many varieties of shrubs may be used but it is necessary that the material should be cut at the proper season and thoroughly dried before being worked up The sticks should be cut in mid winter as at that time the sap is at rest if cut in the summer time the bark will peel off If peeled sticks are required they should be cut in the spring when the sap is rising as at that time the rind will come off easily In some districts the copses are cleared of undergrowth periodically and the sticks generally hazel sold to hurdle and spar makers A selection of these sticks would be very suitable for the purpose here described The sticks should be stacked in an open shed in an upright position if possible and in such a manner that the air can freely circulate around them When they are required for fishing rods or walking sticks they are hung up to season this keeps them straighter but the hanging of them up is not necessary for the work about to be dealt with When the sticks have been put away for from six to twelve months according to size they will be ready for use after being rubbed with a cloth or brushed to clean off the dust and bring up the colour of the bark Fir cones may often be worked into a design and bits of rough bark and the warts and burrs found on old elm trees may be collected by the rustic worker and put by for future use

Bird Houses Boys Can Build Albert Frederick Siepert, 2022-09-16 In Bird Houses Boys Can Build Albert Frederick

Siepert presents a practical and engaging guide that marries craftsmanship with ecological awareness. Designed specifically for young aspiring builders, this book merges clear step-by-step instructions with charming illustrations, allowing boys of all ages to create functional, inviting bird houses. Siepert's prose is accessible yet informative, reflecting the educational ideals of early 20th-century America, where hands-on skills were considered essential for youth development. The book not only serves as a DIY manual but also as a celebration of nature, fostering a sense of responsibility toward wildlife. Albert Frederick Siepert was deeply influenced by his upbringing in a family that valued both creativity and conservation. His experiences as an educator and naturalist informed his desire to empower young people through practical skills that encourage environmental stewardship. Siepert's innovative approach reflects the broader movement of the time, which sought to intertwine manual labor with educational pursuits, advocating for a balance between mind and craft. *Bird Houses Boys Can Build* is highly recommended for parents, educators, and young builders alike. It provides not only a way to engage with nature but also instills the values of creativity and teamwork. This book is an essential addition to any child's library, ensuring hours of enjoyable and meaningful activity.
