*The Political Economy of the Gulf Sovereign Wealth Funds* Sara Bazoobandi, 2013. Using four Gulf sovereign wealth funds as case studies: Iran, Kuwait, Saudi Arabia and the UAE, this book examines and analyses the history, governance and structure and investment strategies of the above-mentioned funds in the context of on-going debates about their transparency. The book discusses how most Gulf sovereign wealth funds were established under colonial rule and have operated in the global financial system for many decades. With the increase of oil revenues, it goes on to look at how the funds have broadened their asset classes and their institutional development. Debate over the transparency of sovereign wealth funds has highlighted various global practices. Recently, organisational measures have been introduced for calculating possible risks from non-commercial investment incentives of funds whose politically driven investment strategies are viewed as potentially a major threat to the national security of their host countries. Highlighting a number of incidents that triggered the transparency debate, the book scrutinises the reaction of some of the Gulf sovereign wealth funds to these recent regulatory codes and strategies. It is a useful contribution to Development, Political Economy and Middle East Studies.

*The Political Economy of Microfinance* Philip Mader, 2016-01-12. According to the author, rather than alleviating poverty, microfinance financialises poverty. By indebting poor people in the Global South, it drives financial expansion and opens new lands of opportunity for the crisis-ridden global capital markets. This book raises fundamental concerns about this widely celebrated tool for social development.
