Multiculturalism, Migration, and the Politics of Identity in Singapore Kwen Fee Lian, 2015-10-28 This edited volume focuses on how multiculturalism as statecraft has had both intended and unintended consequences on Singapore's various ethnic communities The contributing authors address and update contemporary issues and developments in the practice of multiculturalism in Singapore by interfacing the practice of multiculturalism over two critical periods the colonial and the global The coverage of the first period examines the colonial origins and conception of multiculturalism and the post colonial application of multiculturalism as a project of the nation and its consequences for the Tamil Muslim Ceylon Tamil and Malay communities The content on the second period addresses immigration in the context of globalization with the arrival of new immigrants from South and East Asia who pose a challenge to the concept and practice of multiculturalism in Singapore For both periods the contributors examine how the old migrants have attempted to come to terms with living in a multicultural society that has been constructed in the image of the state and how the new migrants will reshape that society in the course of their ongoing politics of identity

Border Transgression and Reconfiguration of Caribbean Spaces Myriam Moïse, Fred Réno, 2020-09-28 A dividing line the border is usually perceived in terms of separation and rupture It is a site of tension par excellence at the origin of contestations negotiations and other conflicting patterns of inclusion exclusion This book takes us through an exploration of the border in the Caribbean region both geographically fragmented and strongly tied through its history culture and people This collection of scholarly articles interrogates the border within the specificities of the Caribbean context its socio political dynamics and its literary and artistic representations The transgression of borders and the consequent reconfiguring phenomena are thus applied to the Caribbean and its diasporas through a transdisciplinary approach The book combines a multiplicity of research fields including Social Sciences Cultural Geography Geopolitics Cultural and Literary Studies hence it offers a global perspective on the topic and transcends disciplinary categories The contents of the book also stretch beyond geographic and linguistic borders as the contributors come from diverse scholarly backgrounds affiliations linguistic areas and research expertise

Minority Rights Protection in International Law Dr Helen O'Nions, 2012-12-28 There are approximately ten million Roma in Europe making them the continent's largest non territorial minority Despite this fact the Roma continue to experience routine discrimination and marginalization in European countries As a result they are seldom engaged in national political activism and are frequently at the bottom of the economic and social ladder The severity of exclusion experienced by the Roma in societies which have long paid heed to the notion of individual universal human rights combined with their geographical

dispersal and heterogeneous nature makes the study of the Roma highly informative This book examines the theoretical debate concerning the most appropriate way of protecting the fundamental human rights of the Roma which also illuminates ways in which the rights of minority groups can be protected more generally As a result this work will be a valuable resource for social scientists and practitioners in the field of human rights

Migration and Identity Rina Benmayor, Andor Skotnes, The theme of Migration and Identity is of special concern at a time both of massive worldwide migration and of apparently intensifying national ethnic and racial conflicts Problems of migration and the resulting reconfigurations of social identity are fundamental issues for the twenty first century This volume spans the whole complex global web of migratory patterns with contributions linking Africa Asia Australia Europe North and South America without losing the particularities of local and personal experience This paperback edition in the Memory and Narrative series explores these issues and the sustaining or abandoning of memory and identity as people move between fundamentally different cultures in a number of recent social settings from a number of methodological perspectives These focused case studies offer glimpses into the interior migration experiences into the processes of constructing and reconstructing identity without forgetting that both theoretically and empirically the problem of identity is complex and multifaceted All of the essays rely heavily on oral history and personal testimony highlighting the experience of individuals and small groups without ignoring the tension that exists between the local and the global Memories of oppression or totalitarianism are one of the driving forces behind some of these migrations and the transmission of memories and myths between family generations is one of the ways in which migrations are interpreted In looking both backward and forward Migration and Identity offers an acute view of migratory patterns and their impact on the newcomers and the local cultures It will be of interest to cultural and oral historians and researchers of concerned with migration and integration Rina Benmayor is professor of oral history Latino studies and literature in the Department of New Humanities for Social Justice at California State University Monterey Bay She is currently president of the International Oral History Association Her recent publications include Telling to Live Latino Feminist Testimonies and Latino Cultural Citizenship Andor Skotnes is associate professor of history of the Americas at The Sage Colleges in Troy New York He teaches courses in working class African American Native American and Latin American history and culture and in oral history

