Teitz, 2020-02-18 Rent control the governmental regulation of the level of payment and tenure rights for rental housing occupies a small but unique niche within the broad domain of public regulation of markets The price of housing cannot be regulated by establishing a single price for a given level of quality as other commodities such as electricity and sugar have been regulated at various times Rent regulation requires that a price level be established for each individual housing unit which in turn implies a level of complexity in structure and oversight that is unequalled Housing provides a sense of security defines our financial and emotional well being and influences our self definition Not surprisingly attempts to regulate its price arouse intense controversy Residential rent control is praised as a guarantor of affordable housing excoriated as an indefensible distortion of the market and both admired and feared as an attempt to transform the very meaning of housing

Community Matters Margot Kempers, 2001 Community Matters is unique in its use of a contextualized interactionist approach to analyze the nature and extent of community Its theoretical discussion of community as process is expanded through the inclusion of arguments raised in political science and philosophy and is balanced by descriptive analyses of a diverse selection of communities This book helps bridge the divide between works of academic argument concerning civil society and community life and books explicitly focused on presenting practical information on what is and is not effective in community work Community Matters shifts attention away from a conceptualization of community as a fixed evolutionary stage identified with specific types of settings and instead provides numerous illustrations of the dynamic quality of social ties and community life This book convinces readers that they can and should study community and community matters A Burnham Publishers book

The American Housing Question Randolph Hohle, 2021-10-20 The American Housing Question reframes the question of affordable housing through the concepts of urban citizenship and racism Randolph Hohle argues that when we consider who benefits from affordable housing we end up with a complex story of inclusion and exclusion and of privilege and mobility centered around race and social class Historically affordable housing s underlying logic was to create the conditions for white people to exercise the privilege of mobility Affordable housing policy was first and foremost about granting white people the ability to live in racially segregated neighborhoods within and across urban areas When the beneficiaries of affordable housing policy were predominately white the state proceeded with a comprehensive and multifaceted plan to supply housing including public housing subsidizing the construction of market rate housing rental vouchers and rent control The white response to the Civil Rights era the precursor to neoliberal urban policy privatized public housing switched the responsibility to provide affordable housing to the market and created the conditions for the financialization of housing in the twenty first century that have made housing unaffordable for everyone As the author aptly demonstrates solving America s housing question means addressing both racism and revaluing the notion of the public

The Homevoter Hypothesis William A. Fischel, 2009-07-01 The link between homeownership and political involvement Fischel argues explains several puzzles such as why displacement of local taxation by state funds reduces school quality and why local governments are more efficient providers of environmental amenities He calls for decentralization of the fiscal and regulatory functions of government Congressional Record United States.

Congress,1977 **A World More Concrete** N.D.B. Connolly,2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period In *A World More Concrete* N D B Connolly uses the history of South Florida to unearth an older and far more complex story Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy Using a materialist approach he offers a long view of capitalism and the color line following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century *A World More Concrete* argues that black and white landlords entrepreneurs and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth Through a political culture built on real estate South Florida s landlords and homeowners advanced property rights and white property rights especially at the expense of more inclusive visions of equality For black people and many of their white allies uses of eminent domain helped to harden class and color lines Yet for many reformers confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions to undermine the neighborhood influence of powerful slumlords and to open new opportunities for suburban life for black Floridians Concerned more with winners and losers than with heroes and villains *A World More Concrete* offers a sober assessment of money and power in Jim Crow America It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve revealing property owners power to reshape American cities in ways that can still be seen and felt today
