Handbook of Biological Control T. W. Fisher, Thomas S. Bellows, L. E. Caltagirone, D. L. Dahlsten, Carl B. Huffaker, G. Gordh, 1999-09-20 For many years the use of chemical agents such as pesticides and herbicides has been effective in controlling the many varieties of pests that infest both agricultural crops and backyard gardens. However, these pests are gradually becoming resistant to these agents because the agents themselves are acting as selective factors making the pests better and better able to resist and persist. As a result, the use of biological controlling agents is increasing. This book is a comprehensive and authoritative handbook of biological control. *Proceedings of the United States National Museum* United States National Museum, 1927 **Naturae novitates** ,1927 **The Review of Applied Entomology** ,1924

Stored-product Insect Resource David W. Hagstrum, Bhadriraju Subramanyam, 2009 Accurate species identification is essential for effective pest management. *Stored Product Insect Resource* provides the most multi-faceted comprehensive guide to information on 1 663 insect species associated with stored products. This book covers 1 105 commodities and more than 9 200 different insect commodity associations. A broad consideration of the species associated with stored products is important because many unfamiliar species are being encountered as a result of extensive international trade. Information on 468 species of natural enemies provides a fuller understanding of the potential for biological control of stored product insects. Commodities that are likely to be infested are listed for each insect species and information on suitability of some commodities as food is also reviewed. This book includes a catalog that can help locate pictures and keys to identify stored product insects. The authors each have more than 30 years of research experience and have taught stored product entomology. This is their fourth book on stored product insects. This title is a useful supplement to the textbook *Fundamentals of Stored Product Entomology* by Hagstrum and Subramanyam. *Stored Product Insect Resource* will be an important desktop directory for identifying and finding information on stored product insects. *Revision of the Chalcid flies of the tribe*