Blurred Borders Jorge Duany, 2011-09-12 In this comprehensive comparative study Jorge Duany explores how migrants to the United States from Cuba the Dominican Republic and Puerto Rico maintain multiple ties to their countries of origin Chronicling these diasporas from the end of World War II to the present Duany argues that each sending country's relationship to the United States shapes the transnational experience for each migrant group from legal status and migratory patterns to work activities and the connections migrants retain with their home countries Blending extensive ethnographic archival and survey research Duany proposes that contemporary migration challenges the traditional concept of the nation state Increasing numbers of immigrants and their descendants lead what Duany calls bifocal lives bridging two

or more states markets languages and cultures throughout their lives Even as nations attempt to draw their boundaries more clearly the ceaseless movement of transnational migrants Duany argues requires the rethinking of conventional equations between birthplace and residence identity and citizenship borders and boundaries **IBSS** Compiled by the British Library of Political and Economic Science,2001 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **Muslim Minorities and Social Cohesion** Abe Ata,2020-09-22 This book examines various attempts in the West to manage cultural linguistic and religious diversity focusing on Muslim minorities in predominantly non Muslim societies An international panel of contributors chart evolving national identities and social values assessing the way that both contemporary Western societies and contemporary Muslim minorities view themselves and respond to the challenges of diversity Drawing on themes and priority subjects from Islamic Culture within Euro Asian Australian and American international research they address multiple critical issues and discuss their implications for existing and future policy and practice in this area These include subjects such as gender the media citizenship and multiculturalism The insight provided by this wide ranging book will be of great use to scholars of Religious Studies Interreligious Dialogue and Islamic Studies as well as Politics Culture and Migration **Identity Politics in the Age of Globalization** Roger A. geography and anthropology with interests in inclusion and diasporic communities The Politics of Citizenship in Immigrant Democracies Geoffrey Brahm Levey, Ayelet Shachar, 2017-10-02 This book brings together scholars from various disciplines to explore current issues and trends in the rethinking of migration and citizenship from the perspective of three major immigrant democracies Australia Canada and the United States These countries share a history of pronounced immigration and emigration extensive experience with diasporic and mobile communities and with integrating culturally diverse populations They also share an approach to automatic citizenship based on the principle of jus soli as opposed to the traditionally common jus sanguinis of continental Europe and a comparatively open attitude towards naturalization Some of these characteristics are now under pressure due to the restrictive turn in citizenship and migration worldwide This volume explores the significance of political structures political agents and political culture in shaping processes of inclusion and exclusion in these diverse societies This book was originally published as a special issue of Citizenship Studies *Identity and Cultural Diversity* Maykel Verkuyten, 2013-08-22 Identity and Cultural Diversity examines immigration and its effect on diversity from a social psychological perspective Immigration increases cultural diversity and raises difficult questions of belonging adaptation and the unity of societies questions of identity may be felt by people struggling with the basic problem of who they are and where they fit in and although cultural diversity can enrich communities and societies it also sometimes leads to a new tribalism which threatens democracy and social cohesion The author Maykel Verkuyten considers how people give meaning to the fact that they belong to ethnic racial religious and national groups and the implications this can have for social cohesion The opening chapters consider the nature of social identity and group identification and include discussions of identity development in adolescence acculturation and multiple and dual identities Verkuyten then considers one of the most pernicious social problems how conflict emerges from perceiving others as different He examines when and why group distinctions grow into conflicts and considers the role of cultural diversity beliefs such as multiculturalism and assimilation The book concludes by exploring productive ways of managing cultural diversity Written in an engaging style Identity and Cultural Diversity will be essential reading for undergraduate and postgraduate students of social and cultural psychology and other social sciences and it also makes key themes in social psychology accessible to a wider audience outside academia

Social Freedom in a Multicultural State G. Nathan, 2010-11-03 The politics of multiculturalism faces challenges in Western democratic states Arguing that this setback is based on the notion of culture as separate and distinct this book explores how to face current challenges to multiculturalism without reifying culture group and identity Ethnic Minorities and Inter-ethnic Relations in Context Karen Phalet, Antal Orkeny, 2017-10-19 This volume is based on papers presented on ethnic minorities and inter ethnic relations in Hungary and The Netherlands which were presented and discussed in three conferences and a series of meetings from 1997 1999 This work builds on comparative studies of the rise of a radical right and the mobilization of anti immigrant feelings It presents cross national comparative research due to the credence that

shifting national angles is a powerful strategic tool with which to correct national bias and to uncover submerged or overlooked aspects of specific national cases The book brings together contributions from Hungarian and Dutch scholars in the field of ethnic minorities and inter ethnic relations The two countries are used as exemplary cases of distinct ethno political patterns in Central and Western Europe Combining complementary configurational and dimensional approaches to cross national comparison the diverse forms of ethnic relations in Hungary and The Netherlands are analyzed and competing explanations of ethno political conflict or co ordination are tested in both national contexts

