Politics Of Transport In Twentieth Century France:

The Politics of Transport in Twentieth-century France Joseph Jones, 1984 Few aspects of economic development have had such a widespread or profound impact on the reshaping of contemporary France as transportation As a result transport policy has brought many of the major social forces into conflict Monopolistic railway companies closely aligned with the banks combated the defenders of the regions and small towns The fiercely independent truckers and barge haulers proponents of the small family firm collided with the forces of the state Apostles of the transatlantic gospel of free enterprise and technical progress clashed with supporters of a planned socialist society

Politics of Transport in Twentieth-Century France Joseph Jones, 1984-07-01 Joseph Jones's study focuses on the period since World War I In these years the stability of the transport world was shaken by the effect of automobile competition upon the railways near monopoly A republican tradition based on fear of monopoly and protection of local facilities had emerged in the era when rail was king In the 1930s and 1940s transport policy became a tug of war between supporters of this tradition and those who felt that a new approach was needed to cope with competition economic depression and war Legislative proposals led to heated discussion as railway companies car manufacturers truckers oil companies small business local authorities and trade unions fought to defend their interests Dr Jones's study of these conflicts based upon extensive archival research illustrates the tension between state planning economic liberalism which has been the central issue in economic policy in twentieth century France

Transport Revolutions Richard Gilbert, Anthony Perl, 2018-10-24 First released in 2007 the bestselling *Transport Revolutions* argued that land transport in the first half of the 21st century will feature at least two revolutions One will involve the use of electric drives rather than internal combustion engines Another will involve powering many of these drives directly from the electric grid as trains and trolley buses are powered today rather than from on board fuel Now available for the first time in paperback and updated with the most recent data it sets out the challenges to our growing dependence on transport fuelled by low priced oil These challenges include an early peak in world oil production and profound climate change resulting in part from oil use It proposes responses to ensure effective secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts Synthesizing engineering economics environment organization policy and technology in a detailed yet highly readable style *Transport Revolutions* is essential reading for anyone working studying or interested in transport and the environment

Fellow Travellers Thomas Beaumont, 2019 *Fellow Travellers* considers the origins and development of the Communist presence among French railway workers how Communist activists adapted to the particular environment of railway industrial relations and examines the foundations of what was to become one of the most powerful and enduring constituencies of Communist support in modern France

[Planning the French Canals](#) Reed G. Geiger, 1994 Finally in a comparative framework the debate over the canals led to an examination of the inadequacy of a British model and to a rehearsal of the arguments about state economic policy

that the next generation would revive **Last Train to Auschwitz** Sarah Federman, 2021-05-25 2022 Nautilus Book Awards Silver Award Winner for Journalism and Investigative Reporting **New Departures** Anthony Perl, 2014-10-17 North America faces a transportation crisis Gas guzzling SUVs clog the highways and air travelers face delays cancellations and uncertainty in the wake of unprecedented terrorist attacks New Departures closely examines the options for improving intercity passenger trains capacity to move North Americans where they want to go While Amtrak and VIA Rail Canada face intense pressure to transform themselves into successful commercial enterprises Anthony Perl demonstrates how public policy changes lie behind the triumphs of European and Japanese high speed rail passenger innovations Perl goes beyond merely describing these achievements translating their implications into a North American institutional and political context and diagnosing the obstacles that have made renewing passenger trains so much more difficult in North America than elsewhere New Departures links the lessons behind rail passenger revitalization abroad with the opportunity to recast the policies that constrain Amtrak and VIA Rail from providing efficient and effective intercity transportation Modernizing Tradition Adam C. Stanley, 2008-12-15 In the turbulent decades after World War I both France and Germany sought to return to an idealized prewar past Many people believed they could recapture a sense of order and stability by reinstituting traditional gender roles which the war had thrown off balance While French and German women necessarily filled men s roles in factories and other jobs during the war those who continued to lead active working lives after World War I risked being called modern women Far from a compliment this derogatory label encompassed everything society found threatening about women s new place in public life smoking working women who preferred independence and sexual freedom to a traditional role in the home Society felt threatened by the image of the modern woman yet also realized that conceptions of femininity needed to accommodate the cultural changes brought about by the Great War In Modernizing Tradition Adam C Stanley explores how interwar French and German popular culture used commercial images to redefine femininity in a way that granted women some access to modern life without encouraging the assertion of female independence Examining advertisements articles and cartoons as well as department store publicity materials from the popular press of each nation Stanley reveals how the media attempted to convince women that with the help of newly available consumer goods such as washing machines refrigerators and vacuum cleaners being a mother or a housewife could be empowering even liberating A life devoted to the home these images promised need not be an unmitigated return to old fashioned tradition but could offer a rewarding lifestyle based on the wonders and benefits of modern technology Stanley shows that the media carefully limited women s association with modernity to those activities that reinforced women s traditional roles or highlighted their continued dependence on masculine guidance expertise and authority In this cross national study Stanley brings into sharp relief issues of gender and consumerism and reveals that despite the larger political differences between France and Germany gender ideals in the two countries remained virtually identical between the world wars That these concepts of

