Brown, 2012-12-13 The year 2011 brings us the sesquicentennial celebration of the American Civil War Surprisingly 150 years later students continue to find themselves asking many of the same questions about the great national tragedy faced during the centennial in 1961 For example did slavery cause the great conflict or did constitutional questions act as the catalyst Does the Battle of Gettysburg represent the turning point of the War or did that occur elsewhere In connection with the last question Lost Cause advocates those great pro Confederacy propagandists found convenient villains to blame for the Southern defeat One of these Confederate General John Bell Hood plays an important role This paper contends that in his case the Lost Cause is wrong and that Hoods historical treatment has been false Standard critical treatment of John Bell Hood over the years has tended to characterize the general as rash overaggressive and lacking in strategic imagination For such critical historians Hood appears as old fashioned and someone limited logistically to the frontal assault These accounts mainly stress his negative aspects as a soldier and tend to center around the Battle of Franklin This thesis by analyzing every battle that Hood commanded as a leader of the Army of Tennessee particularly those fought around Atlanta reveals him to have been a far more bold imaginative and complex leader than has previously been portrayed

in North America twelve million acres of western Colorado Brandi Denison takes a broad look at the Ute land dispossession and resistance to disenfranchisement by tracing the shifting cultural meaning of dirt a physical thing into land an abstract idea This shift was made possible through the development and deployment of an idealized American religion based on Enlightenment ideals of individualism Victorian sensibilities about the female body and an emerging respect for diversity and commitment to religious pluralism that was wholly dependent on a separation of economics from religion As the narrative unfolds Denison shows how Utes and their Anglo American allies worked together to systematize a religion out of existing ceremonial practices anthropological observations and Euro American ideals of nature A variety of societies then used religious beliefs and practices to give meaning to the land which in turn shaped inhabitants perception of an exclusive American religion Ultimately this movement from the tangible to the abstract demonstrates the development of a normative American religion one that excludes minorities even as they are the source of the idealized expression **Extracting**
