Back from the Deep Doug Horner,2024-03-12 The dramatic story of an unlikely search and recovery duo who help law enforcement and grieving families with their uncanny knack for locating bodies underwater A powerful debut for fans of deeply reported stories that follow real people with obsessional passions and of authors like Tracy Kidder Sebastian Junger and Patrick Radden Keefe When the police and FBI exhaust their abilities and options and when grieving families run out of resources their last best hope has been an Idaho couple who have spent their retirement years pursuing lost causes and have located 130 victims from lakes and rivers across the United States and Canada Gene and Sandy Ralston a married Idaho couple in their mid 70s are self taught underwater search and recovery specialists who volunteer their time and equipment And yet the Ralstons are counted among the best in the world The Ralstons have an uncanny knack for finding bodies in deep water and can regularly find a missing person within hours sometimes even minutes of launching their boat Law enforcement and emergency response agencies seek out their peculiar expertise but when the Ralstons home phone rings it s usually a family member of a missing person Someone reaching out after the local police and volunteer groups have called off the official search Someone who heard from a friend of a friend about a couple from Idaho who will travel thousands of miles at the drop of a hat charging only their travel costs to help complete strangers

Congress. House. Committee on Public Works. Subcommittee on Water Resources, 1973 Complex Contracting Trevor L. Brown, Matthew Potoski, David M. Van Slyke, 2013-08-08 Complex Contracting draws on core social science concepts to provide wide ranging practical advice on how best to manage complex acquisitions Using a strong analytical framework the authors assess contract management practices suggesting strategies for improvement and ways to avoid the pitfalls of managing contracts for large and sophisticated projects An in depth analysis of the US Coast Guard s Deepwater program is included to illustrate ways to respond to real world contracting challenges This high profile and controversial case consisted of a projected 25 year 24 billion contract through which the US Coast Guard would buy a system of new boats aircraft communications and control architecture to replace its aging fleet The authors explore the reasons why this program launched with such promise turned out so poorly and apply the lessons learned to similarly complex contracting scenarios This engaging and accessible book has broad applicability and will appeal to policymakers practitioners scholars and students Return to Deepwater Lucy Gillen, 1975 **UK deepwater drilling - implications of the Gulf of Mexico oil spill** Great Britain: Parliament: House of Commons: Energy and Climate Change Committee, 2011-01-06 On 20 April 2010 a blowout of BP s Macondo well in the Gulf of Mexico led to the deaths of 11 workers on Transocean s Deepwater Horizon drilling rig and the release of an estimated 4.9 million barrels of oil The European Commission called for a moratorium but the UK government decided its regulatory controls were fit for purpose However a full review of the oil and gas environmental regulatory regime would be undertaken The Committee believes that the UK has high regulatory standards as exemplified by the Safety Case regime that was set up in response to the 1988 Piper Alpha tragedy in 1988 The blowout in the Gulf of Mexico could have been prevented if the last line of defence the blind shear ram on the blowout preventer had activated and crushed the drill pipe Given the importance of this equipment the committee recommends prescribing specifically that blowout preventers should have two blind shear rams and that simple potential failures mustn t be left unchecked The Committee also recommends that the Bly report conclusions BP s internal investigation be considered alongside observations of other companies involved They believe that should an oil spill resulting from drilling activities occur in the UK there needs to be an absolute clarity as to the identity of the responsible party and that liability legislation needs to ensure prompt compensation They conclude that any calls for increased oversight of the UK offshore industry should be rejected in favour of multilateral approaches to regulation and oil spill response Appendix A, Coastal engineering. Taft,2017-10-06 Why have democratic governments failed to take serious steps to reduce carbon emissions despite dire warnings and compelling evidence of the profound and growing threat posed by global warming Most of the writing on global warming is by scientists academics environmentalists and journalists Kevin Taft a former leader of the opposition in Alberta brings a fresh perspective through the insight he gained as an elected politician who had an insider s eyewitness view of the role of the oil industry His answer in brief The oil industry has captured key democratic institutions in both Alberta and Ottawa Taft begins his book with a perceptive observer s account of a recent court case in Ottawa which laid bare the tactics and techniques of the industry its insiders and lobbyists He casts dramatic new light on exactly how corporate lobbyists politicians bureaucrats universities and other organizations are working together to pursue the oil industry s agenda He offers a brisk tour of the recent work of scholars who have developed the concepts of the deep state and institutional capture to understand how one rich industry can override the public interest Taft views global warming and weakened democracy as two symptoms of the same problem the loss of democratic institutions to corporate influence and control He sees citizen engagement and direct action by the public as the only response that can unravel big oil s deep state **Deepwater**
