Revolution And International System A Study In The Breakdown Of International Stability:

Revolution and International System Kyung-Won Kim,1970 *Revolution and War* Stephen M. Walt,2013-08-07

Revolution within a state almost invariably leads to intense security competition between states and often to war In *Revolution and War* Stephen M Walt explains why this is so and suggests how the risk of conflicts brought on by domestic upheaval might be reduced in the future In doing so he explores one of the basic questions of international relations What are the connections between domestic politics and foreign policy Walt begins by exposing the flaws in existing theories about the relationship between revolution and war Drawing on the theoretical literature about revolution and the realist perspective on international politics he argues that revolutions cause wars by altering the balance of threats between a revolutionary state and its rivals Each state sees the other as both a looming danger and a vulnerable adversary making war seem both necessary and attractive Walt traces the dynamics of this argument through detailed studies of the French Russian and Iranian revolutions and through briefer treatment of the American Mexican Turkish and Chinese cases He also considers the experience of the Soviet Union whose revolutionary transformation led to conflict within the former Soviet empire but not with the outside world An important refinement of realist approaches to international politics this book unites the study of revolution with scholarship on the causes of war

The Shaping of Liberal Politics in Revolutionary France Anne Sa'adah,2014-07-14 Marshalling historical materials to make a descriptive argument in social theory this wide ranging book compares the liberal revolution in France to the liberal revolutions in England and America and argues that the causes and outcomes of these upheavals were decisive in shaping later patterns of politics Conflict is the stuff of politics writes Anne Sa'adah and liberal politics because of its emphasis on the individual and its legitimization of self interest complicates the task of creating political community in a particularly interesting way In England and America the tension between conflict and community was resolved in a manner consistent with political stability In France the tension produced an instability that has surfaced periodically throughout subsequent French history Why this is so is the subject of a work that treats the making of the modern political world in an unusually systematic way In France England and America the relationship of the state to society under the prerevolutionary regime limited revolutionary options Sa'adah focuses on how this relationship created a politics of exclusion in France while allowing a politics of transaction in England and America Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Sechser, Neil Narang, Caitlin Talmadge, 2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the Journal of Strategic Studies **Edmund**

Burke and International Relations J. Welsh, 1995-01-18 The mind of Edmund Burke has attracted the attention of countless political theorists historians and biographers Nonetheless one aspect of Burke s thinking has been neglected his perspective on international relations This book seeks to address that gap by analysing Burke s reaction to the international events of his century The book argues that the tension between Burke s constitutionalism and crusading is ultimately reconciled by his broader conception of international legitimacy and order It is only by widening the definition of international theory to include domestic as well as international politics that one can resolve this tension in Burke s theory and arrive at a richer understanding of the nature of international order both historically and today The Soviet Study of

International Relations Allen Lynch, 1989-07-28 Current divergence from traditional Leninist orthodoxy is attributed to such phenomena as nuclear warfare continued Western prosperity and the Sino Soviet split according to this systematic analysis of Soviet foreign policy *Rethinking International Relations* Fred Halliday, 1994-10-26 International Relations as an academic discipline is faced with three major convergent challenges a historical challenge from the end of the Cold War and from new forms of internationalism and fragmentation an institutional challenge from the growing preoccupation of other social sciences with the international and a theoretical challenge both from these cognate disciplines and from within Ranging widely over the discipline Fred Halliday's book powerfully reaffirms the specificity of International Relations and lays the basis for a long overdue reformulation *The Virtual Weapon and International Order* Lucas Kello, 2017-09-26 An urgently needed examination of the current cyber revolution that draws on case studies to develop conceptual frameworks for understanding its effects on international order The cyber revolution is the revolution of our time The rapid expansion of cyberspace brings both promise and peril It promotes new modes of political interaction but it also disrupts interstate dealings and empowers non state actors who may instigate diplomatic and military crises Despite significant experience with cyber phenomena the conceptual apparatus to analyze understand and address their effects on international order remains primitive Here Lucas Kello adapts and applies international relations theory to create new ways of thinking about cyber strategy Kello draws on a broad range of case studies including the Estonian crisis the Olympic Games operation against Iran and the cyber attack against Sony Pictures Synthesizing qualitative data from government documents forensic reports of major incidents and interviews with senior officials from around the globe this important work establishes new conceptual benchmarks to help security experts adapt strategy and policy to the unprecedented challenges of our times *A Comparison of the Egyptian Revolutions of 1952 and 2011* Muhammet Musa Budak, 2021-12-15 The 2011 uprisings across the Arab world directed the attention of the international community to the Middle East once again Millions of people took to the streets to demonstrate against their autocratic regimes This was an important indication of the Arab people's desire for change along with an opportunity to restore their dignity Although over time these movements weakened they gave rise to discussions of politics economy social organisms and civil militia relations To understand this phenomenon various theories including revolutionary ones were discussed The revolutionary experiences of these countries are important to examine as these very countries had similar waves of change over 50 years ago The Arab countries of Egypt Tunis Libya Syria and Yemen had gone through coup d' tats and leader changes during the 1950s and 60s Comparing these two periods may provide very useful insights to understand the demands of people and how they act to reach these goals This book will particularly analyze the revolutionary periods of Egypt in the 1950s and 2010s As such it will be useful not only to scholars and students of Middle Eastern studies but also to people who want to understand the nature of the demands for change in this region **The Making of Global International Relations** Amitav Acharya, Barry Buzan, 2019-02-14 This book

