Portico, 2000 **Sprawling Places** David Kolb, 2010-01-25 People often bemoan the spread of malls, suburban strips, subdivisions, and other sprawling places in contemporary America. But are these places as bad as critics claim? In *Sprawling Places*, David Kolb questions widely held assumptions about our built environments. Kolb agrees there is a lot not to like about many contemporary places, but to write them off simply as commodified nonplaces does not treat them critically. Too often, Kolb says, aesthetic character and urban authenticity are the focus of critics when it is more important to understand a place's complexity and connectedness. Kolb acknowledges that the places around us increasingly have banal exteriors, yet they can be complex and can encourage their inhabitants to use them in multiple, nonlinear ways. Ultimately, Kolb believes human activity within a place is what defines it. Even our most idealized classical places, he shows, change over the course of history when subjected to new linkages and different flows of activity. Engaging with the work of such writers and critics as Henri Lefebvre, Manuel Castells, Karsten Harries, and Christian Norberg-Schulz, Kolb seeks to move discussions about sprawl away from the idea that we must choose between being rooted in the local Black Forest soil or wandering in directionless space. By increasing our awareness of complexity and other issues, Kolb hopes to broaden and deepen people's thinking about the contemporary built environment and to encourage better designs in the future.

The Working Landscape Peter F. Cannavo, 2007-06-22 In America today we see rampant development unsustainable resource exploitation and commodification ruin both natural and built landscapes disconnecting us from our surroundings and threatening our fundamental sense of place Meanwhile preservationists often respond with a counterproductive stance that rejects virtually any change in the landscape In *The Working Landscape* Peter Cannav identifies this zero sum conflict between development and preservation as a major factor behind our contemporary crisis of place Cannav offers practical and theoretical alternatives to this deadlocked polarized politics of place by proposing an approach that embraces both change and stability and unifies democratic and ecological values creating a working landscape Place Cannav argues is not just an object but an essential human practice that involves the physical and conceptual organization of our surroundings into a coherent enduring landscape This practice must balance development which he calls founding and preservation Three case studies illustrate the polarizing development preservation conflict the debate over the logging of old growth forests in the Pacific Northwest the problem of urban sprawl and the redevelopment of the former site of the World Trade Center in New York City Cannav suggests that regional democratic governance is the best framework for integrating development and preservation and he presents specific policy recommendations that aim to create a working landscape in rural suburban and urban areas A postscript on the mass exile displacement and homelessness caused by Hurricane Katrina considers the implications of future climate change for the practice of place

Managing the Magic of Old Places Jeremy Wells, 2025-10-14 From 1849 to the early 1980s the development of US historic preservation policy was shaped by fewer than one hundred elite White men from Europe and America This orthodox preservation doctrine has too long silenced the vibrant experiential relationships between everyday people and their heritage *Managing the Magic of Old Places* Crafting Public Policies for People Centered Historic Preservation offers a radical rethinking of how historic preservation is approached in the United States Author Jeremy C Wells argues for a revolutionary shift in federal preservation policy one that embraces community based participatory practice and draws from environmental psychology to tap into the intangible emotional connections people have with old places Wells highlights the experiential values that laypeople often ascribe to historic environments which are frequently dismissed by expert driven policies He contends that if historic preservation policy continues to ignore these aspects the field will lose relevance as the gap between professionals

and the public widens Drawing from interdisciplinary research in the social sciences particularly phenomenology and environmental psychology Wells s vision of public preservation policy centers the lived experiences of communities reinvigorating the field and ensuring that the preservation of historic places resonates with a wider more inclusive audience Wells positions his work within the growing field of critical heritage studies yet his focus on the psychological and emotional aspects of preservation distinguishes it as a unique contribution By placing the needs and experiences of the public at the heart of preservation efforts Wells critiques the historical foundations of US preservation policy while offering a bold agenda for reform

Shaping Places David Adams,Steven Tiesdell,2013 *Shaping Places* explains how towns and cities can turn real estate development to their advantage to create the kind of places where people want to live work relax and invest It contends that the production of quality places which enhance economic prosperity social cohesion and environmental sustainability require a transformation of market outcomes The core of the book explores why this is essential and how it can be delivered by linking a clear vision for the future with the necessary means to achieve it Crucially the book argues that public authorities should seek to shape regulate and stimulate real estate development so that developers landowners and funders see real benefit in creating better places Key to this is seeing planners as market actors whose potential to shape the built environment depends on their capacity to understand and transform the embedded attitudes and practices of other market actors This requires planners to be skilled in understanding the political economy of real estate development and successful in changing its outcomes through smart intervention Drawing on a strong theoretical framework the book reveals how the future of places will come to be shaped through constant interaction between State and market power Filled with international examples essential case studies color diagrams and photographs this is essential reading for undergraduate and graduate students taking planning property real estate or urban design courses as well as for social science students more widely who wish to know how the shaping of place really occurs
