Food Plant Design Antonio Lopez-Gomez, Gustavo V. Barbosa-Canovas, 2005-05-06 Although chemical engineering and food technology are subject areas closely related to food processing systems and food plant design coverage of the design of food plants is often sporadic and inadequately addressed in food technology and engineering books Some books have attempted to treat food engineering from this dual point of view but most have not achieved balanced coverage of the two Focusing on food processing rather than chemical plants Food Plant Design presents precise design details with photos and drawings of different types of food processing plants including food processing systems refrigeration and steam systems conveying systems and buildings The authors discuss the subject in an ordered format that gives you the tools to produce food products with minimum cost Including modeling procedures for food processing systems and auxiliary systems they elucidate synthesis techniques and procedures Using a clear structure for different levels of information and data on different food processing alternatives the book outlines solutions to plant design problems in the context of overall optimization of an agro industrial system and corresponding food chain It provides the work procedures and techniques for solving the design problems of a food processing plant and in making a defined food product

Handbook of Food Science, Technology, and Engineering Yiu H. Hui, 2006

Descriptive Food Science Antonio Valero Díaz, Rosa María García-Gimeno, 2018-11-28 Deep knowledge of the chemical composition nutrients physical properties toxicology and microbiological composition of food allows for the production of safe high quality foods This knowledge is fundamental when producing preserving manipulating and distributing food substances especially to reduce the risks to consumer health The full extent of the effects on the

composition of foods treated by new technologies is still unknown and it must be considered to guarantee that food is produced safely Descriptive Food Science gives an in depth insight into this field Section 1 focuses on the quality of various foods and Section 2 centers on how different technological treatments affect the quality of food *Food Plant Engineering Systems* Theunis Christoffel Robberts, Theunis C. Robberts, 2002-06-13 Pumps Boilers Power transmission Water treatment Waste disposal Efficient lighting Maintain them and you ll experience optimal performance Ignore them and the system will collapse While many texts adequately describe the processing lines used in food manufacturing none address the importance of the ancillary equipment that allows the plant to operate Food Plant Engineering Systems fills this gap by focusing on these crucial but frequently forgotten parts of the system With clear easy to understand language this book details the bits and pieces that keep systems running and explains how they fit within the bigger picture Properties of fluids Pumps and piping Electrical systems including motors starters electrical heating and lights Steam generation and heating systems Cooling and refrigeration systems Water and waste and material handling systems Food plant design including site foundations floors walls roofs drains and insulation Safety and EPA regulations Getting all the units to work together as a well orchestrated system is what manufacturing design and management are all about This book provides the first truly comprehensive look at food plant operation Food Plant Engineering Systems ensures that all elements of the system are properly balanced to efficiently accomplish the job Magnetic Resonance in Food Science Peter S Belton, A M Gil, G A Webb, Doug Rutledge, 2007-10-31 The term magnetic resonance covers a wide range of techniques spectroscopy relaxation and imaging In turn these areas are evolving and leading to various new applications of NMR and ESR in food science and nutrition From assessment of meat quality through to a study of beer components and the effect of microwaves on potato texture Magnetic Resonance in Food Science Latest Developments provides an account of the state of the art in this lively area Coverage includes recent developments in magnetic resonance human aspects of food structure and dynamics in food and food quality control With contributions from international experts this book is essential reading for academics and industrialists in food science It is the latest in a series of titles in this area published by the RSC Food Physics Ludger Figura, Arthur A. Teixeira, 2007-08-24 This is the first textbook in this field of increasing importance for the food and cosmetics industries It is indispensable for future students of food technology and food chemistry as well as for engineers technologists and technicians in the food industries It describes the principles of food physics starting with the very basics and focuses on the needs of practitioners without omitting important basic principles It will be indispensable for future students of food technology and food chemistry as well as for engineers technologists and technicians in the food industries Food Physics deals with the physical properties of food food ingredients and their measurement Consumer Research Methods in Food Science Carlos Gómez-Corona, Heber Rodrigues, 2023-04-07 This volume details a wide range of consumer research methods from different disciplines with an application to food and beverages Each chapter is written by well known researchers in the

field that guides the reader on a specific method in applied consumer research Chapters are separated by disciplines detail brief theoretical background provide a clear examples of the methodology anthropology history linguistics and visual arts culinary arts design and user experience are also approached The separation of methods through disciplines gives a better structure to the reader when trying to apply each method Authoritative and cutting edge Consumer Research Methods in Food Science detail clear steps and a framework to reproduce consumer research methods in different applications
