National Competitiveness In Global Economy The Case Of Hungary:

National Competitiveness in Global Economy Attila Chakán, Erzsébet Czakó, Zita Zoltay-Paprika, 2002 The Hungarian economy is on a new development path after coping successfully with challenges raised by national economic transition and the increasing globalization in the first half of the 1990s Competitiveness has become a key issue for both macroeconomic analysts and for decision makers in business and government Recognition of the above in 1995 led the Budapest University of Economic Sciences to start a research program titled In Global Competition Microeconomic Factors of Competitiveness of the Hungarian Economy A focal element of the research program was an opinion survey The analysis of the database of two surveys makes it possible to provide an overview of the changes in the behavior performance and selected operational fields of Hungarian companies between 1995 and 1999 The main findings of this analysis are published in this book Besides the description of the Hungarian developments the authors provide some more general conclusions for those interested in micro and The Emergence of Southern Multinationals Louis Brennan, 2010-12-21 In today's globalised world there is a need to investigate new trends in the global economy which impact on Europe The emergence of these southern multinationals in Europe is one such phenomenon This book explores the existing trends and trajectories of these companies the evidence of their impact and their strategies and processes International Encyclopedia of Organization Studies Stewart Clegg, James R. Bailey, 2008 Describing the field spanning individual organisation societal and cultural perspectives in a cross disciplinary manner this is the premier reference tool for students lecturers academics and practitioners to gather knowledge about a range of important topics from the perspective of organisation studies **Hidden Champions in Dynamically Changing Societies** Alenka Braček Lalić, Danica Purg, 2021-04-30 Hidden champions are highly successful small and medium sized companies that are global leaders in terms of market share in their respective niches Presenting the outcomes of an in depth multinational study on hidden champions in Central Eastern and Southeast Europe Russia China Mongolia and Turkey this book provides essential insights into the critical drivers of success market leadership positions competitive advantage and core lessons learned on the road to business prosperity It also addresses development needs in connection with management financing and the regulatory environment which can in turn be used to create recommendations for various stakeholders e.g. governments financial institutions management development institutions in order to support hidden champions in their further growth and business success *World IT Project, The: Global Issues In Information Technology* Prashant Palvia, Jaideep Ghosh, Tim Jacks, Alexander Serenko, Aykut Hamit Turan, 2020-04-28 Understanding the key IT issues facing firms within their surrounding contexts is critical for the firm government and their international counterparts In response to the dominant and pervasive bias in Information Systems IS research towards American and Western views the World IT Project was launched and is the largest study of its kind in the field This book captures the organizational technological and individual issues of IT employees across 37 countries The book enables management and staff to formulate business and IT

related policies and strategies Likewise it allows policymakers governments and vendors to address important issues at the national level as well as to respond to the needs of partners and stakeholders in other countries It also offers current and future academic scholars a grounded understanding of the international IT environment and provides a sound foundation to launch many international IT studies **The Societal Foundations of National Competitiveness** Michael J.

Mazarr,2022-06-21 Nations rise and fall succeed or fail in rivalries and enjoy stability or descend into chaos because of a complex web of factors that affect competitive advantage One critical component is the package of essential social characteristics of a nation The ultimate story of the Cold War is that the United States was simply a more competitive society than the Soviet Union more energetic more vibrant more innovative more productive more legitimate Through analysis of comparative studies of historical eras and trends historical case studies and the findings of issue specific empirical research the report explores how seven characteristics of a society determine its competitive standing and distinguish dynamic and competitively successful nations If the history surveyed in this report provides an accurate guide to the future the fate of the United States in today s rivalries will not be determined solely or even in significant degree by the numbers of its weapons or amounts of defense spending or how many proxy wars it wins but by the basic characteristics of its society The author applies the seven leading characteristics that affect national standing to the United States to create a snapshot of where the country stands That application provides some reason for optimism The United States continues to reflect many of these characteristics and the overall synergistic engine more than any other large country in the world However multiple trends are working to weaken traditional U S advantages Several such as the corruption of the national information space pose acute risks to the long term dynamism and competitiveness of the nation raising the worrying prospect that the United States has begun to display classic patterns of a major power on the far side of its dynamic and vital curve *The Hungarian*

