Research In Law Policy Studies Volume 4 1:

Reconstructing Law and Justice in a Postcolony Nonso Okafo, 2016-04-08 Drawing on data from a cross section of postcolonial nations across the world and on a detailed case study of Nigeria this book examines the experience of recreating law and justice in postcolonial societies The author s definition of postcolonial societies includes countries that have emerged from external colonial rule such as Nigeria and India as well as societies that have overcome internal dominations such as Afghanistan and Iraq Suggesting that restructuring a system of law and justice must involve a consideration of the traditions customs and native laws of a society as well as the official often foreign rules this volume examines how ethnically complex nations resolve disputes whether criminal or civil through a combination of formal and informal social control systems This book is unique in its concern with how the average citizens of a postcolonial society can play more active parts in their nation s law and justice and how modern and increasingly urban societies can learn from indigenous peoples and institutions which are more informal in their approaches to problem solving The concluding chapter looks at the possibility of an increased role for civil as opposed to criminal response in the social control system of a postcolonial society **Policy Reconsidered**

Susan M. Hodgson, Zoë Irving, 2007-11-21 Identifies key topics within the policy arena and subjects them to sustained theoretical and practical appraisal This book explores the development of the meaning and language of policy and examines its practice from the micro to the supra national levels using case studies to demonstrate how policy is contested shaped and accounted for EU Neighbourhood Policy in the Maghreb Iole Fontana, 2017-04-07 This book analyses how the EU s

external policies are implemented in the domestic context of the recipient countries in this case Tunisia and Morocco By departing from the analysis of local actors it explains the factors that in terms of obstacles and facilitating conditions affect implementation on the ground **Middle East and Europe** B. A. Roberson, 2005-06-23 Leading commentators on Europe

and the Middle East explore many of the key issues which have informed the relationship between the two regions Ranging from Europe s colonial legacies to an uncertain economic future in the region the book covers the Cold War and after the profound influence of the US the rise of political Islam case studies including Europe and the Iranian revolution France s experiences in Algeria and Turkey s position between the two regions The EU it is argued has more influence over economic strategies than security issues in the Middle East These strategies have in turn promoted stability in the form of free trade zones ensuring vital economic development between the Middle East and Europe **Prisoners of the Past** Steven

Friedman, 2021-06-01 Building on the work of economic historian Douglass North and Ugandan political scholar Mahmood Mamdani Friedman argues that the difficulties besetting South African democracy are legacies of the past not products of the post 1994 era South Africa s democracy is often seen as a story of bright beginnings gone astray a pattern said to be common to Africa The negotiated settlement of 1994 it is claimed ended racial domination and created the foundation for a prosperous democracy but greedy politicians betrayed the promise of a new society In Prisoners of the Past Steven Friedman

astutely argues that this misreads the nature of contemporary South Africa Building on the work of the economic historian Douglass North and the political thinker Mahmood Mamdani Friedman shows that South African democracy's difficulties are legacies of the pre 1994 past The settlement which ushered in majority rule left intact core features of the apartheid economy and society The economy continues to exclude millions from its benefits while racial hierarchies have proved stubborn apartheid is discredited but the values of the pre 1948 colonial era the period of British colonization still dominate Thus South Africa's democracy supports free elections civil liberties and the rule of law but also continues past patterns of exclusion and domination Friedman reasons that this path dependence is not as is often claimed the result of constitutional compromises in 1994 that left domination untouched This bargain was flawed because it brought not too much compromise but too little Compromises extended political citizenship to all but there were no similar bargains on economic and cultural change Using the work of the radical sociologist Harold Wolpe Friedman shows that only negotiations on a new economy and society can free South Africans from the prison of the past