The Oxford Handbook of Multicultural Identity Veronica Benet-Martinez, Ying-Yi Hong, 2015-08-01 Multiculturalism is a prevalent worldwide societal phenomenon Aspects of our modern life such as migration economic globalization multicultural policies and cross border travel and communication have made intercultural contacts inevitable High numbers of multicultural individuals 23 43% of the population by some estimates can be found in many nations where migration has been strong e g Australia U S Western Europe Singapore or where there is a history of colonization e g Hong Kong Many multicultural individuals are also ethnic and cultural minorities who are descendants of immigrants majority individuals with extensive multicultural experiences or people with culturally mixed families all people for whom identification and or involvement with multiple cultures is the norm Despite the prevalence of multicultural identity and experiences until the publication of this volume there has not yet been a comprehensive review of scholarly research on the psychological underpinning of multiculturalism The Oxford Handbook of Multicultural Identity fills this void It reviews cutting edge empirical and theoretical work on the psychology of multicultural identities and experiences As a whole the volume addresses some important basic issues such as measurement of multicultural identity links between multilingualism and multiculturalism the social psychology of multiculturalism and globalization as well as applied issues such as multiculturalism in counseling education policy marketing and organizational science to mention a few This handbook will be useful for students researchers and teachers in cultural social personality developmental acculturation and ethnic psychology It can also be used as a source book in advanced undergraduate and graduate courses on identity and multiculturalism and a reference for applied psychologists and researchers in the domains of education management and marketing

Politics in the Vernacular Will Kymlicka, 2001-01-19 This volume brings together eighteen of Will Kymlicka s recent essays on nationalism multiculturalism and citizenship These essays expand on the well known theory of minority rights first developed in his Multicultural Citizenship In these new essays Kymlicka applies his theory to several pressing controversies regarding ethnic relations today responds to some of his critics and situates the debate over minority rights within the larger context of issues of nationalism democratic citizenship and globalization The essays are divided into four sections The first section summarizes the state of the debate over minority rights and explains how the debate has evolved over the past 15 years The second section explores the requirements of ethnocultural justice in a liberal democracy Kymlicka argues that the protection of

individual human rights is insufficient to ensure justice between ethnocultural groups and that minority rights must supplement human rights In particular Kymlicka explores why some form of power sharing such as federalism is often required to ensure justice for national minorities why indigenous peoples have distinctive rights relating to economic development and environmental protection and why we need to define fairer terms of integration for immigrants The third section focuses on nationalism Kymlicka discusses some of the familiar misinterpretations and preconceptions which liberals have about nationalism and defends the need to recognize that there are genuinely liberal forms of nationalism He discusses the familiar but misleading contrast between cosmopolitanism and nationalism and discusses why liberals have gradually moved towards a position that combines elements of both The final section explores how these increasing demands by ethnic and national groups for minority rights affect the practice of democratic citizenship Kymlicka surveys recent theories of citizenship and raises questions about how they are challenged by ethnocultural diversity He emphasizes the importance of education as a site of conflict between demands for accommodating ethnocultural diversity and demands for promoting the common virtues and loyalties required by democratic citizenship And finally he explores the extent to which globalization requires us to think about citizenship in more global terms or whether citizenship will remain tied to national institutions and political processes Taken together these essays make a major contribution to enriching our understanding of the theory and practice of ethnocultural relations in Western democracies

National Identity Richard R.

Verdugo, Andrew Milne, 2016-06-01 National identity has been the subject of much controversy and debate Some have even suggested dropping the concept entirely One group Essentialists argue that national identity is fixed cultural based on birth and ancestry Another viewpoint is posited by Postmodernists who argue that national identity is malleable invented or imagined As alternatives some have suggested that national identity is a hybrid of both Essentialist and Postmodernist views And still others bypass this argument and suggest that national identity should be based on civic factors such as shared values and norms about citizenship While controversy and debate are healthy exercises in any science at some point order must be established if science is to proceed The present volume is based on the idea that national identity is an ideal type concept it does not completely capture reality but is used for analytic purposes In addition rather than focusing on these theoretical debates we pursue research with the idea that results from research will contribute to the field of national identity Three areas of national identity are discussed theoretical national and individual Two chapters focus on the major theories about national identity provide critiques and make suggestions about the topic In section two six chapters provide

case studies of national identity on Scotland Ireland Russia Bosnia Herzegovina Germany and France In section three two case studies focus on immigrants and the challenges they face in forming their identities especially identifying with their host countries Belgium and the United Kingdom Several important conclusions may be gleaned from the contributions of the present volume To begin with while national identity is a slippery concept if the field wishes to move beyond debate about fundamentals it would be well advised to view the concept as an ideal type as suggested by the great German scholar Max Weber Secondly the case studies included in the present volume indicate that national identity is not only based on ethnicity and culture but on such external factors as governance regimes and their changes economic crises wars and other forms of aggressive activity and social demographic changes in a population These factors affect a population at the national level For immigrants at the individual level developing national identity is greatly affected by four interrelated factors 1 the degree to which they are accepted by members of the host society 2 immigrants language skills and physical appearances 3 how well they are able to balance their host national identity their ethnic identity and acceptance of their native country 4 and their generational status Generally at the national and individual levels context and circumstances matter in developing national identity
