Integrating Research and Practice Institute of Medicine, Roundtable on Value and Science-Driven Health Care, 2015-03-04 Health care has been called one of the most complex sectors of the U.S. economy Driven largely by robust innovation in treatments and interventions this complexity has created an increased need for evidence about what works best for whom in order to inform decisions that lead to safe efficient effective and affordable care As health care becomes more digital clinical datasets are becoming larger and more numerous By realizing the potential of knowledge generation that is more closely integrated with the practice of care it should be possible not only to produce more usable evidence to inform decisions but also to increase the efficiency and decrease the costs of doing clinical research Patient Centered Clinical Research Network or PCORnet is a nation wide patient centered clinical research network intended to form a resource of clinical administrative and patient data that can be used to carry out observational and interventional research studies and enhance the use of clinical data to advance the learning health care system The primary goal of the first phase of PCORnet will be to establish the data infrastructure necessary to do such research In April and June 2014 the Institute of Medicine's Roundtable on Value and Science-Driven Health Care convened two workshops aimed at accelerating progress toward real time knowledge generation through the seamless integration of clinical practice and research one of the fundamental concepts of a continuously learning health system centered on the development of the PCORnet The first workshop brought together health care system leaders both administrative and clinical and researchers to consider issues and strategic priorities for building a successful and durable clinical research network and facilitate progress toward a continuously learning health care system more broadly including issues related to science technology ethics business regulatory oversight sustainability and governance The second workshop focused on implementation approaches Health system CEOs convened to consider strategic priorities and explore approaches to implementation These workshops will inform the decisions of field leaders moving forward including PCORI the PCORnet

steering committee and PCORnet grantees Integrating Research and Practice is the summary of the presentations and discussions of the workshops

Advances in Research and Treatment for Alzheimer's Disease Samuel Barrack, 2012-01-30 Alzheimer's disease AD is the most common form of dementia There is no cure for the disease which worsens as it progresses and eventually leads to death The cause and progression of Alzheimer's disease are not well understood Research indicates that the disease is associated with plaques and tangles in the brain Current treatments only help with the symptoms of the disease There are no available treatments that stop or reverse the progression of the disease As of 2012 more than 1000 clinical trials have been or are being conducted to find ways to treat the disease but it is unknown if any of the tested treatments will work Because AD cannot be cured and is degenerative the sufferer relies on others for assistance The role of the main caregiver is often taken by the spouse or a close relative Alzheimer's disease is known for placing a great burden on caregivers the pressures can be wide ranging involving social psychological physical and economic elements of the caregiver's life In developed countries AD is one of the most costly diseases to society Research is the only hope to present and future patients and families suffering from this devastating disorder This book compiles some of the most interesting articles on Alzheimer's disease published by PLoS journals lately from epidemiology and prevention to management and treatment
