endlessly absorbing as an excursion into cultural history and national memory Arthur Schlesinger Jr **Order,
Contestation and Ontological Security-Seeking in the South China Sea** Anisa Heritage,Pak K. Lee,2020-01-22 This
book examines the South China Sea territorial disputes from the perspective of international order The authors argue that
both China and the US are attempting to impose their respective preferred orders to the region and that the observed
disputes are due to the clash of two competing order building projects Ordering the maritime space is essential for these two
countries to validate their national identities and to achieve ontological security Because both are ontological security
seeking states this imperative gives them little room for striking a grand bargain between them The book focuses on how
China and the US engage in practices and discourses that build contest and legitimise the two major ordering projects they
promote in the region It concludes that China must act in its legitimation strategy in accordance with contemporary publicly
accepted norms and rules to create a legitimate maritime order while the US should support ASEAN in devising a
