initial teacher training courses in England and Wales Educational Review *Learning to Teach Geography in the Secondary School* Mary Biddulph, David Lambert, David Balderstone, 2015-05-20 *Learning to Teach Geography in the Secondary School* has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge and what is involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography, Why we teach and what to teach, Understanding and planning the curriculum, Effective pedagogy, Assessment, Developing and using resources, Fieldwork and outdoor learning, Values in school geography, Professional development. Intended as a core textbook and written with university and school based initial teacher education in mind, *Learning to Teach Geography in the Secondary School* is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of *Learning to Teach Geography in the Secondary School*: This is a practical and visionary book as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative conceptual framework. The Times Educational Supplement. This is a modern, powerful, relevant and comprehensive work, a standard reference for many beginning teachers on geography initial teacher training courses. Educational Review **Global Perspectives in the Geography Curriculum** Alex Standish, 2008-10-07 For geographers across the globe, this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians. Standish's careful critique shows the necessity of a depoliticised geography curriculum, the irony of which would be that it would ensure that every child could point to Iraq, Iran and Afghanistan on a map. Prof Dennis Hayes, Oxford Brookes University, UK. A prescient and critical analysis of the changing face of geography teaching. This book deserves to be widely read and debated. Alex Standish's book puts current trends in geography teaching in historical and critical context. It comprises a forthright and timely defence of geographical education for its own sake. Dr Jim Butcher, FRSA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s, educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts, ideas and skills to a more ethics based subject concerned with the promotion of environmentalism, cultural diversity.

and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike **Global Perspectives in the Geography Curriculum** makes a significant contribution to the growing debate about the future direction of the discipline itself **Teaching and Learning Geography** Daniella

Tilbury, Michael Williams, 2002-11 This book provides a clear overview of current thinking on the teaching and learning of geography It is ideal for anyone beginning a career in teaching the subject in schools The chapters are written by experienced teachers *The Making of Geography as a Secondary School Subject* John Mortimer, Tom

O'Donoghue, 2021-06-02 No work has ever been produced previously that shows how historically geography has been constructed as a subject for the senior years of secondary schooling in Western Australia from 1917 to 1997 In doing so this book contributes to the existing corpus of international research on the history of curriculum and particularly the history of geography as a senior secondary school subject Much of it is based on primary sources including the textbooks and atlases used along with syllabus manuals and geography examination papers It also provides a framework for investigating the construction of senior secondary school geography curricula in other constituencies and could act as a model for engaging in further research in curriculum history for other school subjects state wide nationally and internationally The book also makes an important contribution to the fields of curriculum design curriculum development and curriculum innovation It will be of great interest to historians of education comparative educationists education leaders policy makers and librarians British Book News ,1990

Teaching Geography in Secondary Schools Margaret Smith, 2005-06-29 A companion to Aspects of Teaching Secondary Geography Teaching Geography in the Secondary School A Reader brings together a wide range of key writings that look at central issues debates and ideas surrounding geography education today It encourages students to reflect critically upon the issues in order to develop their understanding of these issues and to consider the implications for their classroom practice The British National Bibliography Arthur James Wells, 2002 **Effective Innovation in the Secondary Geography Curriculum** Charles Rawding, 2013-05-29 How up to date is your geographical thought Are parts of your curriculum becoming tired and out dated Effective Innovation in the Secondary Geography Curriculum will help training and practising secondary school teachers understand how to evaluate and refresh their curriculum in order to ensure that

what they teach is relevant topical and creative Considering the latest developments in both the school geography curriculum and the field of geography as an academic discipline this exciting new book explores how geography teaching and learning can be developed to engage secondary school pupils and better reflect contemporary society Illustrated throughout with ideas and practical examples of how to update your curriculum easily and effectively key topics covered include Understanding curriculum theory and development Auditing and developing your own dynamic interactive curriculum Critiquing textbooks and resources to ensure relevance Constructing and analysing schemes of work Incorporating the latest developments in the field into your teaching How to create innovative enduring curricula for human physical and environmental geographies Providing insights into the latest thinking in geography in a concise and accessible manner Effective Innovation in the Secondary Geography Curriculum will ensure motivating lively and successful geography teaching and learning

The Top Books of the Year Longman Geography For Gcse The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Longman Geography For Gcse : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Longman Geography For Gcse : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