Economic Reforms 1953-1988 Ivan T. Berend,1990-05-25 Professor Berend presents a comprehensive inside account of Hungary s economic reforms since the 1950s Working from Communist Party archives which have hitherto partially remained closed to scholars Berend situates the history of these economic reforms within their political context looking in particular at the role of the Soviet Union He examines the theoretical background to reform the obstacles that arose during implementation and the gradual realisation that minor reforms of the old system could no longer work *The Hungarian Economic Reforms 1953 1988* comes at a time when many centrally planned economies are examining their performance and structure and seeking suitable forms of change The Hungarian reforms have attracted those countries wishing to rid themselves of their Stalinist command economies Thus the book indirectly sheds light upon Chinese economic reforms and on Gorbachev s Soviet perestroika It will be of interest to specialists and students of East European studies with special reference to the EMEA planned economies and economic reform **World Economics** Tamás Szentes,2002 This work

provides an overview of the structure and functioning of the world capitalist economic system The author finds the current

structure to be threatening to world peace and sustainable development Central to the argument is an analysis of the interactions between globalization regionalization and national development He identifies a number of problems with the current arrangement chiefly distorted undemocratic and inequitable development patterns giving rise to military conflict He tries to apply lessons of national development towards solutions to the world economy calling for the democratization of the world order and the strengthening of democratic global institutions that can look after the global commons Distributed in the US by ISBS Annotation 2004 Book News Inc Portland OR booknews com

Landmark Cases in Competition Law Barry Rodger,2012-12-01 It is the thesis of this fascinating and highly instructive book on competition law that an examination of one landmark case scenario or saga each from a range of legal systems leads to a thorough understanding of the issues informing and arising from competition policy law and legal practice To that end leading scholars from 14 jurisdictions enhance their academic authority and rigour with an element of panache to describe a particularly salient case in each of their countries commenting

in depth on the contribution of the case to the development of their particular competition law culture and to the case's enduring significance for competition law and its enforcement from a global perspective. There are chapters for each of thirteen countries as well as the European Union preceded by an informative and thoughtful introduction. For each landmark case selected, the legislative background, the case facts and the legal ruling and reasoning are all minutely described along with commentary, critique and assessment of the case's impact and contemporary significance. The cases cover vast swathes of the competition law territory in terms of substance and procedure dealing with cartels, abuse of dominance, mergers and vertical restraints and involving diverse forms of public and private enforcement processes. Aspects covered include the following: the public interest test, bid rigging in public procurement, the entitlement of dominant companies to compete on a level footing with other companies, the hard to draw line between legitimate competition and unlawful monopolizing conduct, the dangers of eclectic borrowing in the development and interpretation of competition law rules, horizontal price fixing, collusion, hub and spoke cartels, resale price maintenance agreements and the U.S. rule of reason, the increasing use of private enforcement and the right for victims of a competition law infringement to seek compensation, merger control in energy markets and the political use of merger review rules to benefit domestic firms, cooperation with criminal enforcement agencies and prosecutors, the role courts play in undertaking adequate legal supervision of competition authorities, leniency processes and obtaining access to confidential whistleblowing documentation, imposition of administrative fines and other deterrence based sanctions and how the consumer welfare standard is interpreted. More than a set of landmark case descriptions, this book in which many chapters reflect upon recent and consider further future significant reforms demonstrates that competition law and its enforcement processes form part of a chronological narrative and that it is important to understand the broader legal, social and economic context within which competition law and policy develop. This wider perspective will prove immeasurably valuable to the many practitioners, business people, jurists and policy makers engaged in the shaping of competition law in any jurisdiction and will moreover be essential reading for postgraduate students studying any aspects of comparative competition law enforcement.

The European Competitiveness and Transition Report 2001-2002 : Ratings of Accession Progress, Competitiveness, and Economic Restructuring of European and Transition Economies World Economic Forum, 2002-02-28 For over a decade central and eastern Europe has been at the center of one of the most profound economic and political transformations in history. At the start of the 1990s the region embarked on an ambitious reform program to depart from central planning towards more market based economies. A decade later and amid significant difficulties the region has achieved remarkable

accomplishments with several countries becoming increasingly integrated into the global economy Political structures have been transformed and new institutions have emerged Indeed the progress in structural reforms achieved in the region has been so substantial that several countries are now at the threshold of European Union membership Aware of the significance of the successful integration of central and eastern Europe into the global economy the World Economic Forum and Harvard University are proud to introduce The European Competitiveness and Transition Report a thorough review of the transition process that has unfolded in the last decade This comprehensive report presents new data and expert commentary on what the facts say about the enlargement of the European Union and the competitiveness and growth potential of both Europe and the candidate countries It addresses the many important factors that will determine how these countries will fare in terms of economic growth over the next ten to twenty years Written by independent experts The European Competitiveness and Transition Report 2001 2002 is a truly unique data driven guide that lays out the facts and reveals the real issues behind European enlargement

Enhancing Global Competitiveness A. N. Sarkar, 2009 In terms of overall orientation this book has been so conceived and structured that it has followed a certain natural corollary and logical framework in comparing Indian economy with the Asian and the global economy in respect to the sectors wherein India is perceived to play a leadership role both in the regional and the global context Secondly an attempt has also been made to identify areas where India despite possessing a huge potential could not so far convincingly demonstrate its competitive advantage to compete globally Thirdly competitive advantages in certain chosen fields wherein India can excel and outperform its competitors are elaborated and highlighted with broad indication of the future strategy Last but not the least the book has dealt with the various sectoral investment opportunities in India for achieving global competitiveness
