Resources in Education ,1998 The Function of Theory in Composition Studies Raul Sanchez,2012-02-01 How can theory improve our knowledge of writing Ra l S nchez answers this question by examining dominant theoretical trends in composition studies over the last fifteen years citing their common origins in a narrow representational metatheory of writing He argues that this adherence actually leads the field away from its objects of study writing and the writing subject Through this extended critique he elaborates an alternative metatheory one that restores writing to the conceptual center of composition studies by emphasizing its generative rather than its representational characteristics particularly in increasingly networked and textualized cultures **Reconnecting Reading and Writing** Alice S. qualitative differences examining the very underpinnings of the various assumptions of distinct methodologies Divided into four major areas of inquiry the book looks at different aspects of conducting think aloud protocol analysis retrospective accounts discourse analysis and interviews in the field **The Politics of Writing Studies** Robert Samuels,2017-09-07 A friendly critique of the field The Politics of Writing Studies examines a set of recent pivotal texts in composition to show how writing scholarship in an effort to improve disciplinary prestige and garner institutional resources inadvertently reproduces structures of inequality within American higher education Not only does this enable the exploitation of contingent faculty but it also puts writing studies a field that inherently challenges many institutional hierarchies in a debased institutional position and at odds with itself Instead of aligning with the dominant paradigm of research universities where research is privileged over teaching theory over practice the sciences over the humanities and graduate education over undergraduate writing studies should conceive itself in terms more often associated with labor By identifying more profoundly as workers as a collective in solidarity with contingent faculty writing professionals can achieve solutions to the material problems that the field in its best moments wants to address Ultimately the change compositionists want to see in the university will not come from high theory or the social science research agenda it must come from below Offering new insight into a complex issue The Politics of Writing Studies will be of great interest to writing studies professionals university administrators and anyone interested in the political economy of education and the reform of institutions of higher education in America **Assessing Writers' Knowledge and Processes of Composing** Lester Faigley,1985 This volume offers a new perspective on the evaluation of writing The first half of the volume reviews research on composing and examines existing methods of evaluating writing The second half sets some limitations in assessing changes in composing processes describes some methods researchers in other areas have used to investigate cognitive processes and outlines a model of writers knowledge that can lead to comprehensive assessments of writing skills
