 religion Religion and ethics Developments in Christian thought     Scepticism, Relativism, and Religious Knowledge Michael  
 G Harvey, 2014-09-25 Scepticism Relativism and Religious Knowledge shows where responses to scepticism and relativism by  
 Karl Barth and Reformed epistemology have led to impasses and reconstructs their insights in a robust response that does  
 not depend on making excessive claims about our epistemic capacities This response is based on a nuanced conception of the  
 relationship between trust doubt faith and reason and a Kierkegaardian perspective on religious knowledge that stresses the  
 role of the will and the intellectual and theological virtues This book will appeal to those with an interest in the deep and  
 often difficult questions of religion and philosophy particularly regarding matters of truth doubt and belief     **In Search of**  
**Origins** Garry Trompf, 2005-01-01 Religion is an integral part of our life The answer to the question what is religion is  
 subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair  
 appreciation of the term s connotations Considering students and scholars alike are lacking an introductory textbook on the  
 origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of  
 ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological  
 record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will  
 locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced  
 many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic  
 discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to  
 ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be  
 historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help  
 students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth  
 Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at  
 religions from as many different angles as possible the psychological anthropological sociological geographical ecological  
 political economic and the like with some awareness of current theological debates as well This book gives scope to the  
 comparative method and all the great religions are treated side by side with points of comparison and contrast drawn This  
 book begin with the large question of the origins and prehistory of religion including the bearing anthropological study has

on this question before giving space to the larger traditions themselves The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms This book has been designed to help students find for themselves possible answers to existential or theological questions but only as a side effect to historical and phenomenological study and as the author says provide no such answers on a platter *Review of Religious Research* ,1982

**Paradox in Christian Theology** James Anderson,2007-03-06 Does traditional Christianity involve paradoxical doctrines that is doctrines that present the appearance at least of logical inconsistency If so what is the nature of these paradoxes and why do they arise What is the relationship between paradox and mystery in theological theorizing And what are the implications for the rationality or otherwise of orthodox Christian beliefs In *Paradox in Christian Theology* James Anderson argues that the doctrines of the Trinity and the incarnation as derived from Scripture and formulated in the ecumenical creeds are indeed paradoxical But this conclusion he contends need not imply that Christians who believe these doctrines are irrational in doing so In support of this claim Anderson develops and defends a model of understanding paradoxical Christian doctrines according to which the presence of such doctrines is unsurprising and adherence to paradoxical doctrines cannot be considered as a serious intellectual obstacle to belief in Christianity The case presented in this book has significant implications for the practice of systematic theology biblical exegesis and Christian apologetics **Political Theology in the Canadian Context** Benjamin G. Smillie,2006-01-01 This collection focusses on the proposition that theology is at its best when it is political and politics is saved from a secular ideology when it listens to a theological critique The editor draws parallels between the Canaanite period of Israelite history and the Liberal Possessive Individualism that he sees dominating Canadian ideology Following William Hordern s essay defining political theology economist Abraham Rotstein examines The Apocalyptic Tradition Luther and Marx and philosopher Kai Nielsen writing from a atheistic and socialist perspective asks Do We Need a Political Theology Dorothee S lle eminent student of political theology writes on Theology and Liberation Two Quebec theologians Yves Vaillancourt and Guy Bourgeault give a Christian Marxist analysis of Church and Worker in Quebec Roger Hutchinson provides a concluding summary statement Responses by Gregory Baum Patrick Kerans and the editor enhance the collection The volume makes clear in the increasing importance of political theology in the study of religion and the need for increased dialogue between theology and politics Anthropology and Theology Douglas Davies,2020-05-18 Anthropology and Christian Theology have traditionally interpreted religion in quite different ways and have often been thought of as hostile to one another In fact a fundamental concern for human experience lies at the heart of both disciplines This innovative book takes a new look at key anthropological and theological themes and explores the intricacies of their

interplay throughout history and in the present Sacrifice embodiment ritual incarnation symbolism gift and power are all related in ways that shed new light on religious behaviour and belief Detailed analysis of fundamental Christian rites shows how they help generate emotional meaning and inspire philosophical ideas and demonstrates how the body serves as a vehicle for religious beliefs Through an examination of these issues and much more Davies reveals how religious rituals help people to become secure in their sense of identity This accessible foray into new territory is essential reading for anthropologists theologians or anyone interested in religion who is seeking new interpretations of familiar themes

**Faith, Religion & Theology** Brennan Hill, Paul F. Knitter, William Madges, 1997 This thoroughly updated text offers students and adults an overarching perspective The Faith section focuses on the nature of human faith and Christian faith The Religion section examines the personal and social value of religion religious belief and behavior and offers an overview of major world religions The Theology section includes an analysis of the theology faith relationship Suggested readings and study questions excellent end notes and index add to the value of this edition

**ICT** Sean O'Byrne, 2004 These 4 new titles complement the best selling Success Guide range and broaden the list into new subject areas Success Guides are powerful learning revision tools designed to help students remember key information easier and better

**Pragmatic Historicism** Sheila Greeve Davaney, 2000-09-07 Sheila Greeve Davaney develops a bold new option in theology and religious reflection pragmatic historicism which emerges out of the historicist assumptions of human situatedness particularity and plurality that have come to characterize Western thought The major theological attempts by postliberal and revisionist theology to incorporate these insights have failed to contend fully with the historicist challenge Davaney's pragmatic historicism more clearly repudiates essentialism universalism and confessionalism The theology that emerges is constructive and critical resisting all forms of confessionalism without resorting to new forms of universalism In its academic mode it is interpreted not in opposition to religious studies but as one subdiscipline within the study of religion whose major concerns are the identification analysis and critical reconstruction of religious ideas As such it is a form of cultural analysis and criticism The work includes a detailed exploration of the thought of philosophical pragmatists Richard Rorty Cornel West and Jeffrey Stout and theologians Sallie McFague John B Cobb Jr Gordon Kaufman Delwin Brown and William Dean among others

*Ascent of the Mountain, Flight of the Dove* J. Bowyer Bell, 2017-09-29 The essence of *Ascent of the Mountain Flight of the Dove* remains intact its vision of religious studies as sustained reflection on our lifelong voyage to discover who we are The story we choose for ourselves the story we live can sacralize or secularize our lives and our world by the way in which we choose to relate to it With this awareness of the story dimension of life *Ascent of the Mountain Flight of the Dove* opens us to awe reverence and wonder at the risks and possibilities of human freedom This book is even more important than it was thirty years ago We need religion to strike deeply into the self away from public glare Unless Americans become more sophisticated about the language of the self inner

life will shrivel In addition our people will continue to be vulnerable to fundamentalist movements Such movements take over too many innocents They promise and sometimes deliver a touching happiness But they do so by closing the spirit in a powerful and dangerous way Families and schools do not provide a large and critical vocabulary by which to express the inner longings of the spirit The souls of many are parched and they gladly accept water any water from those who offer it The liberation of the religious spirit from trivial closed and simplistic systems of thought can only be achieved through the development of a critical language exercises and disciplines that open rather than close the mind that lead to higher viewpoints breakthroughs and new syntheses in a constant enlargement of spirit Novak's book leads us to that place