presents a challenge to the discipline of international relations IR to rethink itself in the light of both its own modern origins and the two centuries of world history that have shaped it By tracking the development of thinking about IR and the practice of world politics this book shows how they relate to each other across five time periods from nineteenth century colonialism through two world wars the Cold War and decolonization to twenty first century globalization It gives equal weight to both the neglected voices and histories of the Global South and the traditionally dominant perspectives of the West showing how they have moved from nearly complete separation to the beginnings of significant integration The authors argue that IR needs to continue this globalizing movement if it is to cope with the rapidly emerging post Western world order with its more diffuse distribution of wealth power and cultural authority

New Thinking In International Relations Theory Michael W Doyle, 2018-06-26

This book of ten original essays provides a showcase of currently diverse theoretical agendas in the field of international relations Contributors address the theoretical analysis that their perspective brings to the issue of change in global politics Written for readers with a general interest in and knowledge of world affairs New Thinking in International Relations Theory can also be assigned in international relations theory courses The volume begins with an essay on the classical tradition at the end of the Cold War Essays explore work outside the mainstream such as Jean Bethke Elshtain on feminist theory and James Der Derian on postmodern theory as well as those developing theoretical advances within traditional realms from James DeNardo's formal modeling to the more descriptive analyses of Miles Kahler and Steve Weber Other essays include Matthew Evangelista on domestic structure Daniel Deudney on naturalist and geopolitical theory and Joseph Grieco on international structuralist theory

Fifty Key Thinkers in International Relations Martin Griffiths, Steven C. Roach, M. Scott Solomon, 2008-11-28

Now in its second edition *Fifty Key Thinkers in International Relations* has been thoroughly updated with several new entries and a new preface to reflect the latest developments There are new sections on Constructivism International Political Theory and English School as well as a range of new thinkers They include Samuel Huntington Christine Sylvester Jürgen Habermas John Rawls Barry Buzan Fully cross referenced throughout this book has everything for students of politics and international relations or indeed anyone who wants to gain an understanding of how nations can work together successfully

Contexts of International Politics Gary Goertz, 1994-11-24

In this book Gary Goertz examines how states interact with their environment and contexts which are important in understanding international politics He presents a philosophical methodological and empirical discussion of three important contexts which affect decision makers history system structure and international norms The effects of these contexts are explored by viewing context in turn as cause as changing meaning and as a barrier The book engages with the literature on structural realism and international regimes and uses rational actor and diffusion models as theoretical references A number of concrete studies are provided using these contextual tools including oil nationalisation USSR East European relations enduring rivalries and decolonisation

These empirical examples illustrate the fruitfulness of the contextual approach to international politics

International Relations of the Middle East Louise L'Estrange Fawcett, 2016 Now in its fourth edition International Relations of the Middle East provides a thematic overview of the subject combining a history of the region with analysis of key themes actors and conflicts as well as topical material and perspectives
