ABSTRACT: In the almost twenty years since Vasarhelyi and Halper (1991) reported on their pioneering implementation of what has come to be known as Continuous Auditing (CA), the concept has increasingly moved from theory into practice. A 2006 survey by PricewaterhouseCoopers shows that half of all responding firms use some sort of CA techniques, and the majority of the rest plan to do so in the near future. CA not only has an increasing impact on auditing practice, but is also one of the rare instances in which such a significant change was led by the researchers. In this paper we survey the state of CA after two decades of research into continuous auditing theory and practice, and draw out the lessons learned by us in recent pilot CA projects at two major firms, to examine where this unique partnership between academics and auditors will take CA in the future.

Keywords: continuous auditing; internal audit; audit systems.

I. INTRODUCTION

Two decades have now passed since the work started on the first large-scale commercial continuous auditing project reported in the original paper by Vasarhelyi and Halper (1991). That project at Bell Laboratories relied on the groundbreaking information technology of the day (PCs, databases, corporate networks, but not yet the Internet) to assure the reliability of the AT&T large billing systems through the automated acquisition and analysis of data and the electronic communication of alarms. Already that first project clearly demonstrated that the ultimate point of continuous auditing (CA) is to bring auditing closer to the operational process, and away from the traditional backward-looking once-a-year examination of financial statements.

This paper draws on the lessons obtained from work on CA at major Fortune 100 firms, led by the authors working in close collaboration with the internal audit departments of the clients. While case studies of some of these implementations have been published elsewhere (Alles et al. 2006, 2007), this paper steps back to draw the broader insights they offer about the emerging conceptual model of continuous assurance. These studies were particularly

Accountability and Effectiveness Evaluation in Nonprofit Organizations James Cutt, Vic Murray, 2000-07-06 This unique volume provides new perspectives on assessing the performance of nonprofit organizations whilst meeting the information needs of decision makers both internal such as resource providers regulators and clients and external including boards managers staff and volunteers Whilst most discussions of accountability focus exclusively on financial accountability this title offers a significant contribution to a relatively untouched area by combining the treatment of both evaluation and accountability from a managerial perspective With increased interest in the concept that nonprofit organizations must be accountable this topical volume fills a gap in the literature that postgraduates and scholars of business studies and management will find invaluable

Audit Effectiveness Kamil Omoteso, 2016-04-08 In Audit Effectiveness Dr Kamil Omoteso examines how information technology is changing the landscape for the audit profession as IT tools and techniques continue to be developed for auditors in the pursuit of quality efficiency and effectiveness In addition to shedding light on practical subjects such as audit automation continuous online auditing and computer auditing this book introduces some theory that helps explain the motivation for the use of new tools and techniques and assists understanding of their impact on the quality of audit judgment The book proposes a three layered model an integration of contingency socio technical systems and structuration theories for a comprehensive understanding of IT s impact on audit The model advocates that the use of IT in audits is a function of certain contingent factors that determine an optimal mix of human skills and technological capabilities which would lead to changes in the nature of auditors roles and outputs and audit organisations structures Dr Omoteso puts forward an audit automation maturity model that can help audit firms departments to understand their current level of IT integration and how to systematically enhance their capabilities with a view to meeting modern IT challenges taking them from the position of mere followers of technology to that of effective leaders of technology Audit Effectiveness is for anyone practising in auditing or accounting automation as well as for those with an academic or research interest in the challenges posed by technological advances for auditors in particular and for managers in general

Children, Young People and Families Steven Walker, 2012-08-16 With case studies interactive activities summaries and guidance throughout this book looks at the changing context of children and young people's services heralded by the structural organizational and funding changes put forward in Eileen Munro's Review of Child Protection. It is strongly grounded in research and theory and gives specific consideration to how systems theory can help practitioners in understanding families. It highlights the need for every social work practitioner to develop the capacity to undertake unified assessments and interventions in a wide variety of settings with individuals, families and groups where there are child protection and safeguarding concerns.

Use of Property Rights in Fisheries Management Ross Shotton, 2000 The session was closed with papers that provided a prognosis on the future development of property rights in fisheries management. Thus the conference papers addressed the theory and application of property.

Governance, Stewardship and Sustainability George Dallas, Mike Lubrano, 2022-11-10 The first introductory practical guide of its kind, this book brings together principles of corporate governance, investor stewardship and enterprise sustainability in the context of institutional investment. Stewardship codes are developing in diverse markets to provide a framework for responsible institutional investment practices and fiduciary duties for beneficiaries. While codes provide a starting point, the application of stewardship in practical terms can be challenging for many institutional investors. Written by two well-known corporate governance experts, George Dallas and Mike Lubrano, and based on the ICGN training course on stewardship that they developed, this book gives needed clarity, rigor and guidance to practitioners about what we know and don't know about stewardship, governance and sustainability. It explores the theoretical foundations of stewardship, linking these to day-to-day decision making and providing real-life examples and practical tools to evaluate issues that arise for companies from an environmental, social and governance perspective and generate ideas about how to make investor stewardship a practical reality in similar cases. Investor stewardship and ESG professionals, portfolio managers, senior managers, regulators and finance students will appreciate this unique guide to developing, refining and operationalising investor stewardship capabilities in line with the respected and internationally recognised ICGN policy framework.
