Numbers Rational Irrational:

Numbers: Rational and Irrational Ivan Niven, 1961 Self study guide on the classification of numbers and the standards used to determine whether a number is rational or irrational

Irrational Numbers Ivan Niven, 2005-08-18 In this monograph Ivan Niven provides a masterful exposition of some central results on irrational transcendental and normal numbers He gives a complete treatment by elementary methods of the irrationality of the exponential logarithmic and trigonometric functions with rational arguments The approximation of irrational numbers by rationals up to such results as the best possible approximation of Hurwitz is also given with elementary technique The last third of the monograph treats normal and transcendental numbers including the Lindemann theorem and the Gelfond Schneider theorem The book is wholly self contained The results needed from analysis and algebra are central Well known theorems and complete references to standard works are given to help the beginner The chapters are for the most part independent There are notes at the end of each chapter citing the main sources used by the author and suggesting further reading
