Cabañas, 2021-02-16 A new reality for the art object has emerged in the world of contemporary art it is now experienced less as an autonomous inanimate form and more as an active material agent In this book Kaira M Cabañas describes how such a shift in conceptions of art's materiality came to occur exploring key artistic practices in Venezuela Brazil and Western Europe from the mid twentieth century to the present Immanent Vitalities expands the discourse of new materialisms by charting how artists ranging from Gego to Laura Lima distance themselves from dualisms such as mind/matter culture/nature human/nonhuman and even Western/non-Western in order to impact our understanding of what is animate Tracing migrations of people objects and ideas between

South America and Europe Caba as historicizes changing perceptions about art's agency while prompting readers to remain attentive to the ethical dimensions of materiality and of social difference and lived experience *Jewish Latin American Artists*, 2025-09-18 Jewish visual artists living and working in Latin America during the 20th and 21st centuries broaden an appreciation of the art of the Americas The anthology addresses an often underacknowledged Jewish presence as part of the aesthetic of the global south providing the general public and scholars with in depth insights The artists dynamic prints sculptures paintings and photographs explore aspects of modernist abstraction and at times indigenous materials sardonic commentary on consumerism and utopian ideals in their works of art The anthology begins to fill a void of the contribution of Jewish Latin American artists born in Europe who immigrated to Latin America and others born there *Gego 1957-1988* Gego, Peter Weibel, Nadja Rottner, 2006 The book is the most detailed examination of Gego's art published in English to date With never before translated historical texts interviews and in depth analyses by scholars working in a range of disciplines

**Performance Drawing** Maryclare Foá, Jane Grisewood, Birgitta Hosea, Carali McCall, 2020-09-03 What is performance drawing When does a drawing turn into a performance Is the act of drawing in itself a performative process whether a viewer is present or not Through conversation interviews and essays the authors illuminate these questions and what it might mean to perform and what it might mean to draw in a diverse and expressive contemporary practice since 1945 The term performance drawing first appeared in the subtitle of Catherine de Zegher's *Drawing Papers 20 Performance Drawings* in particular with reference to Alison Knowles and Elena del Rivero In this book it is used as a trope and a thread of thinking to describe a process dedicated to broadening the field of drawing through resourceful practices and cross disciplinary influence Featuring a wide range of international artists this book presents pioneering practitioners alongside current and emerging artists The combination of experiences and disciplines in the expanded field has established a vibrant art movement that has been progressively burgeoning in the last few years The Introduction contextualises the background and identifies contemporary approaches to performance drawing As a way to embrace the different voices and various lenses in producing this book the authors combine individual perspectives and critical methodology in the five chapters While embedded in ephemerality and immediacy the themes encompass body and energy time and motion light and space imagined and observed demonstrating how drawing can act as a performative tool The dynamic interaction leads to a collective understanding of the term performance drawing and addresses the key developments and future directions of this applied drawing process **Lumen Naturae** Matilde Marcolli, 2020-05-26 Exploring common themes in modern art mathematics and science including the concept of space the notion of randomness and the shape of the cosmos This is a book about art and a book about mathematics and physics In *Lumen Naturae* the title refers to a purely immanent non supernatural form of enlightenment mathematical physicist Matilde Marcolli explores common themes in modern art and modern science the concept of space the notion of randomness the shape of the cosmos and other puzzles of the universe while mapping

convergences with the work of such artists as Paul Cezanne Mark Rothko Sol LeWitt and Lee Krasner Her account focusing on questions she has investigated in her own scientific work is illustrated by more than two hundred color images of artworks by modern and contemporary artists Thus Marcolli finds in still life paintings broad and deep philosophical reflections on space and time and connects notions of space in mathematics to works by Paul Klee Salvador Dal and others She considers the relation of entropy and art and how notions of entropy have been expressed by such artists as Hans Arp and Fernand L ger and traces the evolution of randomness as a mode of artistic expression She analyzes the relation between graphical illustration and scientific text and offers her own watercolor decorated mathematical notebooks Throughout she balances discussions of science with explorations of art using one to inform the other She employs some formal notation which can easily be skipped by general readers Marcolli is not simply explaining art to scientists and science to artists she charts unexpected interdependencies that illuminate the universe
