The Grammar of Graphics Leland Wilkinson, 2006-01-28 Preface to First Edition Before writing the graphics for SYSTAT in the 1980's I began by teaching a seminar in statistical graphics and collecting as many different quantitative graphics as I could find I was determined to produce a package that could draw every statistical graphic I had ever seen The structure of the program was a collection of procedures named after the basic graph types they produced The graphics code was roughly one and a half megabytes in size In the early 1990's I redesigned the SYSTAT graphics package using object based technology I intended to produce a more comprehensive and generic package I accomplished this by embedding graphical elements in a tree structure Rendering graphics was done by walking the tree and editing worked by adding and deleting nodes The code size fell to under a megabyte In the late 1990's I collaborated with Dan Rope at the Bureau of Labor Statistics and Dan Carr at George Mason University to produce a graphics production library called GPL this time in Java Our goal was to develop graphics components This book was nourished by that project So far the GPL code size

is under half a megabyte *The Most Complex Machine* David J. Eck, 2018-10-08 This introduction to computers presents the fundamental ideas and principles on which modern computers are built While used as a text for courses in computer appreciation as well as introductions to computer science the book has found a wide audience among computer users who wish to understand the basis of the machines that form and transform our society What Computers Do Teaching Silicon to Compute Building a Computer Theoretical Computers Real Computers Programming Subroutines and Recursion Real Programming Languages Applications Cooperating Computers Graphics Artificial Intelligence Answers The text is supplemented by a web site that gives access to other problems and projects *Color Correction Look Book* Alexis Van Hurkman, 2014 In this follow up volume to the bestseller *Color Correction Handbook* Alexis Van Hurkman walks you through twenty one categories of creative grading techniques designed to give you an arsenal of stylizations you can pull out of your hat when the client asks for something special unexpected and unique Each chapter presents an in depth examination and step by step cross platform breakdown of stylistic techniques used in music videos commercial spots and cinema

Non-Photorealistic Rendering Bruce Gooch, Amy Gooch, 2001-07-18 The ubiquity of computer generated imagery around us in movies advertising or on the Internet is already being taken for granted and what impresses most people is the photorealistic quality of the images Pictures as we have often been told are worth a thousand words and the information transported by an image can take many different forms Man
