Conlan, Paul L. Posner, 2009-11-01 A Brookings Institution Press and the National Academy of Public Administration publication America's complex system of multi-layered government faces new challenges as a result of rapidly changing economic technological and demographic trends. An aging population, economic globalization and homeland security concerns are among the powerful factors testing the system's capacity and flexibility. Major policy challenges and responses are now overwhelmingly intergovernmental in nature and as a result the fortunes of all levels of government are more intertwined and interdependent than ever before. This volume, cosponsored by the National Academy of Public Administration (NAPA), defines an agenda for improving the performance of America's intergovernmental system. The early chapters present the current state of practice in intergovernmental relations, including discussion of trends toward centralization, devolution, and other power sharing arrangements. The fiscal underpinnings of the system are analyzed along with the long-term implications of current trends in financing at all levels. The authors identify the principal tools used to define intergovernmental management: grants, mandates, preemptions. In discussing emerging models and best practices in the design and management of those tools, *Intergovernmental Management for the 21st Century* applies these crosscutting themes to critical policy areas where intergovernmental management and cooperation are essential, such as homeland security, education, welfare, health care, and the environment. It concludes with an authoritative assessment of the system's capacity to govern, oversee, and improve. Contributors include Jocelyn Johnston (American University), Shelley Metzenbaum (University of Maryland), Richard Nathan (SUNY at Albany), Barry Rabe (University of Michigan), Beryl Radin (American University), Alice Rivlin (Brookings Institution), Ray Sheppach (National Governors' Association), Frank Shafroth (George Mason University), Troy Smith (BYU Hawaii), Carl Stenberg (University of North Carolina). **Jonas and Kovner's Health Care Delivery in the United States** Anthony R. Kovner, PhD, James Knickman, 2005-06-22 How is health care understood and assessed in America? What are the characteristics of those institutions which provide it? Over the short term, how are changes in health care provisions affecting the health of the population, the cost of care, and access to care? This eighth edition discusses these and other core issues in the field.

Medicaid Politics Frank J. Thompson, 2012-09-19 Medicaid, one of the largest federal programs in the United States, gives grants to states to provide health insurance for over 60 million low-income Americans. As private health insurance benefits have relentlessly eroded, the program has played an increasingly important role. Yet Medicaid's prominence in the health care arena has come as a surprise. Many astute observers of the Medicaid debate have long claimed that a program for the poor is a poor program, prone to erosion because it serves a stigmatized, politically weak clientele. Means-tested programs for the poor are often politically unpopular, and there is pressure from fiscally conservative lawmakers to scale back the \$350 billion per year program, even as more and more Americans have come to rely on it. For their part, health reformers had long assumed that Medicaid would fade away as the country moved toward universal health insurance. Instead, Medicaid has proved remarkably durable, expanding and becoming a major pillar of America's health insurance system. In *Medicaid Politics*

political scientist Frank J Thompson examines the program's profound evolution during the presidential administrations of Bill Clinton George W Bush and Barack Obama and its pivotal role in the epic health reform law of 2010 This clear and accessible book details the specific forces embedded in American federalism that contributed so much to Medicaid's growth and durability during this period It also looks to the future outlining the political dynamics that could yield major program retrenchment
