Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues

that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate. This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics. Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers, the quality of careers advice in schools and the importance of practical science in schools. **The British National**

Bibliography Arthur James Wells, 2009 **The School Science Review**, 2006 *Science* Vanessa Kind, Keith Taber, 2005

This is a text for new teachers of science in the years of their early professional development including those on PGCE courses, those in their induction year and those in years two and three of their teaching career. **Who Cares About**

Education? Eric Macfarlane, 2016-11-30 We all have opinions on education but how far do we understand the powerful forces that shape the learning experiences of our children and young people? Eric Macfarlane takes a critical look at the traditions, government policies and individual ideologies that currently determine priorities in our schools, colleges and universities. His disturbing conclusion is that we are fast losing sight of the basic principles that underpin effective learning and teaching. *Who Cares About Education* is a call for concerted action from all who share an interest in young people and the way in which we prepare them for adulthood. This wise book will speak to a wide range of audiences and prove an important resource for a generation of teachers, parents and young people who sense that something has gone very wrong in today's system. Melissa Benn: Eric Macfarlane has a real gut feeling for what education should be about. At a time when discussion is mainly about exam results and giving schools new titles, he provides a forceful reminder of what really matters in educating our young people. Chris Green: MBE. Education remains political dynamite with teaching professionalism and autonomy constantly undermined and school leaders flung aside like football managers in a bad season. That's why we need books like Eric Macfarlane's restoring perspective, channelling rage, providing historical context and voicing solutions. It's a book for all who care about real education. Geoff Barton: Eric Macfarlane shares his passion for a broad and balanced curriculum and emphasises the enormous benefits of the arts as a serious part of every child's education and well-being. His book will empower us to ensure accessibility to the arts for future generations. Dame Evelyn Glennie: Eric Macfarlane has taught in and been head of both secondary modern and grammar schools. He was the founding principal of Queen Mary's College, one of Hampshire's pioneering 16 comprehensive colleges and has been an LEA adviser, examiner and assessor of several different initiatives to improve the learning and teaching processes in both schools and universities. Whilst Principal of Queen Mary's College, he was seconded to Keble College for a year to assist with the Oxford Department of Education's introduction of a school-based teacher training course. He worked at the University of Surrey and Birkbeck College promoting the Enterprise in Higher Education initiative before becoming academic staff adviser in University College London. Eric has

had a long association with out of school learning initiatives and was chair of the Governing Council of the Active Training and Education Trust He received the OBE in the Queen s Birthday Honours List in 1988 *Parliamentary Debates (Hansard)*.
