progresses, the report underscores the importance of humanitarian and development communities working together in complementary ways to support countries throughout the crisis from strengthening resilience and preparedness at the onset to creating lasting solutions.

Refugees, Forced Migrants, and Human Tragedies Fonkem Achankeng, 2023-12-06. *Refugees, Forced Migrants and Human Tragedies: An Interdisciplinary Critical Perspective* focuses on a sustained analysis of the nature of forced displacement with an emphasis on the attendant human tragedies that come with the forced displacement of people. It explores the connections in refugee, migrant and IDPs themes with a goal to sketching out some ways of thinking about refugees, migrants and IDPs through the different chapters. The collection aims to answer the following questions: What discourses are created around refugees, asylum seekers and internally displaced persons? IDPs from different parts of the world? What is the relationship between those discourses and foreign policies and national politics in the North and South? With chapters from scholars and policy makers from different parts of the world experiencing the refugee and forced migration crises, this book will enhance the perceptions we have on these populations and help to make the policies that govern them.

Refugees and the Ethics of Forced Displacement Serena Parekh,2016-11-25 This book is a philosophical analysis of the ethical treatment of refugees and stateless people a group of people who though extremely important politically have been greatly under theorized philosophically The limited philosophical discussion of refugees by philosophers focuses narrowly on the question of whether or not we as members of Western states have moral obligations to admit refugees into our countries This book reframes this debate and shows why it is important to think ethically about people who will never be resettled and who live for prolonged periods outside of all political communities Parekh shows why philosophers ought to be concerned with ethical norms that will help stateless people mitigate the harms of statelessness even while they remain formally excluded from states The Open Access version of this book available at <https://doi.org/10.4324/9781315883854>
