**Fisheries Centre Research Reports ,2006      *OECD Environmental Performance Reviews: Brazil 2015***

OECD,2015-11-04 This report is the first OECD review of Brazil s environmental performance It evaluates progress towards sustainable development and green growth with a focus on conservation and sustainable use of biodiversity and protected areas Saving Global Fisheries J. Samuel Barkin,Elizabeth R. Desombre,2013-01-18 A proposal for a new global approach for fisheries focused on reducing fishing capacity and providing incentives for long term sustainability The Earth s oceans are overfished despite more than fifty years of cooperation among the world s fishing nations There are too many boats chasing too few fish In *Saving Global Fisheries* J Samuel Barkin and Elizabeth DeSombre analyze the problem of overfishing and offer a provocative proposal for a global regulatory and policy approach Existing patterns of international fisheries management

try to limit the number of fish that can be caught while governments simultaneously subsidize increased fishing capacity focusing on fisheries as an industry to be developed rather than on fish as a resource to be conserved Regionally based international management means that protection in one area simply shifts fishing efforts to other species or regions Barkin and DeSombre argue that global rather than regional regulation is necessary for successful fisheries management and emphasize the need to reduce subsidies They propose an international system of individual transferable quotas that would give holders of permits an interest in the long term health of fish stocks and help create a sustainable level of fishing capacity globally
