Cognitive Behavioural Prevention of Suicide in Psychosis Nicholas Tarrier,Patricia Gooding,Daniel Pratt,2013 This practical and informative text lays out the product of a number of years of clinical research into suicide behaviour and its prevention While the focus is on non affective psychosis and the schizophrenia spectrum disorders the mechanisms underlying suicide behaviour in this group may well underlie or at least influence suicide behaviour in other disorders The authors describe methods of assessment through individual formulation and a cognitive behavioural intervention through case studies to reduce the risk of suicide This book argues that Suicide behaviour lies on a cognitive behavioural continuum from ideation through intention to action Mechanisms based on biased information processing systems the development of suicide schema and appraisal styles are likely to be fruitful in explaining suicidal thoughts and behaviours A psychological theory of suicide behaviour is needed in order to develop a mechanism of suicide and to understand the components of suicidal thoughts and behaviours Suicide risk can be reduced through the use of the intervention methods described within the text Cognitive Behavioural Prevention of Suicide in Psychosis evaluates practical applications of contemporary research on this topic and will therefore be of interest to practitioners post graduates in training and researchers studying suicide and or psychosis **Mechanisms Underpinning the Link between Emotion, Physical Health and Longevity** Andrew H.
