Research In Global Strategic Management Vol 6:

Regional and Global Multinationals Christoph Czychon, 2021-06-29 Based on their ability to facilitate interdependencies across the borders of national and regional markets multinationals enterprises MNEs act as the key drivers of world trade and investment activities While recent global challenges additionally highlight the need to explain and assess the status and progress of internationality regionality previous research renders the concept of firm level globalization as a special but not the general case Christoph Czychon dedicates specific attention to the research on regional and global MNEs based on an extensive and rigorous review of the existing academic literature as well as the analysis of 2005 2015 empirical data from the European context with a focus on CAC40 and DAX30 listed firms In doing so the author offers insights and results that stand in contrast to the original narrative of the debate and presents a comprehensive and updated perspective on regional and global MNEs

Global Aspects of Reputation and Strategic Management David Deephhouse, Naomi Gardberg, William Newburry, 2019-07-16 Our grasp of reputation as a strategic asset would benefit from a better understanding of how country level factors influence reputation development as well as how reputation obtained in one context can be transferred to another This volume of Research in Global Strategic Management focuses on global aspects of reputation in strategic management

The Oxford Handbook of International Business Alan M. Rugman, 2003 This handbook synthesises some literature of the last 40 years in 28 chapters The coverage is split into the following areas the history and theory of the multinational enterprise the political and policy environment of international business

Multinational Firms' Location and the New Economic Geography Jean Louis Mucchielli, Thierry Mayer, 2004-01-01 The choice of location for the production plants of multinational firms is an important issue not least because this decision is accompanied by so many fears brought into public debate This book analyses how foreign direct investors choose their locations whilst exploring the forces which shape international economic geography Although these two issues are to some extent inter related researchers have only recently acknowledged the similarity of economic geography and international business approaches to the empirical assessment of likely causes of the degree of spatial concentration observed in many modern industries Giving insight into the direction that future research should take this book contains state of the art papers on both theoretical and empirical levels This original collection makes a particularly important contribution to our understanding of the existence and impact of home market effects Introducing a welcome synthesis between two related and yet rarely integrated areas of study using case studies of firms in Europe US MNEs and the Mexican automobile industry this book will be welcomed by both academic and practising economists Regional scientists and

Industrial Clusters John F. Wilson, Chris Corker, Joe Lane, 2022-07-01 Industrial Clusters shows the latest state of knowledge on the topic of industrial clusters with a particular focus on clustering in the UK bringing together a chronological coverage of the phenomenon This set of original essays by a group of leading business and industrial historians offers fresh

perspectives about clusters and clustering A primary emphasis of the collection is how knowledge is generated and disseminated across a cluster and whether these processes stimulated innovation and consequently longer term sustainability This analysis also prompts questions about which unit of analysis to examine from the entrepreneurs and firms they created through to the industry as a whole and district in which they are located or whether one should look outside the region for explanatory factors Covering regions as diverse as North Wales the Scottish Highlands the City of London the Potteries Sheffield and Lancashire the essays have been channelled to provide a detailed understanding of these issues The editors have also provided a challenging Conclusion that suggests a new research agenda that could well unravel some of the mysteries associated with clustering This edited collection will be of interest to international researchers academics and students in the fields of business and management history innovation industrialisation and clusters

Trading Places--SMEs in the Global Economy Lester Lloyd-Reason, Leigh Sear, 2007-01-01 There are 18 contributions in the book all of whom are very highly regarded in the fields of entrepreneurship and international management the book is well researched and edited The book provides an excellent discussion on the importance of SMEs in the global economy Through a number of different case study examples and discussion of various elements of the internationalization process this book provides an outstanding resource for the study of SMEs that operate in the international market Vanessa Ratten Journal of International Entrepreneurship This book is most timely It arrives at a time when globalisation and new technologies present major opportunities and challenges to the

role of the independent small and medium sized business in economies The book's strength in dealing with many of the emerging issues is underpinned by a truly international range of contributors with a strong mix of practical as well as academic experience From the preface by Allan Gibb Professor Emeritus Durham University UK Lester Lloyd Reason and Leigh Sear bring together leading researchers and thinkers in this critical guide to the ongoing worldwide research shaping the role played by SMEs within today's global economy The expert contributors contend that the past twenty years have seen an explosion in research into international SMEs resulting in a considerable body of academic literature and thinking This research they argue may merely serve to increase our lack of understanding in this area and often results in myths and misconceptions upon which SME policies and support programmes have been developed and introduced They go on to suggest that academic models are often poorly suited to the problems faced by SMEs within the international trading environment In many instances the contributors find SMEs at the vanguard of the challenge to accepted business practices it is these challenges that underpin the text Illustrating that today's SMEs are faced with the critical issue of how to create and maintain a sustainable competitive advantage in light of the increased complexity of international trade and global business linkages this Handbook will prove invaluable to both academics and practitioners involved in business and management and entrepreneurship

EBOOK: Managing Brands LAFORET, SYLVIE, 2009-12-16 **EBOOK Managing Brands** **Electronic Journal of Information Systems Evaluation** Delft University of Technology, **The Marketing / Accounting Interface** Robin Roslender, Richard M.S. Wilson, 2013-09-13 When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the Journal of Marketing Management **The Future of Foreign Direct Investment and the Multinational Enterprise** Ravi Ramamurti, Niron Hashai, 2011-04-27 This Festschrift