gender stayed static over the course of two decades years when nearly every other aspect of society and culture seemed to be in constant flux attests to their extraordinary power as a force in French and German society **France's Long Reconstruction** Herrick Chapman,2018-01-08 Postwar recovery required a transformation of France but what form it should take remained a question Herrick Chapman charts the course of France s reconstruction from 1944 to 1962 offering insights into the ways the expansion of state power produced fierce controversies at home and unintended consequences abroad in France s crumbling empire **The Radiance of France, new edition** Gabrielle Hecht,2009-07-31 How it happened that technological prowess and national glory or radiance which also means radiation in French became synonymous in France as nowhere else In the aftermath of World War II as France sought a distinctive role for itself in the modern postcolonial world the nation and its leaders enthusiastically embraced large technological projects in general and nuclear power in particular The Radiance of France asks how it happened that technological prowess and national glory or radiance which also means radiation in French became synonymous in France as nowhere else To answer this question Gabrielle Hecht has forged an innovative combination of technology studies and cultural and political history in a book that as Michel Callon writes in the new foreword to this edition not only sheds new light on the role of technology in the construction of national identities but is also a seminal contribution to the history of contemporary France Proposing the concept of technopolitical regime as a way to analyze the social political cultural and technological dynamics among engineering elites unionized workers and rural communities Hecht shows how the history of France s first generation of nuclear reactors is also a history of the multiple meanings of nationalism from the postwar period and France s desire for post Vichy redemption to 1969 and the adoption of a Frenchified American design This paperback edition of Hecht s groundbreaking book includes both Callon s foreword and an afterword by the author in which she brings the story up to date and reflects on such recent developments as the 2007 French presidential election the promotion of nuclear power as the solution to climate change and France s aggressive exporting of nuclear technology **Bibliography of European Economic and Social History** Derek Howard Aldcroft,Richard Rodger,1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily *Compagnies Des Chemins de Fer Et Leurs Structures D'organisation* Clara Eugenia Núñez,1998 [The Economic and Social Effects of the Spread of Motor Vehicles](#) Theo Barker,2016-07-27 **Canadiana** ,1984 **The Performance of European Business in the Twentieth Century** Youssef Cassis,Andrea Colli,Harm G. Schröter,2016 This book provides the first attempt to measure European business performance over the Twentieth Century The book s findings confirm and inform widely held assumptions

regarding business performance regarding strategy and structure ownership and control old and new industries emerging and advanced economies **Psychoanalysis and the family in twentieth-century France** Richard Bates, 2022-02-08 In the last quarter of the twentieth century if French people had a parenting problem or dilemma there was one person they consulted above all Fran oise Dolto 1908 88 But who was Dolto How did she achieve a position of such influence What ideas did she communicate to the French public This book connects the story of Dolto s rise to two broader histories the dramatic growth of psychoanalysis in postwar France and the long running debate over the family and the proper role of women in society It shows that Dolto s continued reputation in France as a liberal and enlightened educational thinker is at best only partially deserved and that conservative and anti feminist ideas often underpinned her prominent public interventions While Dolto retains the status of a national treasure her career has had far reaching and sometimes harmful repercussions for French society particularly in the treatment of autism **Queen's Quarterly** ,1984 Twentieth-century France, Social, Intellectual, Territorial Matilda Betham-Edwards, 1917 *Britain, 1846-1919* Jocelyn Hunt, 2013-10-18 Britain 1846 1919 is an exciting new approach to teaching and learning late nineteenth and early twentieth century British History at A Level up to and including the First World War It meets the needs of teachers and students studying for today s new AS level exams In a unique style Britain 1846 1919 focuses on the key topics within the period Each topic is comprehensively explored to provide background essay writing advice and examples source work and historical skills exercises From 1846 to 1919 the key topics featured include the Age of the Railways Public Health and Social Policy Gladstone and Disraeli at home and abroad the Irish Question the Liberal and Coalition Ministries in the early twentieth century Using essay styles and source exercises from each of the exam boards AQA Edexcel and OCR this book is an essential text for students and teachers *Private and Public Enterprise in Europe* Robert Millward, 2007
