Journalism in the United States Edd Applegate, 2011-05-19 Print and broadcast journalism in the United States have changed in recent years as a result of millions of people using the Internet and social media for obtaining some or most of the information they desire So notes professor of journalism Edd Applegate who after surveying the decline in circulation and advertising revenues of newspapers and broadcast and radio news stations and the rise of cable news and website journalism outlines in Journalism in the United States Concepts and Issues the effect of this sea of change on key matters in journalism today In this work Applegate updates readers on the current conditions of the print and broadcast industries with chapters on a variety of topics from theories of the press to the structure of the print and broadcast industries from the role of advertising and public relations to the role of the changing view of the press views of and commitments to objectivity and news balance Throughout Applegate obliges readers to wrestle with how the change in medium from print or broadcast to Web is not the main culprit in how the news has changed Instead he illustrates how many of the core issues remain unchanged and what is needed is a more complex analysis of core concepts and issues and how these have been affected from freedom of the press to the treatment of minorities by the evolution of news as a business and the education of journalists today for that business With a selected bibliography and an index to assist the reader this book is a wonderful text for upper level undergraduates graduates and college faculty with journalism or mass communications courses as well as for academic libraries

Nation, Ethnicity and Race on Russian Television Stephen Hutchings, Vera Tolz, 2015-03-05 Russia one of the most ethno culturally diverse countries in the world provides a rich case study on how globalisation and associated international trends are disrupting and causing the radical rethinking of

approaches to inter ethnic cohesion The book highlights the importance of television broadcasting in shaping national discourse and the place of ethno cultural diversity within it It argues that television s role here has been reinforced rather than diminished by the rise of new media technologies Through an analysis of a wide range of news and other television programmes the book shows how the covert meanings of discourse on a particular issue can diverge from the overt significance attributed to it just as the impact of that discourse may not conform with the original aims of the broadcasters The book discusses the tension between the imperative to maintain security through centralised government and overall national cohesion that Russia shares with other European states and the need to remain sensitive to and to accommodate the needs and perspectives of ethnic minorities and labour migrants It compares the increasingly isolationist popular ethnonationalism in Russia which harks back to old fashioned values with the similar rise of the Tea Party in the United States and the UK Independence Party in Britain Throughout this extremely rich well argued book complicates and challenges received wisdom on Russia s recent descent into authoritarianism It points to a regime struggling to negotiate the dilemmas it faces given its Soviet legacy of ethnic particularism weak civil society large native Muslim population and overbearing yet far from entirely effective state control of the media

A Piece of the Action Eithne Quinn,2019-12-31 Hollywood is often thought of and certainly by Hollywood itself as a progressive haven However in the decade after the passage of the Civil Rights Act the film industry grew deeply conservative when it came to conflicts over racial justice Amid black self assertion and white backlash many of the most heated struggles in film were fought over employment In *A Piece of the Action* Eithne Quinn reveals how Hollywood catalyzed wider racial politics through representation on screen as well as in battles over jobs and resources behind the scenes Based on extensive archival research and detailed discussions of films like *In the Heat of the Night* *Sweet*

Sweetback's Baadasssss Song Super Fly Claudine and Blue Collar this volume considers how issues of race and labor played out on the screen during the tumultuous early years of affirmative action Quinn charts how black actors leveraged their performance capital to force meaningful changes to employment and film content She examines the emergence of Sidney Poitier and other African Americans as A list stars the careers of black filmmakers such as Melvin Van Peebles and Ossie Davis and attempts by the federal government and black advocacy groups to integrate cinema Quinn also highlights the limits of Hollywood's liberalism showing how predominantly white filmmakers executives and unions hid the persistence of racism behind feel good stories and public relations avowals of tolerance A rigorous analysis of the deeply rooted patterns of racial exclusion in American cinema A Piece of the Action sheds light on why conservative and corporate responses to antiracist and labor activism remain pervasive in today's Hollywood

The Digital Border Lilie Chouliaraki, Myria Georgiou, 2022-06-21 How do digital technologies shape the experiences and meanings of migration As the numbers of people fleeing war poverty and environmental disaster reach unprecedented levels worldwide states also step up their mechanisms of border control In this they rely on digital technologies big data artificial intelligence social media platforms and institutional journalism to manage not only the flow of people at crossing points but also the flow of stories and images of human mobility that circulate among their publics What is the role of digital technologies in shaping migration today How do digital infrastructures platforms and institutions control the flow of people at the border And how do they also control the public narratives of migration as a crisis Finally how do migrants themselves use these same platforms to speak back and make themselves heard in the face of hardship and hostility Taking their case studies from the biggest migration event of the twenty first century in the West the 2015 European migration crisis and its aftermath up to 2020 Lilie Chouliaraki and Myria Georgiou offer a holistic account of the digital border as an expansive assemblage of technological infrastructures from surveillance cameras to smartphones and media imaginaries stories images social media posts to tell the story of migration as it unfolds in Europe's outer islands as much as its most vibrant cities This is a story of exclusion marginalization and violence but also of care conviviality and solidarity Through it the border emerges neither as strictly digital nor as totally controlling Rather the authors argue the digital border is both digital and pre digital datafied and embodied automated and self reflexive undercut by competing emotions desires and judgments and traversed by fluid and fragile social relationships relationships that entail both the despair of inhumanity and the promise of a better future
