**Discovering Computer Science** Jessen Havill, 2016-07-06 Discovering Computer Science Interdisciplinary Problems Principles and Python Programming introduces computational problem solving as a vehicle of discovery in a wide variety of

disciplines With a principles oriented introduction to computational thinking the text provides a broader and deeper introduction to computer science than typical introductory programming books Organized around interdisciplinary problem domains rather than programming language features each chapter guides students through increasingly sophisticated algorithmic and programming techniques The author uses a spiral approach to introduce Python language features in increasingly complex contexts as the book progresses The text places programming in the context of fundamental computer science principles such as abstraction efficiency and algorithmic techniques and offers overviews of fundamental topics that are traditionally put off until later courses The book includes thirty well developed independent projects that encourage students to explore questions across disciplinary boundaries Each is motivated by a problem that students can investigate by developing algorithms and implementing them as Python programs The book s accompanying website <http://discoverCS.denison.edu> includes sample code and data files pointers for further exploration errata and links to Python language references Containing over 600 homework exercises and over 300 integrated reflection questions this textbook is appropriate for a first computer science course for computer science majors an introductory scientific computing course or at a slower pace any introductory computer science course
